The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending September 14, as reported by the several carrying companies, amounted to 406,101 tons, against 364,078 tons in corresponding week last year, an increase of 42,033 tons. The total amount of anthracite mined for the year is 11,076,874 tons, against 13,365,869 tons for same period last year, a decrease of 2,288,995 tons. The quantity of bituminous coal sent to market for the week amounted to 36,139 tons, against 39,722 tons in corresponding week last year, a decrease of 3583 tons. The total amount of bituminous mined for the year is 2,247,030 tons, against 2,179,792 tons for corresponding period last year, an increase of 67,238 tons. The total tonnage of all kinds of coal for the week is 442,240 tons, against 403,800 tons in corresponding week last year, an increase of 38,440 tons, and the total tonnage for the coal year is 13,328,904 tons, against 15,545,661 tons to same date last year, a decrease of 2,221,757 tons. The product of the mines of the Cumberland coal region for the week ending September 14 was 45,804 tons, and for the year to that date 1 083 611 tons, an increase of 69,385 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 22,942 tons; for the year, 900,615 tons, an increase of 36,189 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 19,280 tons; for the year, 399,740 tons, an increase of 51,212 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week in September was 106,387 tons, of which 84,406 tons were coal, and 21,979 tons coke. The total carried for the year is 3,319,381 tons, of which 2,600,257 tons were coal and 709,257 tons coke. These figures embrace all the coal carried over the road, east and west. The tonnage of the Reading Railroad for the week ending on the 21st instant was 105,000 tons, of which there were sent to Port Richmond 37,250 tons, and during the week there were shipped thence 53,000 tons.—*Phila. Ledger, Sept. 23.*

New York Elevated Railroad.

A report has been prepared by treasurer Cowing, of the New York Elevated Railroad Company, for private circulation among the stock and bondholders of the company. It appears from this that, since January 1st last, the company has completed and put in operation the second track on its west side line from the foot of Whitehall street to Sixty-first street, in Ninth avenue; it has completed a double track road on its east-side line from the foot of Whitehall street to Sixty-first street, in Third avenue, with a branch in Forty-second street to the Grand Central depot, and has put under contract the various extensions of its eastern and western lines. Within five months the company will have a road equal to 82 miles of single track, with its stations, turnouts, repair shops, storehouses, &c., fully completed, equipped, and in operation.

The report states that every dollar of the subscription of December, 1877, made for the purpose of building and equipping the road from Whitehall street to Sixty-first street, on the east side, the Forty-second street and Chatham street branches, the second track on the west side to Sixty first street, and the extension of that line of Eighty-first street in Ninth avenue, has been paid, and proved more than ample for the purposes intended, a surplus from the subscription being now at the disposal of the directors. The second subscription of May 14th last, for the purpose of extending and equipping the road on Third avenue to Harlem has been taken mainly by the same persons who subscribed in December. The following shows the stock and bond statement of the company:

CAPITAL STOCK.

	Shares.
Issued	31,893
The May subscription	10,633
In the treasury, at the disposal of the board,	7,474
Total authorized and upon the list of N. Y. Stock Exchange	50,000

BONDED DEBT.

	Bonds.
Issued	4,806
The May subscription	1,519
In the treasury, at the disposal of the board	675
Total authorized and upon the list of N. Y. Stock Exchange	7,000

The following shows the condition of the treasury of the company August 17, 1878:

CASH STATEMENT.

In bank		$221,756
On hand at office		19,787
Total		$241,543
In Central Trust Company, at call, on interest	$100,000	
In United States Trust Company, at call, on interest	50,000	
		150,000
Total		$391,543

The company has no floating debt. The number of paying passengers carried by the company since January, 1872, has been as follows, the periods given ending on October 1st:

1872, nine months	137,446
1873, twelve months	648,275
1874, twelve months	796,072
1875, twelve months	920,571
1876, twelve months	2 012,954
1877, twelve months	3,011,863
Total, five and three-quarter years	7,522,131
1877-78, ten months	3,204,820

The following statement shows the earnings and expenses of the company for each year since January, 1872. Up to September 30, 1876, interest on the debt was not included in the expenses, but for the last year it was included, amounting to $99,995:

Year.	Gross earnings.	Expenses.	Net earnings.
1872, 9 months	$13,744	$13,243	$501
1873, 1 year	64,602	61,758	2,844
1874, 1 year	81,047	86,487	559
1875, 1 year	93,631	88,372	5,258
1876, 1 year	202,675	188,177	14,497
1877, 1 year	303,208	289,548	13,660

Deducting the amount of interest for 1877, the expenses would be $189,553, which, taken from the gross earnings ($303,208), leaves net earnings of $113,655 for 1877, compared on the same basis with the figures for former years.

☞ A special cable dispatch says that the Grand Trunk Railway accounts for the last half year show sufficient net revenue to pay preference debenture stocks charges and to carry forward £2,300.

☞ A Worthington pump, with a capacity of 3,000,000 gallons of water a day, is being placed in the water works at Scranton.

☞ A coal scow, propelled by steam, recently passed through the Lehigh canal from Easton to Mauch Chunk.

Philadelphia Stock Exchange.

American Railroad Journal.

Saturday, September 28, 1878.

Financial and Commercial Affairs.

The financial signs of the times show an improvement and a good prospect for the future. The late uncertainty and doubt concerning the conduct of the national finances are now apparently at an end. We are now assured that unless Congress interferes next winter with the existing law, we shall have a return to sound money and all that such a return will do for domestic and foreign trade. A few months of practical resumption will do more towards establishing a general healthy condition of trade than any amount of argument. Nothing will clear away the countless theories now offered like a few hard facts. Nothing will so soon show the people the absurdity of the eminent amateur financiers who are now flooding the country with their dangerous nonsense. Everything looks toward better things in the future. The crops of small grain including wheat, rye, barley and oats were securely harvested, and are already being moved forward to market as fast as the farmer's other labors will permit. Indian corn alone of the grain crops remains unharvested. It is the largest and most important of all, feeding both men and beasts. But the corn crop has now passed the period of early frosts in safety, and this crop may be reckoned as secure.

The Stock market offers little that deserves special comment. It is believed by many that a general increase of values ought now to begin. This feeling has encouraged speculation through the summer months; and still appears spasmodically to relieve the present dullness. Last week

closed quiet with sales for Saturday amounting to 64,000 shares. Monday opened the present week with sales of 149,000 shares. Tuesday's sales were 146,000, and Wednesday's, 147,790.

The transactions as at our last report continue to be limited to a small list. The "granger" stocks still lead all others in interest and in amount of dealings. Freights and earnings are carefully scrutinized and made to appear on the street sometimes in honest figures, but more frequently distorted and altered to suit the purposes of the operators.

We may state this as the truth concerning nearly all railroad shares: the roads with few exceptions will all do a fair freight traffic during the current year. The majority of the roads are now as economically administered as can be expected. The net earnings will equal those of any recent year if fairly exhibited. The grain-carrying roads of the West will all have plenty to do. The same is true of the cotton-carrying roads in the South. The business of the trunk lines cannot fall below last year unless by their own mistake freights upon the close of water navigation are raised to a point that will cause the farmers to hold back the produce. If the trunk lines should commit such a blunder they will deserve to lose by it. From this it will be seen that share values may be considerably enhanced by the traffic done; but we warn those not familiar with the doings of the street that increased earnings *may not* exhibit any substantial increase in share values or dividends upon the same.

Government bonds of the new four per cent issue continue to be taken freely. It now appears that the interest on the greater part of the public debt will be reduced to four per cent. This will be a saving that will be felt; while the ease with which the change has been accomplished shows at once that we are now able to carry our indebtedness and at the same time have money in abundance for ordinary wants besides. We now quote all issues of government securities as follows:

United States 6s, 1881, registered, 107¾@108; do. coupon, 107¾@108; 5-20s, 1865, new, registered, 102¾@103; do. coupon, 102¾@103; do. 1867, registered, 105¼@105½; do. coupon, 105¼@105⅝; do. 1868, registered, 107@107½; do. coupon, 107⅛@107½; ten-forties, registered, 106⅛@106¼; do. coupon, 106@106¼; 5 per cents, 1881, registered, 105⅞@106; do. coupon, 105¾@106; 4½ per cents, 1891, registered, 103⅛@103⅝; do. coupon, 103⅜@103⅝; 4 per cents, 1907, reg., 99¾@99⅞; do. coupon, 100¾@100⅞; sixes, currency, 119⅝@119¾.

Money remains in good supply for borrowers and rates are low. Call loans were made at 1½@2 per cent for Government collaterals. For stocks, loans ranged at 2@2½, and occasionally 3 per cent. Prime commercial paper is still in limited supply. Discounts for prime paper are made at 4@5 per cent. Gold has fluctuated ⅛ per cent during the week. At the close Wednesday the price was 100⅜ with small sales and a dull market. The premium will not fall probably below ¼ per cent until about the end of the year when resumption will take place. For custom house purposes silver certificates are now put to active use, and the demand exceeds the supply. Bar silver is quoted at 1.12½ per ounce here, and 51 9-16d. per ounce in London. Mexican dollars are bought at 88⅛ currency.

Boston advices indicated a fairly active market for certain lines of merchandise. The prospect is now good for a satisfactory general business exhibit for the season. Money is in good supply and prime names are readily discounted at 4@5 per cent. Paper classed A-1 is scarce and not a large amount of it is being made. From this it is not easy to predict any immediate advance in rates for money. Banks, however, are pretty firm in their rates.

Baltimore reports show a fair trade for the season. Dealers, as a rule, are carrying light stocks. The Money market remains quiet with ample funds at command for all purposes. Business paper is scarce and in demand. Discount rates are unchanged. Railroad stocks are dull and prices are easier. Baltimore and Ohio Railroad common stock fell off slightly from our last quotation. At the close sales were made at 91. Northern Central Railroad shares were steady, with 15@15¼ bid at the close.

Philadelphia latest advices report a brisk Stock market and prices well maintained. Money was easy and stock loans were made at about 4 per cent; with transactions as high as 5 per cent. Prime commercial paper was discounted at 5@7 per cent according to grade.

Pennsylvania Railroad shares sold at 34@34⅛ at the close. Sales of this stock to the amount of 10,000 shares were reported for New York account. Reading Railroad was quoted at 15¾@16.

Domestic Produce continues in good demand for consumption and export. Shipments both of flour and grain to Great Britain and the Continent are large and bid fair to continue so for some time. The present prices are fairly remunerative to the producer, and from the volume of exports the foreign consumer finds our food products cheaper than his own. Exports of produce and merchandise (exclusive of specie) for the week were $7,543,295, currency value.

Cotton has been feverish and irregular with a downward tendency. The crop is now definitely known to be about 5,000,000 bales. And it is believed that the consumption will be equal to the supply since the stocks of cotton goods in home and foreign markets are not large. We quote middling uplands at 11⅛, for spot cotton. Futures ranged at the close as follows: For September, 10,80; for October, 10.78; for November, 10.78; for December, 10.71@10.73; for January, 10.75@10.76; for February, 10.85.

Foreign Exchange was again dull and slightly lower in consequence of a free supply of cotton bills. The rates at the close on Wednesday were, 4 81¼@¾ for prime 60 day bills; and 4 85½@4 86 for sight.

Metals continue dull and in slight demand. Sales of small lots of American and Scotch Pig Iron were reported, but generally on private terms. Quotations are nominal and unchanged, but sales have been made at small concessions. Steel and Iron Rails are unchanged.

Ocean freights show a fair movement, and rates are generally steady. To Glasgow on grain there was a marked decline; 4⅛d. was the steam rate. To Liverpool, by steam, for grain, 5⅛d. per bushel of 60 pounds; cotton, 9 32d. per pound, compressed. To Havre, steam, wheat, 20c. gold; by sail, grain, 5s. 1½d. per quarter. Cotton by steam, ¾c. compressed; by sail, ⅝c. To Hamburg, by steam, cotton, ¾c. compressed. To Bremen, by steam, cotton, 11-16c. compressed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

THE COUPONS OF THE FIRST MORTGAGE Bonds of the Southern Pacific Railroad Co. (of California), due October 1, 1878, will be paid at the office of the Company, Nos. 9 Nassau and 11 Pine Streets, New York. C. P. HUNTINGTON.

THE COUPONS DUE OCTOBER 1 ON
HOUSTON AND TEXAS CENTRAL RAILWAY
CONSOLIDATED BONDS
will be paid by
JOHN J. CISCO & SON, 59 Wall street.

CHICAGO, MILWAUKEE AND ST. PAUL RAILWAY COMPANY, New York, September 26, 1878.

Notice is hereby given that a Dividend of THREE DOLLARS AND FIFTY CENTS Per Share has been declared on the preferred stock of the Chicago, Milwaukee and St. Paul Railway, payable at the office of the Company, 68 William st., on the 15th of October next, on account of the net earnings of the year 1878, and that the transfer books will be closed on the 30th inst., and reopened on 16th of October.
JULIUS WADSWORTH, Vice-President.

THE COUPONS OF THE FIRST MORTGAGE Bonds of the Central Pacific Railroad Co. (San Joaquin Valley Branch), and of the Land Bonds, due October 1, 1878, will be paid at the office of FISK & HATCH, No. 5 Nassau street.
C. P. HUNTINGTON, Vice-Pres't.

Clinton, Bloomington and North-Eastern Railroad.

Articles of incorporation have been filed for record in the Recorder's office of McLean county, Ills., of the Clinton, Bloomington and Northeastern Railroad, which sets forth that it is the intention of the incorporators to build a railroad to connect a point within two miles of Strawn, a station on the Chicago and Paducah, in Livingstone county, and Clinton, Dewitt county; with a branch road connecting Bloomington with a point, on the line already named, in Anchor township. The incorporators are D. B. Stewart, E. Merrill, H. L. Terpening, J. T. Tanner and E. H. Ward, all of McLean county. The capital stock of the road is limited to $400,000. The chief office of the company is to be in Chicago.

Amending the Patent Laws.

We have received a circular letter from Mr. W. C. Hill, Clerk of the Senate Committee on Patents, which he desires published in order that inventors and all others interested may aid that committee in their work. Those who desire copies of the Bill now in the hands of that committee can obtain the same by forwarding their address to Washington as directed.

WASHINGTON, D. C., September 21, 1878.

SIR: For the information of your readers please insert a notice in your periodical, that all persons who desire a copy of the Bill now pending before Congress, to amend the Statutes in relation to Patents, should send their address to W. C. Hill, Clerk of Senate Committee on Patents, Washington, D. C., who will immediately forward same.

Respectfully,
W. C. HILL.

☞ The gross earnings of the Chicago, Milwaukee and St. Paul Railway Company from January 1 to August 31, 1878—a period of eight months—were $5,425,956 85. The expenses were $3,164,938 05, which left the net earnings $2,261,018 80, out of which the interest on the mortgaged debt, amounting to $1,441,939 68, being paid, there was a balance of $819,079 12. The 3½ per cent dividend on the preferred stock, payable on the 15th of October, will amount to $429,781 90, after the payment of which a surplus of $389,297 22 will remain to the credit of the company.

☞ A correspondent, writing from Hagerstown, Md., says that the prospects are now very encouraging for the extension of the Shenandoah Valley Railroad from Shepherdstown through the eastern portion of the county to Smithsburg. Many of the landowners along the route have agreed to give the right of way through their lands free.

☞ The earnings of the Central Pacific Railroad for the month of August, 1878, were $1,706,000, against $1,362,000 for the month of August, 1877; for the first eight months of 1878 the earnings were $11,106,363, against $10,592,644 for the first eight months of 1877.

☞ The gross earnings of the Philadelphia and Erie Railroad Company for the month of August, 1878, were $262,073 11, expenses, $177,740 65, net earnings, $84,332 46.

☞ A route for the extension of the Freehold and New York Railroad is being surveyed between Freehold and Allentown.

Exports and Imports.

Mr. Joseph Nimmo, Jr., the Acting Chief of the Bureau of Statistics, has prepared a number of interesting tables showing the growth of our foreign trade.

The following statement shows the imports of merchandise into the United States, and the exports of domestic and foreign merchandise from the United States from 1860 to 1878 inclusive (specie value) for the years ending June 30—

	Total Imports of Mdse.	Exports Merchandise.—Domestic.	Foreign.
1860....	$353,616,119	$316 242,423	$17,333,684
1861....	289,310,542	204,899,616	14,654,217
1862....	189,356,677	179,744,024	11,026,477
1863....	248,355 815	186,003,912	17,960,535
1864....	316,447,282	143,504,027	15,383,961
1865....	238,745,580	136,940 248	29,089,055
1866....	434,812,066	337,518,102	11,841,420
1867....	305,761,096	279,786,809	14,719,332
1868....	357,436,440	269,389,900	12 562,999
1869....	417,506,399	375 166,697	10,951,000
1870....	435,958,408	376,616,473	16,155,295
1871....	520,223,664	428,398,908	14,421,270
1872....	626,595,077	428,487,181	15,090,455
1873....	642,136,210	505,033,439	17,446,483
1874....	567,406,342	569,433,421	16,849,619
1875....	533,005,536	499,284,100	14,158,611
1876....	460,741,100	525,582,248	14,802,424
1877....	451,328.126	580,670,224	12,804,996
1878....	437,051,532	680,683,788	14,154,698

The exports of domestic merchandise during the year ending June 30, 1878, were the largest in the history of the country. The excess of exports has increased from year to year. This is shown in the following: excess of exports of domestic merchandise over net imports for years ending June 30:

1876	$79,648,481
1877	151,152,094
1878	257,786,964

The imports of merchandise have fallen off each year since the year ending June 30, 1873, the year of the largest importation.

The following are the values of the principal commodities of domestic production, the exportation of which greatly increased from June 30, 1868, to June 30, 1878:

	1868.	1878.
Agricultural implements	$673,381	$2,575,198
Live animals	733,395	5,844,653
Bread and breadstuffs..	68,980,997	181,774,507
Coal	1,516,220	2,359,467
Copper, brass, and manufactures of.	939,250	3,078,349
Cotton, manufactures of	4,871,054	11,435,628
Fruit	406,512	1,376,969
Iron, steel and manufactures of....	6,389,429	12,084,048
Leather and manufactures of....	1,414,872	8,077,659
Oil cake	2,913,448	5,095,168
Coal oil and petroleum.	21,810,676	46,574,974
Provisions,....	30,278,253	123,549,986
Total....	$140,926,987	$408,826,601

Attention is directed to the very rapid increase in the exports of agricultural implements, breadstuffs, iron and manufactures of iron, manufactures of cotton, leather and manufactures of leather, coal oil, petroleum and of provisions. The increase in the value of exports of certain of these articles is the more remarkable from the fact that their market price has considerably fallen during the last ten years.

IMPORTS.

The following are the values of the principal commodities of foreign production, the importation of which greatly decreased from June 30, 1873, to June 30, 1878:

	1873	1878.
Clocks, watches and materials	$3,274,825	$812,582
TEXTILES.		
Manufactures of cotton.	$29,752,116	$13,898,781
Manufactures of flax....	20,428,891	11,490,758
Manufactures of silk....	28,835,867	19,701,731
Clothing	8,551,161	6,676,789
Wool—		
Unmanufactured.	20,433,938	8 363,015
Carpets.	4,388,267	398,398
Dress goods.	19,447,797	12,055,806
Other manufactures.....	26 626,921	12,269,852
Totals	$159,464,248	$85,355,131
IRON AND STEEL.		
Bar, rod, sheet and hoop	$7,477,556	$1,630,707
Iron in pigs....	18,847,281	1,250,057
Railroad bars	19,740,702	530
Anchors, chains and other..	3,594,900	920,790
Steel—Ingots, bars, etc.	4,155,234	1,220,037
Steel—Cutlery, saws, etc	10,492,779	4,035,512
Total iron and steel.	$59,308,452	$9,057,633
Copper, brass and manufactures of.	3 966,471	617,188
Lead in pigs and bars..	3,220,627	353,986
Tin and tin plates..	18,356,653	12,112,532
India rubber and gutta percha..	900,187	242,564
Tea	24,466,170	15,669,168
Grand total	$272,959,633	$124,211,734

The falling off in the importation of commodities mentioned in the foregoing schedule constituted 73 per cent of the total decrease in the imports of all merchandise in the United States from June 60, 1873, to June 30, 1878. Attention is especially directed to the great decrease in the imports of the manufactures of cotton, flax and silk, of wool and manufactures of wool and of iron and steel and manufactures thereof. The falling off in the importation of railroad bars from $19,740,702 in 1873 to $530 in 1878 constitutes the largest and most remarkable decrease exhibited in the table.

The Cost of Iron.

In the year 1850 the cost of making iron in Pennsylvania was $14 25 per ton, and in 1873 the cost had risen to $32 33. In 1851 the cost was but $13 30 and in 1853 it was $14 38. In 1854 commenced a rise in the cost to $16; which was followed in 1875 by $18 87, from which point the cost fell gradually to $16 14 in 1859, and as late as 1863 it was only $16 53. After that the inflation set everything wild. The items of this cost in 1850 were: Ore, $5 75; coal, $3 70: limestone, 93c.; labor, $2 22; interest, &c., $1 68. In 1860 these items had changed thus:—Ore, $7 45; coal, $3 49; limestone, $1 21; labor, $1 87; interest, &c., $2 83. In 1873 the items cost thus—Ore, $13 30; coal, $7 15; limestone, $1 97; labor, $3 79; interest, &c., $2 76. In June, 1877, the cost of the same items was stated thus: Ore, $7 69; coal, $4 93; labor, $2 02; limestone, 81c.; interest, &c., $2 81; total, $18 36.

From these figures it would seem that in the aggregate cost the manufacture of pig iron in Central Pennsylvania had in 1877 returned to what it was in 1855, but not to what it was in 1860. The cost of ore was but little higher, but not nearly as low as in 1850. The cost of coal was higher; the cost of limestone was much lower than in 1860. Labor was lower than it had been in 1850 or 1855, but higher than in 1860. The interest, &c., was higher than ever. From these facts it appears that while we have made considerable progress in cheapening the cost of the manufacture of iron, there is still much to be done. Contrary to the general belief, labor seems to have returned to its ante war standard taking 1855 as a test. Limestone is cheaper than ever and coal is not dear. The cost of ore might be slightly reduced. Whether coal can be cheapened to the iron trade is a grave question we are not prepared to answer. The item for interest, &c., n 1877 embraces $1 26 for interest on capital invested and $1 65 for renewals, repairs, salaries, taxes, insurance and sundries. In 1850 the corresponding cost was only at $1 68, and in 1864, in the midst of the inflation, it was $1 66. Evidently this item had not been retrenched at all, since in 1873 it was $2 76 and in 1877 it was $2 91.

In all the history of the Pennsylvania iron manufacture, the heaviest items of cost have been the ore and the coal. In 1873 these two items cost $20 45 out of $32 33. There may, of course, be reasons why ore cost $13 30 in 1873 and $9 12 in 1864. But as in 1877 it had fallen to $7 69, there is room to suspect that the actual cost of producing the ore was not the real secret of the enormous rise. That the rapid increase of iron works made a competition for the ore there can be no doubt. And herein is seen the great advantages possessed by large corporations owning iron mines, coal mines and limestone quarries. The general notion is that the excessive cost of labor raised the cost of all these things. The decline in the cost of ore is caused more by the large number of iron works out of blast than by any actual retrenchment in the cost of raising the ore.

We refer to these figures now for the purpose of showing that the profits of the ironmasters have been greatly misrepresented, and that when the price of iron was highest the margin of profit to the manufacturer was not excessive, nor indeed large. The demand for cheap coal had been answered as far as circumstances would permit: and yet the coal used by the iron furnaces was $4 93 per ton in 1877, and in 1860 it cost only $3 49. In 1871 the same coal had reached $8 59, and in 1873 it had fallen to $7 15. Of course the labor question enters into all these items of coal, ore, limestone and iron manufacture at every stage. But at the highest point of the inflation the cost of labor in making a ton of iron had only reached $3 54, while in 1855 it was $2 87. Coal was then (1855) $4 68 per ton. Those ironmasters who realized large fortunes in the trade did so by combining more than one branch of the business, and making profits on all. Iron was for a series of years in immense demand all over the world, but especially in this country. Protection enabled the manufacturers to maintain themselves against a heavy foreign competition, and to attract large amounts of capital to develop all the advanced forms of the iron industry. Those who now so constantly demand cheaper iron must be aware that in order to meet that demand, the items of cost must all be reduced more and more, whether the cheap iron be furnished by foreign or domestic producers. If we can cheapen our own cost advantageously, of course it should be done. And it is important to observe that thus far the cheapening has been wholly caused by the domestic competition. Cheap iron is desirable at all times. That fact must never be lost sight of. But in order that the cheapness should be enduring, it is indispensable that the domestic production shall not be crippled.—*Phil. North American.*

☞ The contractors of the Manchester and Keene Railroad have nearly completed the work of grading the road from Hancock to Keene. The trestle work across Hancock Gulf, which is about 300 feet long and 76 feet high, is ready for the rails, and the one at Marlboro', which is about 600 feet long and 87 feet high, is nearly completed. The rails have been bought, and the work of tracklaying will commence at once. Contractors Dawe and Bonallie are confident that the road will be put in running order before December 1.

☞ A decision was handed down by Judge Wheeler, in the United States Circuit Court, at Rochester on the 18th inst., against the validity of the bonds of the Town of Ontario, Wayne County, issued in aid of the Lake Ontario Shore Railroad.

Chicago, Clinton, Dubuque and Minnesota Railroad Company.

The stock of this company has made quite a little flurry on State street during the past ten days, advancing from 51 to 71, and back to 65.

The upward course which this stock has taken was no surprise to the stockholders who were acquainted with the financial condition of the Company.

The Chicago, Clinton, Dubuque and Minnesota Railroad is one of the many Western railroads built and controlled by Boston capital which having gone through the last five years of business depression has now been "boiled down" and placed upon "hard pan" basis, and now with returning prospects of good times is to be placed once more upon the list of solid investment securities.

This Company was organized February, 1878, by a consolidation of the Clinton and Dubuque, and the Dubuque and Minnesota Railroad Companies organized in 1877 as successors to the Chicago, Clinton and Dubuque, and the Chicago, Dubuque and Minnesota Railroad Companies respectively.

The road was built in 1870 in the zenith of inflated railroad times, and like many other Western roads, built at the same time, was compelled through lack of business to succomb to the times. The Company made default on the interest of their bonds in January 1875, and decree of foreclosure was issued in October 1876, and the roads turned over to Trustees March 1877.

The C. and D. Railroad Company purchased the D. and M. Railroad at date of consolidation.

Before reorganization the debts of the companies were:

BONDED DEBT.

C. D. and M. 1st mortgage, 8 per cent.	$4,425,000
C. C. and D. 1st mortgage, 8 per cent..	1,500,000
	$5,925,000

CAPITAL STOCK.

C. D. and M.	$2,500 000	
C. C. and D.	960,000	
		3,160,000
Total cost of road		$9,085,000

By reorganization the bonds of both roads were converted into stock, and the old stock wiped out, making the debt of the new company $5,925,000.

Capital stock, which has been increased $235,000 since reorganization to complete an unfinished portion of the road, making total capital stock $6,156,000.

Thus it will be seen from above facts that all earnings above operative expenses are applicable to dividends on the stock, as there is now no interest bearing bonded debt.

Now to the road's ability to earn dividends on its stock:

The gross earnings of the road for 1877 were		$443,611 43
Operating expenses were (53 per cent)	$233,240 54	
Extraordinary expenses, renewals, etc.	86,170 92	
		319,411 46
Net earnings		$124,199 94

From these figures, taken from the Company's last reports, it will be seen that the road earned $124,199 97, above all expenses, which, taking into consideration the extraordinary expenses of $86,170 92, and the fact that the road was in litigation, and that the past year was a very dull one for railroads, the above must be considered a very good showing.

The gross earnings Jan. 1 to Sept. 7, 1878, were	$337,038 07
The gross earnings Jan. 1 to Sept. 7, 1877, were	235,950 89
Increase	$101,087 18

Showing an increase of 45 per cent for the first eight months of this year over corresponding period last year.

There is no doubt but what the last four months' earnings (which are the heaviest of the year) will bring the increase to at least 50 per cent, making the

Total gross earnings for 1878 about	$665,000
Allowing 60 per cent for operating exp.	399,000
Estimated net earnings	$266,000
To which add surplus (net earnings, 1877)	124,000
Total net earnings on hand Jan., 1879.	$390,000

Which sum should assure the payment of two dividends of at least 3 per cent, and give the company six months lee way.—*Boston Journal.*

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of August:

	1878. Month.	1878. Year to date.
Gross receipts:		
Railroad traffic	$1,217,542 58	$8,803,275 97
Canal traffic	119,115 38	584,905 88
Steam colliers	49,600 03	408,742 80
Richmond coal barges	16,633 66	68,019 41
Total Railroad Co.	$1,402,792 25	$9,364,944 06
Reading Coal & Iron Company	950,825 41	5,530,208 22
Total of all	$2,353,617 66	$14,895,152 28
Tonnage and passengers:		
Tons of coal on railroad	683,076 15	4,082,460 02
Tons of merchandise	280,015 05	2,337,658 05
Passengers carried	555,914	4,710,297
Coal transported by steam colliers	62,960 00	435,501 00
Tons of coal mined:		
By coal and Iron Co	341,129 03	1,910,012 14
By tenants	128,623 00	759,749 00
Total mined from lands owned and controlled by Co. & from leasehold estates	469,752 03	2,669,701 14

	1877. Month.	1877. Year to date.
Gross receipts:		
Railroad traffic	$1,248,515 78	$8,545,813 60
Canal traffic	103,400 27	625,096 74
Steam colliers	50,618 90	489,345 20
Richmond coal barges	18,144 20	90,071 27
Total Railroad Co.	$1,420,879 15	$9,750,326 81
Reading Coal and Iron Co.	1,202,784 59	6,780,918 96
Total of all	$2,623,663 74	$16,531,245 77
Tonnage and passengers:		
Tons of coal on railroad	755,709 08	4,962,781 02
Tons of merchandise	320,176 12	2,311,351 12
Passengers carried	588,920	4,890,260
Coal transported by steam colliers	60,079 00	428,976 00
Tons of coal mined:		
By Coal and Iron Co.	420,398 09	2,560,776 12
By tenants	158,249 16	909,016 14
Total mined from lands owned and controlled by Co. and from leasehold estates	578,648 05	3,469,793 06

The result of the business of the Railroad and the Coal and Iron Company for the year up to September 1st, as compared with that of last year, as appears by the above figures, shows a falling off of gross receipts by the two companies of $1,636,093 49, due to the restriction of coal production enforced by the action of the Board of Control, but we are informed that the profit and loss account is but $41,818 28 below that of last year to the same time. In other words, notwithstanding the restriction of production and consequent idleness of the mines and plant of the companies during a great portion of the present year, the better prices for coal and transportation have enabled the two companies to make within $42,000 as much as they did last year with a coal tonnage of 880,321 tons less than that carried to the same period of the previous season, with a very much better prospect for the immediate future than existed at the same date of 1877, when the market was heavily overstocked with coal.

Richmond, Fredericksburg and Potomac Railroad.

At a meeting of the stockholders of the Richmond, Fredericksburg and Potomac Railroad Co., held in Richmond on the 20th inst., to reconsider the action of the company at the last meeting in regard to re-establishing the Potomac steamboat line, connecting the road with Washington and the North, a resolution offered by C. F. Mayer, of Baltimore, that in consideration of the objections made by the State railroad commissioner, and to avoid the tedious and costly litigation in which the company would be placed in its defiant antagonism to the State government, the board of directors be instructed to take no action in relation to the Potomac Steamboat Company without further instructions from the next general meeting of the stockholders, was rejected on a recorded vote—yeas, 2,126, nays, 2,872. This ratifies the action of the last meeting for the re-establishment of the boat line. Judge Robert Ould was then elected president of the Company, defeating Col. John M. Robinson, the present incumbent, by the same vote. The following board of directors was next elected in place of the present incumbents: John S. Blackburn, Alexandria, Va.; Isaac H. Carrington, Richmond; Moncure Robinson, Jr., and Alfred Horner, Philadelphia.

Pullman Palace Car Co.

At the annual meeting of the stockholders held in Chicago on the 12th inst. the following statement was submitted showing the income account to have been as follows:

REVENUE.

Earnings (leased lines included)	$1,709,136
Our proportion of earnings of other Sleeping Car Associations controlled and operated by this company	448,193
Patent royalties	8,500
Total revenue	$2,160,829

DISBURSEMENTS.

Operating expenses, including legal expenses, general taxes, and insurance (leased lines included)	$577,745
Maintenance of upholstery and bedding (leased lines included)	150,187
Our proportion operating expenses in cars of other Sleeping Car Associations controlled and operated by this company	150,645
Rental of leased lines	264,000
Profit and loss, including interest, discount, and exchange	16,715
Coupon interest on bonds	181,150
Dividends on capital stock	471,056
Balance of account for rebuilding and remodeling cars into the latest standard Pullman car	13,179
Balance of surplus for the year carried to credit of income account	336,150
Total, as above	$2,160,829

The following financial statement was also submitted

ASSETS.	
Four hundred and sixty cars and equipments, including franchises, cost	$8,491,252
Car works at Detroit, cost	344,888
Patents, United States and foreign, cost	164,383
Furniture and fixtures in the several offices of the company, fifty-two in number, cost	63,195
Real estate, Chicago, cost	22,001
Amount invested in other car associations, controlled and operated by this company, cost	2,892,987
Construction material and operating supplies, including amount paid on cars in process of construction	294,208
Balance of accounts and bills receivable and payable	346 007
Cash on hand and in bank	94,294
Total assets	$12,213,165
LIABILITIES.	
Capital stock issued, 59,382 shares, par value $100 each	$5,938,200
Outstanding bonds—8 per cent currency debenture bonds:	
Second series, due May 15, 1881	$298,000
Third series, due February 15, 1887	432,000
Fourth series, due August 15, 1892	816 000
	$1,546,000
Seven per cent currency debenture bonds, due Oct. 15, 1878	603,000
Seven per cent sterling debenture convertible bonds, due April 1, 1885	218,000
	2,367,000
Amount received from sale of old cars leased from Central Transportation Company	419,013
Total liabilities	$8,724,213
Surplus account (invested in assets of the company):	
Guarantee fund account, to provide for taxes in dispute and possible losses in adjustment of unsettled accounts	15,728
Sinking fund account, to represent possible depreciation in franchises and patents, including loss on cars sold and replaced by new	600,000
Balance at credit of income account	2 873,223
Total, as above	$12,213,165

☞ The Austrian Government has offered through Sir Arthur Blyth, the Agent General in London, a reward of $20,000 to the American inventor who shall produce the best machine for reaping and cleaning wheat.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Stock Brokers, No. 12 Wall st., buy and sell stocks on the New York Stock Exchange and carry the same as long as desired on a deposit of three per cent. Careful attention given to orders for investment from $25 upwards in "Puts" and "Calls," which frequently pay from ten to twenty times the amount invested. Explanatory Circular and their Weekly Financial Report sent free on application.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

"Kin Beyond Sea."

In the last number of the *North American Review* is an article by Mr. Gladstone, ex-Premier of Great Britain, bearing the same title as this, Kin Beyond Sea. The Kin referred to are ourselves, the Americans, and the article is a comparison of the present condition of our country with England, with the possibilities and probabilities of the future. The world-wide fame and recognized ability of the writer make this singular article still more interesting and peculiar than it would be if coming from an ordinary man.

Mr. Gladstone is a man of broad comprehension and grasp; exceedingly matter of fact and practical in his statements, although not by any means free from idiosyncracies and personalities of thought and reasoning. But the vigor of his intellect is unquestioned. He alone is to-day the peer, the rival of Disraeli; and while less keen and subtle than his great antagonist, his reasoning is more logical and just and his judgment more substantial and correct.

After giving us credit for great patience and endurance in times of adversity, Mr. Gladstone predicts for us a remarkable future. We are destined he believes to speedily outstrip England in the race for national prosperity and wealth. He plainly intimates that England is now entering upon her decadence. That having reached her highest point of national greatness, she has now commenced the retrograde in accordance with natural laws that apply alike to individuals and nations.

Of America and Americans Mr. Gladstone speaks plainly and candidly. Very few of us will agree with him in all of his statements or conclusions. Here and there he is plainly in error; but in the summing up he reaches a conclusion that the world has long been accustomed to look upon when delivered by Americans as bombast and bragging. Mr. Gladstone believes that we are the Future Great People of the world.

It is very curious, and amusing as well, to read the criticisms and comments of the current English press upon this article of Mr. Gladstone's. Many of the papers attack him savagely for his want of patriotism in saying what he has of England and her interests as compared with another nation. Even if it should prove to be all true that he has stated of the present and predicted for the future, why proclaim it to the world? they say. And, having been the honored son of the English nation, having been the chosen guardian of English laws and liberties, why sink national pride and patriotism and yield the highest honors to another? Certain it is that Mr. Gladstone's course has been very mortifying to English self-esteem, however manly and honest it may be to speak out honest convictions.

In our brief space we can do little more than to commend to the readers of the JOURNAL, and all others, thinking Americans, a careful study of the probabilities and possibilities of our national future as presented by one of the greatest men of our times. It is well to see ourselves as others see us. If, as some of us believe, our destiny will be to feed and clothe while helping to civilize and humanize the less favored lands of the globe, it is a high calling. Our natural resources are not equaled by any other nation. If the world this year can wear the cloth made from our 5,000,000 bales of cotton, who are to be the wearers of the additional million bales we are able to raise next year? If we are now able by our machinery to make one-tenth more of merchandise than we require, who is to buy this and other tenths in the future? Last but not least, if with a population of 45,000,000 we are already raising food enough for 100,000,000 people, where and how can we best distribute this vast surplus.

These are some of the problems that will naturally present themselves to the American mind after reading Mr. Gladstone's "Kin Beyond Sea."

Central Railroad of New Jersey.

The Central Railroad Company of New Jersey, to secure payment of 5,000 bonds of $1,000 each, on September 1, 1876, mortgaged to Samuel Knox and John Kean, as trustees, for the benefit of bondholders, all the franchises, rolling stock, depots, etc., etc.; also 15,000 shares of the capital stock of the New York and Long Branch Railroad Company (par value, $1,500,000); also 132,000 shares of capital stock of the Lehigh and Wilkesbarre Coal Company (par value $6,600,000); also 8,000 shares of the High Bridge Railroad Company (par value, $800,000); also 2,000 shares of the Longwood Valley Railroad Company (par value, $200,000), and also 30,000 shares of capital stock of the American Dock and Improvement Company (par value, $3,000,000.) The mortgage, which was recorded in liber 1,886 of mortgages, page 59, at the Register's office, on February 15, 1877, was canceled of record on the 27th of September, 1878.

☞ The Finance Committee of the Ogdensburg Railroad voted on the 30th ult., that "Whereas the net earnings of the road for the past six months are insufficient to pay the dividend on the preferred stock October 1, 1878, it is hereby resolved that payment of dividend thereon be postponed until the accumulated net earnings are sufficient therefor."

☞ At a recent meeting of the stockholders of the Rutland Railroad Company, in order to provide for the outstanding equipment bonds, provision was made for the issue of a new five per cent bond secured by a mortgage on the same equipment, and in addition thereto, by a second mortgage upon the road itself, thereby adding to the security. It is proposed to exchange the out-

standing equipment bonds for the new bonds, and to fund the coupons on the old bonds until the maturity of the same.

Northern Pacific Railroad.

To the Stockholders of the Northern Pacific Railroad Company:

The directors respectfully submit the following report for the year ending September 1st, 1878:

OPERATIVE DEPARTMENT.

The business of the road has continued to increase in a very satisfactory manner; the gross earnings of the year being $1,193,381 90, and the expenses $631,302 21; leaving a net balance of $562,079 69, or a net increase over last year of $169,381 22.

This increase comes wholly from the local business; competition with other lines and with the Missouri river having affected the bulk and rate of the remote traffic, so as to show a slight falling off from the through receipts of last year.

The several divisions of the road have been operated without accident, and they have been maintained in good working order. Many improvements have been made, both in the road and its equipment. Its condition is fully up to the average of the railroads of the country. For details of work accomplished east of the Missouri, reference may be had to the abstract from the report of the general manager of the Minnesota and Dakota divisions, appended hereto.

The wear and tear of the growing business of the road will soon require new rails to be laid on the 140 miles between Brainerd and Fargo, this portion of the line being subject to much heavier traffic than any other. We think that steel rails should be put down on this section whenever the present iron ones require renewal.

LAND DEPARTMENT.

The operations of this department during the year have been exceedingly active; the amount of land disposed of being nearly three-quarters of a million acres, as per following details of sales and receipts:

Land sales:			
In Minnesota....	84,840 acres,	for	$389,385 27
In Dakota.....	660,019 "	"	2,974,711 78
In Pacific div ...	4,774 "	"	15,385 27
Total	749,633 acres,	for	$3,379,482 32

Timber sales:		
Minnesota division.....	$23,964 91	
Pacific division.....	885 10	
		24,350 01
		$3,403,782 33

Town lot sales:		
Fargo.....	$5,830 00	
Mapleton..	150 00	
Casselton..	2,685 00	
Audubon	160 00	
Wadena	420 00	
		9,245 00
		$3,413,027 33

In payment of above there has been received:	
Preferred stock..	$3,359,376 95
Cash and contracts..	53,650 38
	$3,413,027 33

The absorption of government lands within our grant, during the year, has been even larger than the railroad sales.

During the twelve months ending with June last, the following entries were made in the government land offices:

St. Cloud,	907 entries..	87,597	acres.
Detroit,	2,450 "	366,719	"
Fergus Falls,	2,014 "	271,274	"
Fargo, D. T.,	3,921 "	586,734	"
Bismarck,	69 "	11,092	"
Total,	9,361 entries..	1,323,416	acres,

These entries are made only under the pre-emption, homestead, and free culture acts, all of which require occupancy and cultivation.

In correction of a prevalent impression that capitalists take up large areas to hold for speculation, we take this occasion to state, that the great majority of purchasers carry but the ordinary sized farms of from eighty to three hundred and twenty acres, and that the average holding of all the purchasers who have taken lands of the company, is less than six hundred acres; while most of the larger purchasers are cultivating on a scale proportionate to their holdings.

In the nine counties of Minnesota and seven counties of Dakota, intersected or accommodated by this road, the area under cultivation this year, to all crops, was nearly 250,000 acres, of which 185,000 acres was in wheat. The new breaking, already accomplished, in the same counties, will add 133 000 acres for their next year's crop.

The population has increased 40 per cent in nine months. More fortunate than the settlers in many other portions of the west, where extreme heat and violent storms have successively injured or diminished the crop, the wheat growers on the line of the Northern Pacific have, in each of the past four years, been able to show highly favorable returns for their labor, and this year the product has been, beyond precedent or comparison, almost universally perfect and bountiful.

The lands of the company in the Red River valley having been mostly taken up, attention has been paid to developing the upland prairies of Dakota and the lands of the Missouri slope. The experiments thus far are eminently successful. The culture this year of wheat and oats in the counties of Stutsman and Burleigh has demonstrated, beyond all doubt, the capacity of the soil for profitable cultivation of all small grains, the products of this year being equal in quality and quantity per acre, to any in the Red River valley. From a field of fifty-five acres, near Jamestown, wheat averaged thirty-four bushels per acre, weighing sixty one pounds per bushel. On the same farm, oats yielded fifty bushels per acre, and weighed thirty-eight pounds per bushel. From Bismarck the yield of wheat is reported at twenty-three bushels per acre, and rates number one. From a field of three hundred and twenty acres of oats at same place, the yield is fifty bushels per acre, weighing thirty-eight pounds per bushel.

The progress of the land department on the Pacific division is not so satisfactory. Under the plan of re-organization, only the lands east of the Missouri river were made exchangeable for stock: and the Pacific coast lands being under the treble disadvantage of cash sales, a heavy covering of forest, and comparative inaccessibility, have thus far sold very slowly. The sales of this year are less than 5,000 acres, and the aggregate sales to this time, including all exchanged for bonds before the re-organization, are only about 176,000.

At the annual meeting of 1876, the stockholders instructed the board to take into consideration the expediency and legality of authorizing the exchange of the lands on the Pacific coast for preferred stock; and if their conclusions were favorable, to report a plan for such exchange.

The board is advised that there is no legal obstacle in the way of such an exchange, when properly authorized by the corporation, and in view of the apparent hindrance to occupation and improvement growing out of the present cash system, the net results of which are insignificant, they now recommend that suitable action be taken at the annual meeting to authorize such exchange, subject to a small percentage of cash payment required for maintaining the local land department of that division.

PACIFIC DIVISION.

The outlays required during the past year for renewal of perishable structures on this division have been large, aggregating about $20,000. In many cases, however, the work done has been of a permanent character, wooden trestles having been replaced by solid embankments of earth and stone.

The gross earnings of the division included in the general exhibits of this report were $123,378 95 and the ordinary expenses were $80,949 94. The extraordinary expenses for renewals and improvements were $21,620 55.

Further explorations have been made, looking toward the extension of the branch over into the valley of the Columbia, and a party under the personal supervision of our chief engineer, W. Milnor Roberts, is now surveying the line across the Cascade mountains, by way of the Cowlitz pass. These surveys are yet incomplete, but show a practicable pass, at an elevation of about 4,000 feet above the sea. The construction of this line would, it is supposed, shorten the distance between the valley of the Upper Columbia and Puget sound, about one hundred miles.

The development of the coal mines has been slower than was anticipated at the date of the last report.

They were first opened above water level, by a gangway, which proved, when about eight hundred feet in, to be too near the surface. After some time had been consumed in prospecting for other surface openings, it was determined, on the advice of the mining engineer, to sink a slope in the vein (which has a pitch exceeding sixty degrees) three hundred and fifty feet deep, and to work this vein in connection with four contiguous ones, from this lower level.

Some faults have been encountered, causing the progress of the work to be slow, but the slope is now down about two hundred and fifty feet and progressing favorably. The engineer hopes to commence regular mining within sixty days.

These unexpected delays and difficulties, growing out of the broken state of the strata in that volcanic country, are a source of annoyance, but are perhaps only in accord with the usual experience as to time required for fairly opening a mine. The work being of a character admitting but a small force of labor, the cost has been comparatively light.

The quality of the coal is all that was expected. It is the only true coal yet opened on the Pacific coast, the only coal found there that will coke, or can be used in the forge fire, and will be in general demand as soon as it can be put on the market.

FINANCIAL.

The statements of the treasurer, published with the several annual reports, show that the earnings of the road in the three years since the reorganization of the company, after deducting operating expenses, aggregate		$1,238,820 59
Which has been expended as follows:		
For the retirement of old claims, secured by collaterals and sundry organization expenses..	421,844 50	
For construction on the branch line	552,732 17	
For opening the coal mines, including the construction of coal bunkers, machinery, &c.....	41,154 77	
For constructing and renewing wharves at Tacoma....	19,310 78	
For snow fencing, raising track, sidings, buildings, and other improvements charged construction on Dakota division....	32,430 46	
For sidings, buildings, and other permanent improvements charged construction on Minnesota division.....	31,668 92	
For ditto Pacific division.....	31,856 43	
For taxes.....	29,718 38	
For general and legal expenses, interest, telegraph, surveys, and sundry miscellaneous payments..	77,909 18	
		$1,238,820 59

The cash assets and liabilities are stated in the treasurer's report. There is no incumbrance on the railroad or landed property of the company.

EXTENSION WEST OF THE MISSOURI.

During the past season a commission, consisting of the resident engineer of the Eastern division, a prominent western stockholder of well affirmed good judgment, and several experienced contractors were sent out to explore the 205 miles of surveyed line between the Missouri and Yellowstone rivers, with the especial purpose to observe the quality of the lands, and their probable availability for raising money to construct that division.

The report of the party was favorable. They found the lands to be of good quality for cultivation and grazing. They also report that the coal found from fifty to seventy miles west of the Missouri, is abundant and well adapted for domestic and steam fuel.

It is deemed of the utmost importance by the directors that this division, between the Missouri and the Yellowstone, be put under contract, in whole or in part, for construction at the earliest day practicable.

THE ST. PAUL CONNECTION.

At the last annual meeting, the subject of securing the completion and use of a line of railroad in the Mississippi valley to connect Brainerd with St. Paul, was submitted to the stockholders, and, by a resolution then adopted, the action of the Board, in subscribing to a majority of the stock of the Western Railroad Company of Minnesota, organized to build said road from Brainerd to Sauk Rapids, was approved and confirmed. The board was also authorized "to lease said road when completed, at a suitable rental, such as shall cover the interest on the securities issued to construct the same."

The road was completed and opened for traffic in November last, and was operated for account of its owners until the first day of May last, when it was leased to this company for a term of ninety-nine years, upon an annual rental of thirty-five per cent of the gross earnings of said Western Railroad, for the first five years, and forty per cent thereafter; with a guaranty that in each year the rental shall be equal to the annual interest at seven per cent on the outstanding bonds of said Western Railroad Company; which bonds are not to exceed ten thousand dollars per mile of said road.

The operations of this branch are proving satisfactory to both parties—the thirty-five per cent of gross earnings yielding to the Western Railroad a surplus over the minimum rent named in the lease, and the sixty-five per cent yielding the Northern Pacific a surplus over the cost of running and maintaining the road.

The opening of this branch shortens the distance between St. Paul and the west eighty-seven miles, as compared with our former route, by way of the St. Paul and Duluth road, and enables this company better to compete for the business of the Red River Valley.

The railroad between Sauk Rapids and St. Paul is at present controlled by the trustees of certain mortgages made by the First division St. Paul and Pacific Railroad Company. Upon the opening of the road from Brainerd to Sauk Rapids, arrangements were entered into with these trustees, whereby our trains ran over their road, making St. Paul, practically, one of the terminal points of the Northern Pacific. This arrangement still continues, but the conflicting interests of the parties render harmonious action so difficult that arbitration has already been resorted to for an adjustment of outstanding disputes. It has become manifest that the interests of this company demand a firmer and more satisfactory connection between their leased line and the railroads centering at St. Paul and Minneapolis, and that if suitable and permanent arrangements cannot be made on the line now in use, we must look elsewhere for relief.

These cities have now reached an aggregate population estimated at 90,000. They are great centres of mercantile and manufacturing enterprise in the northwest, and seem destined to maintain their supremacy by growing up with the country. And they are the centering point for all the avenues of traffic east and south. The importance of a permanent connection with them, under the sole control of this company, cannot be over estimated.

The people of Minneapolis and St. Cloud, and intervening towns on the west bank of the Mississippi, propose to secure for us this connection. They have organized a company to construct a railroad from Sauk Rapids to Minneapolis, and are now at work completing their surveys and location. They invite the company to rent their road, when completed, on terms similar to the lease of the line between Sauk Rapids and Brainerd, and offer in the same manner the controlling interest in their stock.

We recommend that the board be authorized to enter into suitable agreements with these parties, for the encouragement of the construction, and for the control of this connecting link.

BUSINESS WITH MANITOBA.

Until within a year, nearly all the traffic between the Canadian province of Manitoba and the States, or Eastern Canada, passed over the Northern Pacific Road, between Duluth and Moorhead, or between Thompson Junction and Glyndon.

Since the opening of the line between Brockenridge and the St. Vincent branch, the parties controlling that line from St. Paul to Fisher's Landing, in combination with the Red River Transportation Company, have refused us the use of their lines north of Glyndon for St. Paul business, and, in the heat of a controversy recently submitted to arbitration, went so far as to refuse us a connection for Duluth business, and to haul the same 174 miles extra distance, to avoid using our road.

The traffic of the province is large, and of growing importance. Most of it would naturally pass over 244 miles of our road between Duluth and Glyndon. As an all-rail connection is about to be completed between our line at Glyndon and the capital of the province at Winnipeg, it becomes a matter of serious interest to maintain our proper relations with that country.

The possible necessity for seeking an independent connection, induced us to order a survey the past summer, west of the Red River, from our road to the province line, there connecting with the Pembina branch of the Canadian Pacific, now under construction. The report of our engineer shows the distance to be about 150 miles; the country almost a dead level, and the soil equally as good as that under cultivation on our road west of Fargo. Reports from reliable examiners indicate that this belt of exceptionally fertile land, on the west side of the river, averages not less than seventy miles wide, for the 150 miles from the Northern Pacific Railroad to the province line, and that its extent within and beyond the province is even greater. All the lands of the company in this valley, west of the river, for fifty miles north of the road, are already taken up, and settlers are rapidly pushing on to the northward. Within a very short time a railroad through this tract will be a necessity, for the accommodation of the local business.

We believe, therefore, that the interests of this company will be promoted by encouraging now the construction of a railroad to accommodate this fertile belt, and to secure our permanent connection with Manitoba.

* * * * * *

All of which is respectfully submitted,
By order of the board,
CHARLES B. WRIGHT, President.
NEW YORK, 23 Fifth Ave., Sept. 25, 1878.

☞ The sale of the New York, West Shore and Chicago Railroad, which was to have taken place under foreclosure on the 27th ult., has been postponed until the 28th of October, to enable the holders of bonds who have not yet signed the proposed plan of reorganization to do so, and so save the franchise. The total amount of outstanding defaulted bonds is $7,000,000. The holders of $5,000,000 have signed. Of these, $3,000,000 are owned by ex-Gov. Page, President of the Construction Committee. Only two miles and a half of road are built.

Continental Telegraph Co.

The Continental Telegraph Company, the latest opposition to the Western Union Telegraph Co., has laid a cable from the foot of Cortlandt-street, New York, to the Cunard wharf, Jersey City, and another across the Passaic river at Trenton. This completes the line to Philadelphia. A short time ago the Philadelphia Common Council refused to grant the company the right of way through that city. This difficulty has been overcome by the purchase of right of way through private property, and an extension has been made eight miles further south. The company will have offices open the early part of next week, and will be prepared to do business at once to Philadelphia, and shortly afterward to Washington. They propose to build to the West, and elsewhere, as soon as possible. The Central Union Telegraph Company, which has built a line between Oswego and Syracuse, and is preparing to extend it to New York, will combine with the Continental.

☞ The following gentlemen have been elected directors of the Gold and Stock Telegraph Company for the ensuing year: Norvin Green, Tracy R. Edson, James H. Banker, Augustus Schell, Anson Stager, William M. Bliss, George Walker, Hamilton McK. Twombly and Samuel F. Barger. The officers are: Norvin Green, President; Geo. Walker and Geo. B. Prescott, Vice-Presidents; and the President and Vice-Presidents, with Messrs. Barger, Edson, Banker and Twombly, constitute the Executive Committee.

☞ The Rogers Locomotive Works, Paterson, N. J., are taking out one of their Railroad Track Scales and replacing it with one of Richie' Bros. (Phila.) Improved Self-Adjusting Scales of 100,000 lbs capacity. This is the style of scale that was pronounced by the Judges at the World's Fair 1876 "as offering the greatest guarantee of accuracy and durability" over all others on exhibition. Richie' Bros. did not exhibit at the Paris Exhibition.

☞ A Richford (Vt.) dispatch says that Asa B. Foster, manager of the South Eastern Railway, has returned from England, and it is reported that he succeeded in getting the funds promised his father for the completion of the Sorel Railway from Sutton to Sorel, Quebec, 96 miles in length. Work is being pushed rapidly, and soon trains will run from Sutton to Waterloo, and by Jan. 1 the entire road is to be completed.

☞ The report of the Quebec city engineer upon the North Shore Railway states that 71 per cent of the work is done, and that the condition of the work is very satisfactory. This is confirmed by the report of Mr. Light, C. E., chief engineer of the road, who says that the Terrebonne bridge will be finished by November 1st, and St. Vincent de Paul reached before sleighing begins.

☞ The morning train on the Pennsylvania Railroad from Philadelphia to New York does the distance, 89 miles, in 1 hour 54 minutes, with one stop, and returns in 1 hour 48 minutes, with two stops—a rate of nearly 50 miles an hour one way, and of over 50 the other.

Sioux City and Pacific bonds, 1862-64	1,623,320 00	24,424 80
Totals	$64,623,512 00	$969,352 68

Interest paid by United States, $39,835,039 34; interest repaid by transportation of mails, &c., $10,279,181 35; balance of interest paid by United States, $29,555,858 51.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

* This amount includes $41,500,000 Five-twenty called Bonds not yet matured, against which a like amount of 4 per cent Bonds have been issued and are embraced in this statement, and the amount included in the coin balance.

☞ The Cape Cod Ship Canal Company met in Boston on the 24th ult., and accepted the act passed at the last session of the Legislature, extending the time for the construction of the canal, and reducing the capital from ten millions to four millions of dollars.

☞ In the U. S. District Court at St. Louis, on the 20th ult., Judge Treat granted a peremptory mandamus to compel Franklin county, in Missouri, to pay defaulted interest on two hundred thousand dollars of its bonds.

☞ The first locomotive and train—being the construction train of the Pittsburg and Lake Erie Railroad—crossed the Ohio River at Rochester, Penn., on the 20th ult.

☞ The gross earnings of the Wabash Railroad Company for the month of August were $577,939 57, the expenses $341,959 08, and the net earnings $235,980 49.

☞ The Gold and Stock Telegraph Company have declared a dividend of 1½ per cent, payable October 15.

Philadelphia Stock Exchange.

Closing Prices for the week ending Oct. 1.

American Railroad Journal.

Saturday, October 5, 1878.

Financial and Commercial Affairs.

A decidedly better feeling has prevailed in financial affairs during the week. The late William Cullen Bryant sang himself into fame more than half a century ago by saying of autumn, "The melancholy days have come, the saddest of the year." But the season thus far and especially the past week would contradict the poet. The weather has been remarkably fine for the transaction of outdoor business in the city, whilst in the country the farmers have been busy securing small crops and finishing the odds and ends of their farm work before the arrival of hard frosts. No symptom of melancholy has appeared thus far to make the fine autumn days "the saddest of the year."

Our national financiers seem to have now reached a conclusion to let well-enough alone. This conclusion is the very best for all interests beyond a doubt. The business of the country is now beginning to show signs of desirable activity; a good export demand for all products continues, whilst a gradual hardening of the money market shows that the late sluggish commercial blood is beginning to move again with healthy vigor. All this promises well for the future. There will be occasional checks and drawbacks, of course, but the "melancholy days" of the present year are not at all disheartening.

The statement of the public debt elsewhere in our columns exhibits a decrease in the same for the last month of $3,196,584 09. The subscriptions to the new four per cent bonds now amounts to $151,000,000. The total interest now to be

paid on the public debt is $28,039,290 59. Since June 30, 1878, the reduction in the public debt amounts to $9,878,245 84. It is not yet possible to determine whether the entire issue of 5-20s now being called in can be replaced by new 4 per cents before the next session of Congress or not. We are inclined to think they cannot.

The Stock market has exhibited a marked increase of traffic since our last report. Sales on Saturday were 259,000 shares; Monday, 178,000; Tuesday, 183,000, and Wednesday, 170,000.

Of this recent business it is only the truth to remark that a good proportion of the sales were believed to be not genuine—"washed" is the name for them on the street. Of the 183,000 shares reported sold on Tuesday more than one-third were Chicago and Northwestern; which stock is controlled by a well-known operator whose ordinary as well as extraordinary dealings are past finding out. Why there should be any extraordinary speculation in the "granger" stocks at this moment is a matter no one has discovered. As we have before told our readers, the roads in question are doing a satisfactory business now, which business will in all probability increase or at least be well maintained as the season advances. Beyond this fact there is nothing to predicate any increase of value. The difference between dividends earned and dividends paid is a matter for investors to examine for themselves.

The subscriptions to the new Government 4 per cents have not equaled those of the earlier weeks in the month just passed. No late call for 5-20s has been made by reason of this falling off in subscriptions. The fact that both coupon and registered 4 per cents can now be bought at par will probably quicken the sale. We now quote all issues as follows:

United States 6s, 1881, registered, 107¾@107⅞; do. coupon, 107⅝@107⅞; 5-20s, 1865, new, registered, 102⅞@103; do. coupon, 102⅞@103; do. 1867, registered, 105⅜@105½; do. coupon, 105¼@105½; do. 1868, registered, 107@107½; do. coupon, 107¼@107⅝; ten-forties, registered, 106@106¼; do. coupon, 106@106¼; 5 per cents, 1881, registered, 105⅝@106; do. coupon, 105¾@105⅞; 4½ per cents, 1891, registered, 103⅜@103½; do. coupon, 103⅜@103½; 4 per cents, 1907, reg., 99⅞@100; do. coupon, 99⅞@100; sixes, currency, 119½@119⅝.

The Money market continues to harden, which fact indicates plainly a revival of trade. There is a fair demand for money but still at low rates. Call loans are made at 2½@3 per cent for Government securities. For stock collaterals about 1 per cent more is demanded. Discounts are showing more firmness, although prime short date commercial paper is scarce. The rate for such paper is 5 per cent and upwards.

The City bank statement for last week showed a falling off of more than $3,000,000 in legal tender reserve, the money having gone West to move the crops. This fact was used by lenders as an argument for raising rates, money being too cheap here compared with other cities. But those who expect to see an early return to former rates will be disappointed. The West that has been such a constant borrower was never before so easy as now. Instead of $3,000,000 now sent West they would have required three times that amount to move the crops. At the present rate of production the West will soon cease to borrow having a surplus to lend.

Notwithstanding the Bank of England continues to gain in coin balances there is evident alarm at the continued stream of American exports into Great Britain. The question of payment is already disturbing English financiers, and whenever coin shipments shall begin for American account we shall expect a panicky effort on the Bank's part to check them. The small amount of United States bonds now held in Europe will not suffice to pay the balance due us. The coin seems to be the only commodity available; but the coin is coveted at home. Will they pay it?

From Boston our advices indicate a fairly active trade for the season with Money in good supply and demand. On the strength of the New York market hardening better rates were demanded by lenders, but they failed to obtain them. We now quote prime business paper at 4@5 per cent, for short dates, with less disposition to lend.

Philadelphia reports show a fair volume of business on the Stock Exchange without marked change from our last quotation. Money was in good supply and demand, and the rates in sympathy with New York were becoming stronger although not quotably higher. Railroad stocks were moderately active. Pennsylvania Railroad shares closed at 84⅜@84½. Reading Railroad dull and slightly lower closing at 15½.

Baltimore advices show a quiet market for general merchandise. A dull grain market prevailed owing to unfavorable foreign reports concerning exports. In Coffee an active trade was done and large quantities were going into consumption. The Money market was reported dull. Banks have ample funds for all wants, but in general decline any but prime short date paper, of which the market is nearly bare. Baltimore and Ohio Railroad common stock was weak and lower, selling at 87⅛@90. Northern Central quiet at 14¾@15¼ at the close. Miscellaneous stocks dull with small dealings.

Foreign Exchange is again slightly lower. The nominal rates are 4 80½ for 60 day bills, and 4 84½ for sight. Actual business however, is done at half a cent below these figures. The supply of cotton bills increasing the market is weak. Sales of documentary bills are reported at 4 79.

Gold has remained steady throughout the week at 100⅜. Bar silver is quoted in London at 51 9-16d. per ounce.

Domestic Produce has been active as heretofore, but with somewhat unfavorable advices from Europe prices are lower. The exportation, however, continues without noticeable change. Receipts of produce have been large at all the ports. The exports for the week (exclusive of specie) have been, currency value, $7,061,816; and since January 1, 1878, $261,444,405.

Cotton is again lower. The receipts at the ports have been largely in excess this year since September 1, over the same time in 1877. This may be the cause for a decline in Liverpool, as showing the probable certainty of a supply equal to any immediate wants. We now quote middling uplands at 10¾c. for spot cotton. Futures are lower, and sales were reported as follows: For October delivery at 10.62@10,67; for November, 10.56@10.63; for December, 10.56@10.60; for January, 10.58@10.63; for February, 10.66@10.71; for March, 10.76@10.80.

Metals continue dull and nominally unchanged in price. Sales of American and Scotch Pig Iron are only made in a retail way. Stocks are accumulating and the future is not encouraging. Steel Rails alone are active and in good demand. Prices are unchanged, but it is understood that the mills have orders ahead for some months' employment. The continued displacement of iron rails by steel bids fair to continue. This alone will give the steel mills occupation at fair rates; and that is about the only encouraging feature now visible for the metal interests.

Ocean freights have shown some activity during the week with rates remaining steady. Engagements were made to Liverpool for grain, by steam, at 6@6¼d.; by sail at 6d.; cotton at 5-16d.@11-32d. To London, by steam, grain, 6¼d.@6⅜d. per bushel of 60 pounds. To Hull, grain, by steam, 7d. To Havre, by steam, grain, 17½ cents per bush.; by sail, grain, 5s. 3d. per quarter. Cotton, by steam, ¾c. compressed; by sail, ⅝c. To Hamburg, by steam, cotton, ¾c. compressed. At the close free offerings of tonnage were made and rates were slightly easier.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Lehigh and Eastern Railroad.

A despatch dated Milford, Penn, Sept. 30, says there is no longer any doubt that the Lehigh and Eastern Railroad, to connect the Eastern States with the coal fields of Pennsylvania, will be speedily built, and then adds:

This road has been in contemplation for several years. It is claimed by the company that the proposed route will be considerably shorter than any other route, and that coal can be shipped to Boston and other Eastern cities at a greatly reduced price. The Western terminus will be at Tom Hicken, Penn. From that place the route extends northeast, crossing the Pocono Mountain five miles east of Stroudsburg, Penn., thence passing in an almost air line through the central part of Pike County to Port Jervis, N. Y., where a connection will be made with the New York, Lake Erie and Western Road. Several surveys have been made, but it is now asserted by the contractor that the present route will be established. From Tom Hicken to the Lehigh River, a distance of 25 miles, the survey has been completed, and work will commence this coming month. The estimated cost of building and equipping the road is $7,000,000, $5,000,000 of which, Contractor Williams says, is already in hand.

Survey of the Amazon and Madeira Rivers.

The United States steamer Enterprise which has just returned from an exploring expedition on the Amazon and Madeira rivers brings interesting intelligence from Brazil. The expedition was entirely successful in effecting a careful survey of the Madeira which is found to be navigable for five hundred miles, with an irregular depth of water, but not less than twenty feet from July to December. At San Antonio three miles of the railroad which the Messrs. Collins are building were completed. The first six miles are thought to be the worst on the whole route. The engineers who have been out ahead report that for sixty miles there is a stretch of flat ground over which the road will be rapidly constructed. Measurements obtained on the Amazon river show its volume to be seven million cubic feet per second. At Serpa, near the mouth of the Madeira river, the Amazon is a mile wide and sixty feet deep.

☞ The Wilmington (Del.) Every Evening says that the most important interest, that of shipbuilding, is in a healthful condition, and that car building begins to look up—about 200 men are employed.

☞ The Louisville and Nashville Railroad Company has completed negotiations for the construction of the southern division of the Cumberland and Ohio Railroad.

☞ Messrs. Huston & Co., contractors for the completion of the Cincinnati Southern railway, advertise for proposals from bridge builders for work upon thirty-four iron bridges.

☞ Col. William A. Kuper, the first engineer of the Chesapeake and Ohio Railroad, has been appointed Chief Engineer of the Cincinnati Southern Railroad.

☞ The sale of the Montclair and Greenwood Lake Railroad, which was to have taken place on the 30th ult., has been postponed to the 5th inst.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending September 21, as reported by the several carrying companies, amounted to 341,869 tons, against 371,526 tons in corresponding week last year, a decrease of 29,657 tons. The total amount of anthracite mined for the year is 11,418,743 tons, against 13,737,395 tons for same period last year, a decrease of 2,318,652 tons. The quantity of bituminous coal sent to market for the week amounted to 75,997 tons, against 84,053 tons in corresponding week last year, a decrease of 8,056 tons. The total amount of bituminous mined for the year is 2,323,027 tons, against 2,268,845 tons for corresponding period last year, an increase of 59,182 tons. The total tonnage of all kinds of coal for the week is 417,866 tons, against 455,579 tons in corresponding week last year, a decrease of 37,713 tons, and the total tonnage for the coal year is 13,741,770 tons, against 16,001,240 tons to same date last year, a decrease of 2 259,470 tons. The product of the mines of the Cumberland coal region for the week ending September 21 was 40,438 tons, and for the year to that date 1,124 049 tons, an increase of 59,586 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 15,605 tons; for the year, 616,220 tons, an increase of 34,425 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 21,670 tons; for the year, 420,911 tons, an increase of 44,959 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week in September was 114,168 tons, of which 89,025 tons were coal, and 25,143 tons coke. The total carried for the year is 3,433,549 tons, of which 2,689,282 tons were coal and 734,400 tons coke. These figures embrace all the coal carried over the road, east and west. The amount of coal on hand at Perth Amboy September 21st was 78,866 tons, to which was added by receipts during the week to the 28th instant 6,484 tons, making a tonnage to that date of 85,350 tons. The shipments during the week to the 28th were 13,718 tons, leaving of stock on hand of 71,632 tons, against 65.379 tons to corresponding date last year.—*Phila. Ledger, Sept.* 30.

Virginia Midland Railroad.

In the Circuit Court at Alexandria, Va., on the 24th ult., in the case of Graham vs. the Virginia Midland Railroad Company, Judge Keith decided:

1. That the claims of employes and parties furnishing supplies do not take priority over the mortgaged debt. The judge declared his sympathy to be with the claimants, but the law being so well established against them, he would not subject himself to a reversal, or them to costs by a decision in their favor.

2. Six per centum interest to be allowed on past due and funded coupons.

3. The first mortgage of the Orange, Alexandria and Manassas Railroad Company takes priority as to the Manassas Gap Railroad, from Manassas to Harrisonburg, over the previous mortgages of the Orange and Alexandria Railroad. In other words, that the road from Manassas to Harrisonburg was not "after-acquired property" of the Orange and Alexandria Railroad Company by reason of the consolidation under the act of Assembly creating the Orange, Alexandria and Manassas Railroad Company, and did not, therefore, pass under the mortgages of the Orange and Alexandria Railroad made previous to the consolidation.

4. The executions against the Virginia Midland Railroad Company which had been issued and the liens of which had attached at the time said road passed into the hands of the receiver were liens on any funds of the company then in hand, and if said funds have been since otherwise appropriated they must be now replaced out of the receipts and applied to the discharge of said executions.

5, The claim of Adams, Hamner & Co. for extra compensation is rejected, on the ground that it had been released by the act of the claimants when they assigned all their demands against said company to the Baltimore and Ohio Railroad Company.

6. As to the claim of the Baltimore and Ohio Railroad Company to be subrogated to the right of the State of Virginia, under the third mortgage, the court took further time to consider.

Last fall Messrs. Faunce & Rogers, who were judgment creditors of the Alexandria and Fredericksburg Railway Company, filed suggestions against Receiver Barbour, of the Virginia Midland road, claiming that he had funds of the Alexandria and Fredericksburg road in his hands liable to the lien of the executions on their respective judgments. Judge Keith also disposed of this case yesterday by deciding that the road from Alexandria to Washington was not embraced by the deed of trust upon the road executed in 1866, the road not having at the time of its execution power to build it, and therefore it did not pass under the deed as after-acquired property.

Traveling by Rail.

Many people still entertain the impression that riding on the cars on our railroads is more dangerous than any other mode of conveyance. When an accident happens, as will sometimes be the case, there are many who are ready in unmeasured terms to pronounce railroad travel as extremely dangerous, and all connected with their management as reckless. The fact is that such accidents are far less frequent than most people suppose, and cases of carelessness on the part of the management quite as rare as those in any other department. When an accident does take place it is published in all the papers of the land, and the account is read over and over again, leaving, often, an impression that several accidents have occurred instead of one. The truth is that there is no mode of travel more faithfully watched over and more free from accidents than by rail. This is so to an extent that will astonish most people. As a proof of this we will give some facts and illustrations drawn from and founded upon the last report of the Railroad Commissioners to our State Legislature. In this report the number and particulars of all accidents during the preceding year are given. We wish now to consider the extent of accidents as relating to passengers, and not relating to those injured or killed by the cars while carelessly walking upon or crossing the track.

During the year 1877, of all the passengers on all the railroads belonging to or passing through Connecticut, only one is reported as killed, and that one was on the New York, Providence and Boston Railroad, alluded to as follows: "February 12, 1877, John Conlin, aged about twenty-one years, was found on the track near the bridge west of Stonington. He took the mail train west bound at the junction, and it is supposed walked off the train."

In the above we find a statement of the only accident to a passenger on all the roads of the State during the year 1877. A truly wonderful record—speaking in the strongest mode of the safety of railroads, and of their excellent and careful management. But that we may fully realize the marvelous freedom from accident, let us take a few facts and draw from them one or two illustrations.

From the tables in the report we learn that the number of passengers during the entire year was equivalent to about 4,254,025 for a distance on the average, of 50 miles, or 212,700,799 for one mile. Let us now, in order to give some idea of the immense amount of travel, and of the great degree of safety attending the same, give an illustration based on the supposition that the average distance traveled was 50 miles to a passenger. We will convey them in the old style stage coach and place 10 in each coach. It will require 425,401 coaches and 1,701,604 horses (or four times as many, counting a change for every 12½ miles), and 425,401 drivers. If we place these coaches in a line—allowing 80 feet space to each—the line will extend 2,417 miles, and at an average rate of eight miles per hour the line of coaches will be about 13 days in passing a given point. Now is there any reason to suppose that this large number would pass over fifty miles of road with only a single accident? But the facts above given constitute the strongest possible testimony in favor of the excellent management of our railroads. Badly managed or neglected, they would prove prolific slayers of men, women and children. Their safety depends entirely upon the knowledge, good judgment and watchful care of all concerned—from the superintendent down to the lowest employe. A single mistake in judgment, a slight neglect of some duty, or a trifling delay in its performance, may result in accident or death to hundreds of passengers and in the loss of millions of dollars of property.—*Hartford (Conn.) Courant.*

Canal Expenditures.

The following is a comparison of the expenditures on the canals for the six months ending August 1, 1877 and 1878:

	1878.	1877.
Erie Canal	$110.871 40	$207,041 38
Champlain Canal	25,811 57	61,184 22
Oswego Canal	10,333 82	18 342 74
Black River	12,184 11	18,526 80
Genesee Valley	$12,845 49	22,018 30
Cayuga and Seneca	4,458 83	$6,508 16
Chenango Canal	784 04	1,868 70
Chemung Canal	2,713 56	6,190 08
Eastern division	75,616 50	170,224 09
Middle division	49 032 15	71,821 49
Western division	54,804 17	99,585 10
Totals	$179,452 82	$341,630 68
Amount of expenditures by superintendents of repairs, February 1 to Augnst 1, 1877		$341,630 68
Amount expended by Canal Commissioners same period		13,923 12
Total		$355,553 80
Amount expended by superintendents of repairs, Feb. 1 to Aug. 1, 1878		$179,452 82
Amount of expenditure by Superintendent of Public Works, same period		17,597 24
Amount of salaries and traveling expenses of Superintendent of Public Works and assistants, same period.		8,710 12
Total		$205,760 18
Decrease in 1878, $1[illegible],793 62.		

Madeira and Mamore Railroad.

The Philadelphia Record says that J. Howard Hiestand, Harry B. Kinport, J. B. Brown, Eli Slifer, Jr., and R. B. Evans, who have just returned from San Antonio, Brazil, where they have been engaged since February last in the construction of the Madeira and Mamore Railroad, report the enterprise of the Messrs. Collins as being at the present time in a flourishing condition. About ten miles of the road have been graded and three miles of this distance are now completed. The engineer corps have surveyed about seventy miles of the road and are pushing rapidly forward. These gentlemen speak confidently of the completion of the road at the expiration of three years from the date of of the contract and say that the most difficult part of the work has been completed.

☞ A new arrangement has gone into effect by which the consolidated management of the Allegheny Valley and Pittsburgh, Titusville and Buffalo Railroads no longer exists, Mr. McCargo relinquishing the superintendency of the latter road to his former assistant, Mr. J. C. Hepburn, who will have his offices at Oil City.

St. Louis, Iron Mountain and Southern R. R.

In the suit of the Union Trust Company, of New York, and Baring Brothers, of England, represented by Ward Brothers, of New York, against the St. Louis, Iron Mountain and Southern Railroad Company to foreclose certain consolidated mortgage bonds on the ground of default of payment of interest, Judge Dillon, of the United States Circuit Court has rendered a decision denying the foreclosure, but not dismissing the bill. Judge Treat dissented, giving the opinion that the bill should be dismissed. A division of the opinion will be certified to the Supreme Court. Meanwhile, the case will stand for further hearing or be referred to a Master in Chancery.

Northern Pacific Railroad.

The gross earnings, operating expenses and net earnings of this road for the year ending August 31, 1878, were as follows:

Evils of Railroad Receiverships.

Judge Baxter, of the United States Court, Cincinnati, in passing upon an application to allow a railroad in the hands of a Receiver to be garnisheed, took occasion to remark that the practice of placing railroads in the hands of Receivers is altogether too common, and has become a great evil. He cited the case of a railroad in Georgia which cost $15,000,000. The Receiver in charge in three years issued certificates of indebtedness amounting to $1,500,000, when the road was sold, the proceeds not being sufficient to pay the certificates. In another case, in Detroit, the road cost over $8,000,000. When the road came to be sold, eminent counsel requested the Judges to fix a minimum price for the sale, suggesting such price should be a sum sufficient to cover the charges of the Receiver and his lawyer. Judge Baxter said he had observed that when a Receiver got possession he generally ran the road for the benefit of himself and his employes, including the attorneys, and he [the Judge] would hereafter see there should be a reform, in his circuit for the benefit of creditors and stockholders. If proceedings to sell and realize were not pushed to a conclusion, he would vacate the Receivership and give the road back to the company. Great interest is manifested by railroad people in this address.

☞ The Boston Journal says that the Cincinnati, Sandusky and Cleveland Railroad Company "has now funded six coupons, or three years interest, of its second mortgage Bonds, three coupons of which are past due, and are applying the earnings of the road to the payment of the floating debt, which was $440,000, which will be reduced by this means to $280,000, which will be further reduced or paid by sales of assets and by increased earnings. The earnings increased about $80,000 from January 1 to August 15, and are now increasing about $1000 per week, with chances of a larger increase from the autumn traffic. The

managers are confident that they will be enabled to pay the interest on all the indebtedness in the future, and will soon be clear of all floating incumbrances."

☞ At a general meeting of bondholders of the California and Oregon Railroad, held in Frankfort, Germany, at which bonds amounting to $2,811,100 were represented, a resolution was adopted, by a large majority, approving proposals of the committee for acquiring and completing the Oregon Central Railroad, and accepting the financial propositions connected therewith.

☞ The subscription under circular No. 44, for the Leadville extension of the Atchison, Topeka and Santa Fe Railroad, amounts to $2,378,500, which is $978,500 in excess of the sum required.

☞ A cable dispatch from London says the directors of the Great Western Railway of Canada announce that after paying interest on terminable bonds and debenture stock there will be no balance remaining for dividends on preferred stock.

Wilmington, Del.

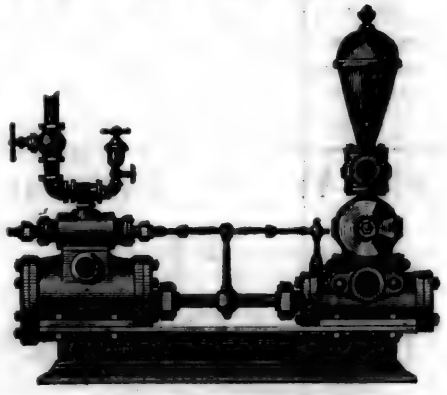
RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
93 Nassau Street,
NEW YORK.

LENG & OGDEN,
IRON & STEEL
MERCHANTS,
4 Fletcher and 212 Pearl Streets,
NEW YORK.
GENERAL AGENTS FOR

Lansdell & Leng's Lever and Cam Valves, for water, steam, gas, etc.
The Steam Water Station Company's Lansdell's Patent Steam Syphon Pumps.
Credenda Steel Gun Barrels, Moulds, etc.
Patent Weldless Cold Drawn Steel Tube Company.
Marsh Brothers & Co.'s Cast Steel, German Steel, Machinery Steel, Files, etc.



THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address

G. F. THOMAS, 549 & 551 Broadway, New York.

STEAM PUMPS.

IMPROVED NIAGARA STEAM PUMP.

Marine Steam Engines. Stationary Steam Engines Marine and Stationary Boilers. Hydraulic Elevators for Buildings. Pulleys, Shafting and Hangers a specialty.

Too Much Railroad Legislation.

It has been asserted by an eminent English jurist that the most benificent laws passed by the Parliament of Britain during the past fifty years have been the repealing statutes. The same might almost be said of New York and many other States. There is a tendency to accumulate and encumber the rolls with a great number of statutes, whose very multiplicity serves to keep the process of making more agoing, and to employ ten lawyers in attending to suits where one might otherwise suffice. Simplicity and uniformity are no less wholesome in legislation than in other business of mankind.

Within a few years there has been a growing disposition to excessive legislation on special subjects, and on subjects where legislation is entirely out of place. For flagrant examples we need but to look at the present clamor on the part of discontented, unfortunate and unthinking persons to have the national government assume more than autocratic, impossible, functions in the attempt to create money by enactment, in the effort to enrich those who are improvident or lazy; in the proposition to fix the prices of labor and at the same time lessen the hours of a day's work. To some simple, ignorant minds there is a specific power of incantation, a necromantic charm, in the words: "Be it enacted, etc.," which will enable one, temporarily at least, to evade, or overturn, the natural laws.

Of this kind are the laws which the agrarians and demagogues have invented for establishing justice, or settling disputes, between the great common carriers of the country and their patrons, the public, notwithstanding the constitution has appointed Courts of Justice, the best of all umpires, for the same purposes. Several Western States have undertaken to regulate the charges for railroad transportation, and to prescribe rules for doing railroad business. The effort broke down in Wisconsin, Minnesota and Iowa, as might have been foreseen. Nevertheless, unwarned by the experience, Congress has been appealed to, to attempt the same sort of thing in regard to about forty other railroad companies, which have received aid in lands, or bonds, from the United States. The precise object, for public purposes, is not plain; and the only intelligible purpose of this legislation is to enable some ambitious politician to cater to this envious, thievish spirit on the part of the communistic classes.

There is at the same time clamor that Congress should take hold of, and assume authority over, the railroad system of the country, regulate rates of carriage, and redress all sorts of grievances, real, or imaginary; as if Congress had not about as much on its hands in the finances, and purely administrative government as it is able to attend to. There is, it is safe to say, nobody, in this country, outside of a lunatic asylum, who would be willing to entrust the conduct of his private business to a body of men composed as is our Congress; certainly no great financial institution would be willing to *trust* its property and management to the body we contrive to select to make laws for the whole country—yet it is actually expected that the same body, in its brief intervals of leisure, might be able to work out the complicated and wonderful machinery of railroad transportation better than its owners and managers do!

The broad truth may as well be stated; that the less political bodies, Legislatures of States, as well as the National Congress, have to do with railroads the better, both for the public, the railroads, and the legislators. The recent efforts of the politicians with the finances shows that they can, and do, injure any business matter they meddle with. For these reasons we say: let railroads alone. Most of the States have happily adopted general railway laws—that is, a policy of freedom to build. Now let the nation at large do the same. In fact, it has done so already as to the Territories, and that is all that is necessary, in that direction. The land grants made to railroads heretofore are mostly lapsed. No more should be granted; neither should any loans of credit.

Keep railroads out of politics, just as much as navigation, agriculture, mechanics, or merchandizing. If the Government goes into a supervision of old railroads, or into subsidizing new ones, it will lead to one of two things: Either the agents of the Government will extort money from the railroads by persecution, or they will be corrupted—this is the teaching of history—and in either case the public are no better off. The lawyers may be enabled to get more fat fees, but this will not help those who use the roads. They will be the losers, rather than gainers. Mutual interest or natural competition are the great remedies for transportation grievances, legislation can only make them worse.

The Age of Steel.

We are now entering upon the Age of Steel. Twenty years ago we thought we were then just entering upon the Age of Iron. But already iron is going and steel coming. The rapid progress of our world of to-day scarcely gives us time to consider how we may adapt ourselves to the coming change before it is upon us.

Of all the great modern industries the manufacture of Bessemer steel has been the most rapid and astonishing in its growth. Not twenty years ago we were earnestly hoping for the time when our own rail-mills would be able to make iron enough for the demands of our railroads. We had been paying the foreign manufacturers until the tax was burdensome. Suddenly came the Bessemer process and the situation was changed as if by magic. Of the 2,000,000 tons of Besse-

ther steel now produced in the world we are making more than one quarter, or 525,000 tons. We are making of Bessemer steel two-thirds as much as Great Britain; more than twice as much as Germany, and a little more than both Germany and France. And this is only the beginning. As yet we have not had time to look about us to see fully to what uses we may put the new steel profitably. Thus far but a single purpose, railroad bars, has been well or extensively carried out. Almost the entire product of the steel converters up to this time has been for railroad uses.

The future is to show the multitudinous uses to which Bessemer steel may be applied with advantage. But the present is telling with disastrous effect on the iron furnaces and forges. The effect will be in the end, we predict as in the case of other modern discoveries, not such a radical substitution of steel for iron as has been the case so far, but a partial substitution, with a manifold increase of uses for which steel has heretofore been too costly.

Bessemer steel does not materially conflict with the uses of cast or refined steel; its peculiar field of usefulness is that heretofore occupied by wrought iron. Having hardness and ductility, and a tensile strength far in excess of iron, whilst not much exceeding the latter metal in cost, it is easy to see a reason for its substitution.

The later processes by which Bessemer steel is made directly from the ore is another step towards cheapening its cost and increasing its usefulness. What science will do in the matter of refining Bessemer steel so as to fit it for cutlery and the finer arts for which it is now unfit time alone can show.

While so many furnaces are idle or nearly so the reports from the steel mills have been for weeks past unvaried—full employment with orders ahead. This shows plainly enough that we are entering upon an Age of Steel.

Underground Telegraph Wires.

It is well known that the City Councils of Philadelphia have ordered the removal of telegraph poles from the streets of that city, and that experiments have been making to produce a wire that could be laid under ground and worked satisfactorily. The McKeesport, Penn., Times gives an account of some interesting experiments recently made at the Tube Works, in manufacturing "insulated wire," the process having been patented. The company owning the patent was represented by Mr. Allberger, and the tests made have been very satisfactory. The wire is now being made in sections of 10 feet, but it can be made as long as 13 feet. In making the wire a copper telegraph wire is inserted in a glass tube of the same length, and sufficiently large to admit the wire easily. The glass tube is then inserted in an iron tube, just large enough to admit the glass tube. They are all then placed in the furnace and heated to a red heat and then run through the rolls, compressing copper wire, glass and iron tubes all into one mass, but without crushing them of course. The ends are then ground to a convex surface and the ten feet sections coupled together like gas pipe, the convex ends, of course, allowing the centers to strike first, establishing the electric connection. The pipe will be enameled before being laid, so that when once put down it will last forever. The Tube Works Company will manufacture two miles of the pipe to begin with, and should all expectations be realized, hundreds of miles will be required in the near future. Ad. S. Matheson has been superintending the experiment at the National Tube Works.

Texas and Pacific Railway.

We gave in our issue of the 14th ult. an abstract of the report of this company for the fiscal year ending May 31, 1878, including the general balance sheet. The following, from the same report, relates to the land department of the road:

Your company has become entitled, under grants from the State of Texas, to 8,083.25 sections of land of 640 acres each, in all, 4,716,342 acres of land; and title to 211½ sections, or 135,360 additional acres will, it is believed, ultimately vest in your company, making a total of 4,851,702 acres of land owned by your company. In addition to the above, 1000 certificates, (640,000 acres) earned by the company, have been transferred to the Fidelity Insurance, Trust, and Safe Deposit Company, of Philadelphia, in trust, under an agreement between your company, and certain parties, representatives of a foreign interest claiming a lien upon a portion of the 16 mile reservation, a clear title to which has been perfected under an agreement that was first authorised, and subsequently approved under a formal decree, and order of the U. S. Court. A portion of these lands, about 80,000 acres, will, it is believed, during the current year, be reconveyed to your company.

The following lands have been located and surveyed by your company, and proper maps and field notes filed in the State Land Office at Austin; and certificates or patents have been issued by the State, vesting title in your company.

County.	Acres.	County.	Acres.
Callahan	82,958	Taylor	46,562
Jones	18,891	Dimmit	16,000
Edwards	10,500	Crocket	5,500
Hall	60,982	Briscoe	38,847
Floyd	3,440	Motley	26,011
Childress	26,880	Nolan	68,708
Fisher	24,258	Stonewall	6,260
Mitchell	147,243	Scurry	5,106
Kent	1,965	Howard	228,261
Borden	173,609	Martin	200,832
Dawson	107,776	Andrews	42 693
Tom Green	1,116,852	Pecos	339,765
Presidio	224,640	El Paso	17,920
Bowie	23,977	Tarrant	5,160
Red River	6,456	Van Zandt	1,710
Lamar	887	Rains	2,452
Fannin	772	Parker	9,892
Denton	6 076	Jack	1,280
Collin	275	Palo Pinto	2,388
Wise	7,176	Stephens	18,486
		Total	3,074 378

There are in the State Land office, subject to the order of your company, 2,542 26-88 certificates for 1,627,073 acres, that have a prior right of location within the limits of the reservation until 1880. Your company has also in its office for location, 20 51-640 certificates for 12,851 acres; and there are unlocated balances, which can be had when patents issue, covering 2,480 acres, which accounts for all of the 4,851,702 acres.

Of the 3,074,378 of located lands, 36,529 acres are situated east of Fort Worth, and 148,801 acres are in counties between Fort Worth and the 100th meridian; and 2,889,048 acres are west of the 100th meridian.

Of the 36,529 acres situated along your present completed road, 34,595 acres are timber lands, situate in the counties of Bowie, Red River, Rains and Vanzandt.

It will be observed that a large proportion of your company's lands lie west of the 100th meridian. The country between Fort Worth and the 100th meridian is rapidly settling up, and your lands in that vicinity are now being sought for, and are rapidly increasing in value. The low price at which State and other lands are offered, will retard sales somewhat, but as such lands are generally taken up by actual settlers, your company is indirectly benefitted by their sale.

The policy of your company, working through its land department, has been to secure immigration into this section of the State; and during the year it has sent out nearly 100,000 maps and circulars to the address of parties making application for information. It has also distributed county maps containing a description of State and other lands, for sale, and valuable information as to the manner of acquiring title to them.

Arrangements are now being made to locate the 2,542 certificates now in the land office. The holders of these certificates have a prior right of location over all other certificates—anywhere within the limits of the company's reservation—at any time previous to January, 1880. East of the Pecos river most of the lands available for agricultural purposes, and for timber, have been already located.

It has not been the policy of your company to locate mineral or grazing lands, as it would seem to be neither for the interest of the State, nor your own, that such lands should be located in alternate sections, but that they should be left free for use as ranges for cattle, and for location by miners and others prospecting for minerals.

Very few of your lands have been sold, and none were in a proper condition to offer for sale until quite recently—during the last half of the fiscal year just closed.

The following statement will show the receipts for the year from land sales:

	Cash.	Bills receivable.	Total.
From sales on "Texas Land sales acc't" of 4,292.58 acres at an average of $2 76 per acre	$8,248 29	$3,609 71	$11,858 00
From sales on "donated lands and town lot sales account."	9,999 55	1,608 23	11,607 78
Collections on bills receivable taken on sales made prior to May 31st, 1877 (donated lands and Texas land sales account).	2,259 39	....	2,259 39
Total	$20,507 23	$5 217 94	$25,725 17

There has been received during the year, at par, on account of lands sold, income land grant bonds, with interest, to the extent of $4,474 04.

The expenditures of the land department have been as follows:

	For fiscal year ending May 31, 1878.	Total since organization.
Cost of surveying lands and preparing records for district and State land offices	$4,838 88	$168,524 87
Cost of certificates, patents and other expenditures incidental to State land office	5,081 15	87,898 03
General expenses, including salaries, stationery, circulars, advertising, cost of preparing maps, etc.	15,500 02	52,693 98
Commission to agents on "Texas sales account"	266 16	....
	$25.686 15	$259,116 88

The coal lands west of Fort Worth—situated along the Brazos river and its tributaries—are beginning to attract attention. A party of experts have recently made a careful examination of these coal fields extending through Parker, Young, Palo-Pinto, Stevenson and Throckmor-

ton counties, and they report well defined veins, of a thickness of from three feet six inches to five feet six inches.

A three foot six inch vein has been located within twenty-five miles of Weatherford; and upon the Albert Sidney Johnson survey, in the valley of the Clear fork of the Brazos, seventy miles west of Weatherford, a five feet six inch vein of coal was found. The quality of coal is excellent for steam purposes, and improves going west; it is inexhaustible in quantity, and it is claimed fully equals the Pittsburgh coal—containing less bitumen and more carbon.

The report of these gentlemen confirms previous explorations as to quantity, quality, and value of the coal deposits along your line of road.

Your company has a number of sections of land in the immediate vicinity of these coal discoveries, which it has reserved from sale for the use of the company, on account of their location in the coal fields.

Coal, Iron and Oil.

Mr. John Pechar, of Teplitz, Germany, prepared for the Paris Exhibition a statement of the coal mined in the world, from which is condensed the following figures, giving the estimated total production of coal for the year 1876 throughout the world:

	Pounds.	Tons.	Per ct.
Great Britain..	298,958,587,850	149,476,769	47.4
United States.	106,588,919,618	53,294,460	16.9
Germany	106,588,919,618	53,294,460	16.9
France	37 211,516,314	18,605,758	5.9
Belgium	31,585,183,317	15,767,591	5.0
Austro-Hungary	29,643,072,318	14,821,536	4 7
All of Asia....	9,174,480,000	4,587,240	1.5
Rest of the World	11,008,037,327	5,504,019	1.7
Total.....	630,703,666,352	315,351,833	100.0

[We reckon by the American ton of 2,000 lbs., though at the mines, and in large dealings here, a ton of coal is 2,240 lbs., the same as everywhere and for everything in Great Britain. The metric ton in France is 2,204 lbs.]

It will be noted that nearly half (47.4 per cent) is mined in Great Britain; that the United States and Germany are each credited with the same amount, about one-sixth; that Belgium nearly equals France, and yields more than three times as much as all of Asia. The annual product for all the world is about 500 lbs. for each inhabitant. For the United States, it is 2,422 lbs. for each of forty-four million inhabitants.

The iron product of the world, for 1876, is given by Mr. Pechar as 31,571,460,276 lbs., or 15,785,730 tons of 2,000 lbs. The coal mined is about twenty times the weight of pig iron produced. The ratio of production in the leading iron producing countries is nearly as follows: Great Britain, 46⅕; United States, 17; Germany, 3⅕; France, 10 1-5; Belgium, 8 2-5; Russia, 8; Austro-Hungary, 2 4-5; Sweden, 2⅕. The iron product of the United States for 1876 (5,380,719,707 pounds), or about 125 pounds for every inhabitant.

Of Bessemer Steel the product for 1876 is stated at 4,646,873,336 pounds, or 2,323,436 tons, of which one-fourth was made in the United States, a little over one-third in Great Britain, not quite one-fifth in Germany, and one-tenth in France. The total steel made in 1876 would lay 22,116 miles of railway track, allowing 20 pounds to the foot of rail. The present rate of production would put steel rails upon all the railways in the world in less than ten years.

Twenty years ago petroleum oil was little known. The first artificial well was sunk in August, 1859, we believe. Now there is an annual production in this country of about 15,000,000 barrels, and more than sixty million dollars' worth are exported to other countries annually—our exports ranging in importance, according to value, 1st cotton; 2d flour and grain; 3d, hog products (lard, hams, and salt pork); and 4th, petroleum. There are more than ten thousand oil wells flowing or being sunk, and probably over one hundred millions of dollars invested in the business in one way and another. Fifteen million barrels, (forty gallons to a barrel) of this earth-yielded oil, would fill 9,600,000,000 lamps, holding half a pint each, or about seven such lamps for every man, woman and child on our globe. If these lamps were equally distributed, so that every four persons could have one, and allow half a pint of oil to burn three evenings on an average (short nights included), the fifteen million barrels of oil would light up the whole human race for a period of three months, or a fourth of the population of the globe for a whole year! All this has come to light, from the bowels of the earth in less than twenty years, during which time we have not only used all the petroleum we have wanted ourselves, but have sent to other lands nearly five hundred million dollars' worth, at the low Custom-house valuation. What other stores of light and of comfort, lie yet undiscovered in this wonderful world of ours?—*Miners' Journal.*

☞ A company of which Isaac D. Barton will be the President is being formed for the purpose of building a narrow gauge railroad from East New York to Babylon, L. I., and engineers will shortly commence surveying for the new line. No bonds will be issued. The route from East New York will be up Atlantic avenue to Woodhaven and Jamaica. From Jamaica the road will run parallel with and south of the Southern Railroad, hugging the ocean from Jamaica Bay to Babylon. It will be 39 miles long. It is proposed to have the road ready for travel by June 1, 1879.

☞ Judge Dillon of the United States Circuit Court of St. Louis, having further heard the case of the Union Trust Company of New York against the St. Louis, Iron Mountain and Southern Railway, entered decrees that the defendant is in default of the interest on consolidated mortgage bonds due on the first of April, 1877, and that the complainant is entitled to recover the amount thereof.

☞ The Continental Telegraph Company have opened seven offices for business between this City and Philadelphia. The principal office is at No. 8 Broad street. The others are at No. 96 Wall, No. 133 Pearl, No. 86 Beaver, Fulton Market, No. 143 West, and No. 71 Worth. The rates are the same as those of the Western Union Company.

☞ The directors of the Concord and Portsmouth Railroad Company, elected on the 3d inst., are: Stephen Kendrick of Franklin, Samuel N. Bell, Benjamin F. Martin and Nathan Parker of Manchester, Joseph B. Walker of Concord, John J. Pickering of Portsmouth and John J. Bell of Exeter. Stephen Kendrick was chosen President and W. H. Hackett of Portsmouth Clerk.

☞ Iron has been laid on the Shenandoah Valley Railroad to the Clarke line. Nearly the entire portion of the road upon which the track is laid has been ballasted, and the work at the crossing of the Main Stem of the Baltimore and Ohio Railroad, near Duffield's depot, is nearly ready for the iron and track-laying towards Shepherdstown.

☞ Contracts have been awarded to two Pittsburgh companies for material for the Cincinnati Southern Railway, one for 35 iron bridges and trestles to the Keystone Bridge Company, the other for about 8,000 tons of steel rails to the Edgar Thomson Steel Company.

Railroad Accounts.

The Auditor of Railroad Accounts at Washington has prepared a list of 19 blank forms, which are being forwarded to the various railroad companies placed under his supervision by the act of June 19, 1878, and which the officers of the several companies are required to fill up and return to the Auditor. In the reports presented on these blanks the railroad companies must show monthly the financial condition of their respective roads, the amount of revenue derived from all sources, the number of through and way passengers and tons carried, a statement of the expenses of the transportation of passengers and freight, and the amount paid for salaries and incidental expenses, the amount expended for interest on funded and floating debt, premiums, exchange, taxes, &c., new construction and equipments, improvements, &c. In addition to these monthly reports, a number of semi-annual reports are required. These must contain itemized statements of the number and class of officers and employes, and their average monthly pay; names and residences of stockholders, and number of shares held by each; a statement of the funded debt and sinking funds by classes, giving the amount of the principal issued and outstanding and interest paid; a statement of the capital stock, giving the number of shares authorized, subscribed for, and paid for in cash or otherwise; the quantity of lands acquired and disposed of; a list of stocks and bonds of other railroads and corporations, giving the cost of the same and how paid for, and a number of others, covering every branch and department of the business and operations of the roads.

☞ Justice Harlan, holding the United States Circuit Court at Chicago, has decided in the Indianapolis, Bloomington and Western Railway case that the statutes of Indiana and Illinois as to the right of redemption did not embrace railroad mortgages, and that the original decree of sale of the railroad should stand. In the case of the Fort Wayne, Jackson and Saganaw Railroad he overruled the motion of the trustees to be put in possession under that clause of the deed of trust which gave them the right to possession upon default in meeting interest.

☞ At an adjourned meeting of the stockholders of the Eastern Railroad Company, held in Boston on the 7th inst. to hear the report of the committee appointed at the meeting last week to count the vote taken on the ratification of certain new agreements with the Eastern Railroad of New Hampshire and the Portsmouth, Great Falls and Conway Railroad, the committee reported that 27,144 votes had been cast in favor of the ratification, 54 against and 8 blank. The leases were declared ratified and the meeting adjourned *sine die*.

☞ A hearing was commenced on the 7th inst. in the Rhode Island Supreme Court on a bill of equity instituted by certain stockholders of the Hartford, Providence and Fishkill Railroad Company vs. the New York and New England Railroad Company to determine who has the right to redeem the road from its mortgage encumbrances

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

[Asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."]

| | | |

☞ The earnings of the Central Railroad and Banking Company of Georgia for the year ended August 31, 1878, were $2,721,624 25, the expenses $1,598,314 38, and the net earnings $1,123,309 67. This is an increase of $281,821 22 over the net earnings in the previous year. The report suggests that it would not be prudent to declare a semi annual dividend of more than 2½ per cent, to be paid in December next. The dividends in the two previous periods were 2½ per cent.

☞ English engineers are already in Mesopotamia studying out the best location for a railroad in the Euphrates valley. The new line will probably cross the Euphrates at Racca, near Aleppo, and will be continued along the left bank of the river as far as Anbar, and thence to Bagdad on the Tigris.

Statement of the Public Debt of the United States, October 1, 1878.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.
5 per cent. bonds, 1858	$250,000 00	$3,250 00

Decrease of debt since June 30, 1878	9,878,345 84

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$388,276 80
Kansas Pacific bonds, 1862-64	6,303,000 00	94,545 00
Union Pacific bonds, 1862-64	27,236,512 00	408,547 68
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	24,000 00
Western Pacific bonds, 1862-4	1,970,560 00	29,558 40
Sioux City and Pacific bonds, 1862-64	1,623,320 00	24,424 80
Totals	$64,623,512 00	$969,352 68

Interest paid by United States, $39,835,039 84; interest repaid by transportation of mails, &c., $10,279,181 35; balance of interest paid by United States, $29,555,858 51.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

* This amount includes $41,500,000 Five-twenty called Bonds not yet matured, against which a like amount of 4 per cent Bonds have been issued and are embraced in this statement, and the amount included in the coin balance.

☞ The gross receipts of the Grand Trunk Railway Company of Canada for the month of July, 1878, were £132,917, the working expenses £108,736, and the net profit £24,181; for the month of July, 1877, the receipts were £143,239 the expenses £113,614, and the net profit £29,625—showing a decrease in receipts of £10,872, in expenses of £4,878, and in net profit of £5,494.

☞ The contract for the completion of the grading, bridging and masonry of the Pittsburg, New Castle and Lake Erie Narrow Gauge Railroad ready for the rails from Zelienople to the ore regions, near Wurtemberg, a distance of 12 miles, has been awarded to Elias Zeigler, of Harmony, Penn., for $3,100 per mile—the work to be completed by the 1st of December next.

☞ The earnings of the Central Pacific Railroad for the month of September, 1878, were $1,881,000; and for the nine months ending September 30, 1878, $12,937,363, against $12,033,937 for the nine months ending September 30, 1877.

☞ The name of the Pittsburg, Ashtabula and Youngstown railroad has been changed to Ashtabula and Pittsburg railroad.

American Railroad Journal.

Saturday, October 12, 1878.

Financial and Commercial Affairs.

The business of the week has been only moderately active. A better feeling is being steadily developed as the season advances. Borrowers are more numerous and lenders make less complaint of utter stagnation. Money on call which has dragged through the summer months at two to three per cent now shows a strength not seen before and five per cent has not been rare. A stronger disposition appears daily to place idle funds in good securities that have not defaulted in dividends. Safety is considered first, the rate of interest is secondary. And here a word of advice to investors may be seasonable. Investors in stocks come from each of the three great social divisions, the rich who invest surplus incomes, rents and idle money; these can afford to take risks for the sake of large returns. The middle class of well to-do farmers and others who have abundance for all wants and a moderate surplus for their "heirs and assigns;" this class as a whole may also make investments for profit as well as security, since total loss may be repaired. The third class of poor workers, who have saved by the toil and sweat of years a few dollars, cannot have but one thought in investing their money—absolute security.

For the rich who desire to invest idle money the field is wide enough. Federal, State, and any of the lesser civic bonds, railroad, steamship, mining, manufacturing interests; any and all of these may be invested in now with, as a rule, a better prospect of fair returns than at any time since the revulsion of 1873. We say this on the

strength of successive good harvests and good agricultural returns; on a strong and healthy beat of the commercial pulse, and a slow but steady revival of business; all indicating future prosperity.

For investors of the middle class, people of moderate means, we commend local securities, State, county and city bonds, giving the preference in general to those "at home" with the investor. This class of securities has been somewhat neglected of late and without any good reason. With the exception of one or two Southern States that have been willfully and criminally dishonest in the matter of their obligations, we can commend State bonds as being to-day a better paying investment than any other on the list. The difference between the credit of a single State and the Federal Union is plainly represented by the difference in interest offered by each, the difference between six per cent and four per cent. The credit of a great State growing in wealth and population ought to be good always, and it is when its affairs are prudently managed. But the credit of the Federal Government ought to be better, since it bears virtually the endorsement of all the States. The citizen of any State knowing how its finances are administered, knowing the correct relation of its resources to it obligations, can always invest with safety ir its securities. The same is true of county and municipal bonds.

The last class of investors, the workers, are not largely subscribers or readers of the *Journal*; but their moral guardians, the Savings Banks officials, are. The law in this State and some others prescribes a limit for investment—not for the individual but the Savings Bank—and the limit is too broad. Only one single security is absolutely safe, without possibility of collusion or fraud on the part of officials, and that is the Federal bond. Real estate may be tricked and tampered with, either in fee simple or bond and mortgage, as we have seen in numbers of our broken Savings Banks. The Federal bond has an exact market value in all financial centres at home and abroad. The money to be invested here represents the toil and hardships of whole lives, the only hope of widows and orphans; the only question possible in honesty is: How can it be invested with absolute safety for the helpless owners? We say the Federal bond and none other.

On the Stock Exchange the volume of business has been less in amount than the previous week. The sales for Saturday were 131,000 shares; on Monday, 117,000; on Tuesday, 124,000, and Wednesday, 120,000.

The list of active stocks is still very limited. A few of the railroads show a falling off in earnings for September, which fact the bear interest is making a vigorous use of; but should October show an improvement the bulls will insist upon a general toss-up. Very many of the ups and downs of the market have no better basis than that given above.

"Charity covereth a multitude of sins" is a Bible maxim that Mr. John Kelly, Comptroller for New York city, can repeat with satisfaction. On Tuesday bids were opened for $6,900,000 of 5 per cent city bonds to replace an equal amount due November 1st. The entire amount was bid for by a syndicate composed of Messrs. August Belmont & Co.; Drexel, Morgan & Co., and Winslow, Lanier & Co., at 105.28. The taxpayers of New York ought to be grateful to that syndicate. If the syndicate find they have paid too much for the bonds they can keep them. At the same price for investment we must think Government 5 per cents the cheapest. The only point in this transaction which is really peculiar and noticeable is that the syndicate bid 3 per cent more than anybody else; which 3 per cent is a real charity to our overburdened taxpayers.

The subscriptions to the new Government 4 per cents have fallen off somewhat for the week as compared with last month. At private sale the new bonds were active at the close. We quote all issues as follows:

United States 6s, 1881, registered, 107¾@107⅞; do. coupon, 107¾@107⅞; 5-20s, 1865, new, registered, 103@103⅛; do. coupon, 103@103⅛; do. 1867, registered, 105⅜@105½; do. coupon, 105⅜@105½; do. 1868, registered, 107@107⅛; do. coupon, 107¼@107⅛; ten-forties, registered, 106@106⅛; do. coupon, 106@106⅛; 5 per cents, 1881, registered, 105¾@106⅞; do. coupon, 105¾@105⅞; 4½ per cents, 1891, registered, 103¼@103⅜; do. coupon, 103⅛@103¼; 4 per cents, 1907, reg., 100@100⅛; do. coupon, 99⅞@100⅛; sixes, currency, 119⅜@119⅝.

The City bank statement for the week shows a still further reduction in legal tenders and deposits, with an increase in loans and discounts. This is a more healthy showing, since it indicates an increase in business wants for money. The Money market may be quoted fairly active. Call loans which have been so long at the easy rate of 2@3 per cent on Tuesday touched 5 per cent, dropping back, however to 3@4 per cent. Discounts are not quotably higher than our last report. There is too great an abundance of money still for full employment, but lenders look brighter. The failure of the Bank of the City of Glasgow occurred after we went to press last week. The effect on the other side, as yet apparent, is not alarming, while it had no perceptible effect here by reason of our limited dealings with Glasgow and Scottish ports. The Bank of England still continues to gain in coin "on balance." So long as this continues the Bank's rate of interest will not probably be advanced; consequently money may be quoted at unchanged rates.

From Boston we have slight changes to report in financial affairs. The demand for money is now gradually absorbing surplus funds. The general business of the season compares favorably with the same time last year, and prospects for the late Fall trade are good.

Philadelphia advices indicate an active stock market. Pennsylvania Railroad shares sold from 83¼ to 84⅜, closing at 84. Reading Railroad was dull at 14⅛@14⅜. Money was in good demand but rates were unchanged. Call loans to strong names were made at 3@4 per cent. Commercial paper was in limited supply and good demand at 4½@5 per cent. Four months paper and longer dates ruled at 5@6 per cent. Loans on Governments were at 3¼@4 per cent. Loans on miscellaneous stocks at about 6 per cent.

Baltimore reports show a fair trade both in merchandise and produce. Sales are large both for distribution and export. Merchants are reported as carrying light stocks which they are duplicating by frequent orders. Money continues easy. Loans are made at 4@5 per cent. Discounts are quoted at 4½@6 per cent. Prime commercial paper continues scarce. Stocks are dull. Baltimore and Ohio Railroad, common stock showed a wide range between buyers and sellers; sales at 85@88. Scrip was offered at 89. Northern Central closed at 15@15½.

Sterling Exchange is dull and prices are again lower. The "board" prices were 4 80½ for 60 day bills, and 4 85 for demand, but the business was generally done at ⅛ cent below these rates. Commercial bills are in good supply at 4 77@4 79.

Gold has advanced to 100⅝@100¾, but the advance must be regarded as probably temporary. Silver in London is unchanged. Dealers in silver here say the stock of bar silver in that market does not exceed £50,000; but that is enough without a demand for it.

Domestic Produce continues active. Prices of low grade flours have suffered a decline, also wheat; but free exportation continues and the stock of breadstuffs is not accumulating at the ports. Exports for the week (exclusive of specie) have been $7,183,567 against $6,003,215 for the same time last year. Total exports since Jan. 1, 1878, $268,627,972 against $215,871,277 in 1877, and $203,844,391 in 1876.

Cotton has been somewhat irregular and quotations for spots and futures are lower. We now quote middling uplands at 10⅜ cents. Receipts at all the ports since September 1, are 458,645 bales against 201,042 for the same time last year. Consolidated stock at all the ports was on Tuesday, 8th instant, 255,523 bales.

Metals are still dull and not quotably changed since our last. Sales of 10,000 tons Steel rails are reported on private terms. Steel Rails here we quote at $44@$45.

Ocean freights are quiet and rates are not materially different from our last report. Grain to Liverpool, by steam, at 6⅛d. Cotton at 5-16d. Grain to London, by steam, 6⅛d.@6¼d. Cotton to Havre, by steam, ⅝c.@¾c. compressed. Grain to Marseilles, by sail, 5s. 6d. per quarter.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Union Pacific Railroad.

The following is a comparative statement of the earnings and expenses of the Union Pacific Railroad Company, including Missouri River Bridge, for the month of August,

	1877.	1878.
Earnings	$1,012,436 87	$1,123,826 98
Expenses	370,514 45	349,244 18
Net	$641,922 42	$774 582 80

—showing an increase in earnings of $111,390 11, with a decrease in expenses of $21,270 27—making an increase in net earnings of $132,660 38.

Grand Central Hotel.

Situated on Broadway, near 3d street, in the very heart of the business centre of New York. This magnificent hotel is unrivaled in the United States, it is conducted on the American plan, the fitting and furnishing is of the most elaborate design and finish and the bill of fare is everything the most fastidious epicure could desire.

☞ Judge Ames of the Supreme Judicial Court has issued an order of notice, returnable October 25, requiring the Eastern Railroad Company to appear and show cause why an injunction should not issue to prevent said company from guaranteeing the bonds of the Portsmouth, Great Falls and Conway Railroad Company, and paying the Eastern Railroad Company of New Hampshire $22,500 per annum, as prayed for a bill in equity filed by Briggs Mann and E. W. James, who are stockholders in said Eastern Railroad Company.

☞ During the month of September 7,489.60 acres of land were sold by the Illinois Central Railroad Company for $8,148 80. The cash collected on land contracts was $5,722 60. The traffic on the lines in Illinois was $485,698 against $607,712 62 in September, 1877 There was a decrease on the Iowa division of $79,707 64, making the total decrease in both States for the month $201,722 26.

☞ The earnings of the Atchison, Topeka and Santa Fe Railroad for September, 1878, (by telegraph) were $421,000; for September, 1877, (official) $281,444—increase, $139,586. Land sales: September, 1878, $100,000; do. September, 1877, $34,901—increase, $65,099. Total increase, $204,685.

☞ The earnings of the Chicago and Northwestern Railway for the first four months of the fiscal year (June 1 to September 30, 1878) were $4,922,879 71, against $4,954 378 54 for the corresponding period of the previous year, an increase of $81,498 88.

Narrow Gauge Railroads.

The following is an extract from an article in Scribner's Monthly on the transportation question, by Stephen D. Dillaye:

The railroads between the Mississippi Valley and the Atlantic, except the New York Central and portions of the Pennsylvania, have been built, equipped and are worked upon a theory which has been demonstrated to be unfit for freight transportation. The gauges all run four feet eight inches to five feet six and six feet. The war of the gauges has resulted in the victory of the narrow gauges. In the mountains of Wales, slate mines invited capital. Easy and cheap transportation were essential to profit. Thirteen miles separated Festiniog, the place of the mines, from Port Modoc, the seaport for shipping. The route was mountainous and difficult. Festiniog is 700 feet above Port Modoc. The route had to be scooped out of mountain sides, while ravines continually intercepted the way and had to be crossed by wall works and stone embankments. So crooked was the route, that its line was almost a continual repetition of the letter S. Its curves were so sharp that a moderately long train would be on three curves at the same time. These obstacles were in the way of cheap transportation. In 1839 a horse tramway was constructed with a two feet gauge and a sixteen pound rail, which in a few years was replaced by a thirty pound rail, and the track was adapted to steam engines. After eighteen years' use, the thirty pound rails were replaced by forty-eight pound rails. The original capital stock of the road was £86,000. The earnings expended in construction increased the capital to £36,000, making the cost $30,000 per mile. It pays 29½ per cent on its original and 12½ on its present capital. It is worked with the Fairlie engine, and is the most successful railway in England. This statement raises the question, Why is it that this narrow gauge road has always paid large dividends, when nearly every wide gauge in Great Britain has failed to pay?

SAVING IN CONSTRUCTION.

This cannot be accurately settled until the exact gauge is fixed and the route is established. Three feet or three feet six inches should be settled upon. With either of these gauges the saving will vary but little, if any, from forty per cent. Actual and varied experiences have established this conclusion. These experiences have resulted from works entered upon on the report of a committee appointed by various European, Asiatic and South American Governments to visit the Festiniog road, and examine its working capacity, feasibility and general utility. In July, 1870, this committee met. It was composed of the most experienced and thoroughly educated railroad engineers of Europe. They examined in detail the engines, cars, and every element of practical importance in their weight, construction, size, durability, etc., etc. The result was a unanimous concurrence in a report favorable to narrow gauges, and all the details so successfully demonstrated in the twenty years' experiment of the Festiniog road. Russia at once adopted the report of its Commission, and constructed the Imperial Livny Narrow Gauge road, which it has since operated with triumphant success. Its cost (it is a 3 ft. 6 inch track) was forty per cent less than four feet eight and a half inch gauge, through a corresponding country and grades. Uniformity of results has shown that the cost diminishes with the width of the track. In India, Australia, Norway, Canada, North Germany, and the United States, the cost has been as follows per mile: Australia, $32,000; India, $19,000; Norway, from $15,000 to $26,000; Canada, $14,000; Western States, $10,000 to $12,000; Tennessee, $11,500. The Railway Times estimates the cost in ordinary routes at $13,500, against $24,000 for four feet eight and a half inch gauge. The New York Tribune, after exhaustive examination, fixed the cost of a fully equipped single track at $16,400, as against $25,400 for four feet eight and a half. The Denver and Rio Grande narrow gauge cost $13,500, against $28,500 for a four feet eight and a half inches on like routes.

SAVING IN EQUIPMENT.

This cannot be actually settled until the gauge is settled and the route established. The committee of European Governments, before alluded to, examined every detail in the Festiniog road. The Russian, Indian, South American, Australian and North American roads have verified the conclusions there reached. The capacity of platform, gondola and box cars weighing 1,776 pounds, would average 18,200 of freight. The cost of platform cars, carrying for each wheel 8,150, would be $350, or $18 42 for each $1,000 pounds of capacity, and the capacity of freight to dead weight 1 to 2 8-10. The gondola would carry to each wheel 8,156; cost $385, or $21 89 for 1,000 pounds of capacity; proportion of dead weight 1 to 2 48-100. Box cars carrying to each wheel 8,800; cost $450 or $25 71 for each 1,000 pounds of capacity, with capacity as one is to two.

The Russian narrow gauge has demonstrated that a platform car weighing 1 ton, 1 800 pounds, will carry 5 tons, 1,900 pounds. An open car weighing one ton, 1,700 pounds, will carry 5 tons, 1,600 pounds. A closed car, weighing 2 tons, 100 pounds, will carry 5 tons, 900 pounds, so that in carrying 350 tons, 242 would be freight, and 108 dead weight. The difference in weight, capacity and cost, between eight-wheeled cars for a four feet eight inch and a three feet six inch gauge is as follows: Three feet—weight 8,800 pounds; capacity, 17,600; cost, $458. Four feet eight inches—weight 19,000; capacity in full 18,000; cost, $735. Platform three feet gauge—weight 6,250; capacity 18,000; cost, $350. For four feet eight and a half inches gauge—weight 18,000; capacity 18,000; cost, $575. For gondola three feet gauge—weight 7,250; capacity 18 000; cost, $385. For four feet eight and a half inches gauge weight 18,500; cost, $625. These estimates are taken from actual working weight on cars on the Pennsylvania road, as compared with the Denver and Rio Grande narrow gauge.

FREIGHT CARRYING POWER.

The saving in dead weight on the narrow gauge, in cars to carry 100 tons, is 103,000 pounds. The most expert and experienced engineers give the result as averaging on a three feet track, two and eight-tenths of paying freight to one ton of dead weight; and it is not contended that on a four feet eight inch track the capacity to carry freight is beyond the dead weight. This is the result of actual and prolonged experiments. The difference is demonstrated by the operations of two representative roads. On the London and Northwestern wide gauge a freight train, weighing with freight 250 tons, is made up of 50 tons of freight to 200 tons of dead weight. On the Imperial Livny Russian Narrow gauge, a train weighing 354 tons is made up of 260 tons of freight, and 94 tons of dead weight. To carry this 270 tons of freight, the wide gauge requires as an average 1,040 tons of carriages. As 94 tons is to 1,040, so is the difference between the two systems.

Actual statistics show, that the four feet eight inch gauge uses four tons of dead weight to carry one ton of freight. The fact is deduced from a report of Mr. Sweet, an eminent and well known engineer of New York, made up from the working tables of various prominent wide gauge roads. All freight carried on passenger roads—and nearly every road in the United has been constructed with special reference to passenger traffic—is carried at double the expense at which it could be carried on pure freight roads. I have shown that it can be carried on narrow gauge at one half the expense it can be carried on wide gauges.

DECREASED RUNNING EXPENSES.

A decrease of wear and tear results from decreased friction, decreased weight and decreased collisions. The wear and tear in rolling stock, and on the rails and roadbed is conceded to be in an exact ratio to the width between the rails and to the weight and speed with which trains are rolled over the track. On the basis I have shown, a four feet eight inch track would have to bear the friction of 50,000,000 tons, to 20,000,000 tons on a three feet track, to carry the same amount of freight. The ratio then is as 20 to 50, in favor of the narrow gauge. So, too, the wear and tear as the train is drawn faster than ten miles an hour, is increased in the exact ratio of the increase of speed.

The expenses of running a railroad are measured generally, first, by the cost of construction and equipment, and second, by the passengers and freight it carries. The cost of rolling stock between the three feet and four feet eight inch track is as 21 is to 32, and the structure as 20 is to 30. The capacity as 2.8 is to 1, so that the cost of running a narrow gauge would be less than one-half the cost of running a wide gauge.

Canal Receipts.

The tolls collected on all the canals of the State for the month of September, 1878, were $164,822 91, against $146,017 29 for the month of September, 1877, a gain during the month of $18,805 62. The following table will show the tolls for each month of the present year as compared with the same months of last year, the rate of tolls being the same each year:

	1877.	1878.
April		$56,672 86
May	$86,828 75	148,298 78
June	101,948 49	112,281 65
July	117,180 72	97,270 15
August	137,966 09	138,117 26
September	146,017 29	164,822 91
Totals	$589,921 84	$712,478 11

Showing an increase of $122,551 77 up to the present on the tolls of last year, when the total at the close of the season reached $680,896 42. This table is important, as it shows, if the increase continues during the next two months of navigation, when the canals will close that the receipts will easily reach $1,000,000 and the taxation for canal expenditures may be materially reduced.

☞ The immense yield of the silver mines in the new districts at Leadville, Colorado, has produced an extraordinary influx of miners and capitalists. The Denver and Rio Grande and the Atchison, Topeka and Santa Fe Companies are each vigorously pushing their Leadville extensions, both routes being located through the same canyons and valleys. It is believed the completion of the railroad will enormously increase the silver yield by rendering profitable a very large proportion of low grade ores now neglected on account of expensive transportation.

☞ An engine on the Northern Central Railway recently drew from Clark's Ferry to Sunbury, a distance of 31 miles, a train consisting of 183 empty cars, one loaded eight wheeler, two cabooses and a dead engine. It was up grade work, but the trip was made at the rate of ten miles an hour. The train was 6,200 feet long, or 620 feet more than a mile, and, it is claimed, was the longest ever drawn by a single engine.

☞ Thomas Marks has been elected President, W. A. Preston Vice President, and A. A. Clarke, Peter Boddy, D. Cameron, Peter Nicholson and J. P. Vigars directors of the Prince Arthur's Landing and Kaministiqua Railroad Company.

☞ From China we learn that the Viceroy of the Chihli provinces had arranged for the construction of a railroad between Tientsin and Kiku, and a telegraph was projected.

A GOOD PLAN

The most profitable plan for operating in stocks is that of uniting capital of various sums by combining or pooling the orders of thousands of customers and using them as *one mighty whole*, which has been done so successfully by Messrs. Lawrence & Co., Bankers, 57 Exchange Place, N. Y. City. By this co-operative system each investor is placed on an equal footing with the largest operator, and profits are divided *pro rata* among shareholders every 30 days. An investment of $10 would pay $50, making 5 per cent on the stock during the month. $25 would return $150, or 6 per cent; $100 would make $1,000, or 10 per cent., and so on, according to the market. *Frank Leslie's Illustrated Newspaper*, June 29th, says: The Combination method of operating in stocks is the most successful ever adopted." *New York Independent*, Sept. 12th, says: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." *Brooklyn Journal*, April 29th, says: "Our editor made a net profit of $101 25 on an investment of $20 in one of Messrs. Lawrence & Co.'s combinations. The firm's new circular (copyrighted and sent free) contains "Two unerring rules for success in stock operations," and explains everything. All kinds of Stock and Bonds wanted. New Government Loan supplied. Best references. Address *Lawrence & Co., Bankers and Brokers*, 57 Exchange Place, New York City."

The St. Gothard Tunnel.

The building of the Mont Cenis Tunnel through the Savoy Alps to France, and the Brenner Road to Austria, have made it absolutely necessary for Germany and Switzerland to choose between losing the commerce and travel of the South and building a mountain railroad and a series of tunnels that shall eclipse anything of the kind in the world. The world knows how they have chosen. The enterprise was too enormous for private undertaking or for private capital. In 1871, Italy, Germany, and Switzerland voted large subventions for the building of a road, to be commenced at once, running from the Lake of Lucerne, in Switzerland, to Lake Maggiore, in Italy, a distance of 108 miles. Twenty-one per cent or nearly 120,000 feet, of all this distance, was to be tunneled through mountains of granite. The total length of the main tunnel which enters the Alps at Goeschenen, in Switzerland, and emerges at Airolo, in Italy, is 48,936 feet. A number of the smaller tunnels, bringing the road up to the proper level in the Alps, exceed 7,000 feet. On the Lake of Lucerne, too, there will be important tunnels and galleries cut alongside of or under the celebrated Axenstrasse, high above the waters of the lake. At the time the international treaty for this great undertaking was signed it was believed that the work could be done for the sum of 187,060,000 francs. A company was organized, with 34,000,000 francs of stock, in £20 shares, and 68,000,000 francs of mortgage bonds. Italy presented the undertaking with 45,000,000 francs. Germany and Switzerland each gave 20,000,000 francs. The work, however, was not more than fairly under way when it was discovered that a mistake had been made in estimating the costs, and that, instead of 187,000,000 francs, 289,000,000 would be required to complete the work as at first proposed—a blunder in estimates of 102,000,000 francs. This blundering calculation threatened all sorts of bad results. The stock of the company ran down to a minimum, and hundreds of families were nearly ruined by the collapse. The bonds shared in the crash, and even the most ardent friends of the enterprise feared that the money which had been so lavishly given was buried under the mountains forever. It became a serious question whether the works would not have to be completely abandoned. There certainly was no choice, except to lose all that had been done, or to add many millions more to the subventions. The times were hard, financial crises were imminent everywhere, and war was raging on the Continent. Everybody was discouraged. Some of the little cantons of Switzerland, which would receive the most benefit from the completion of the tunnel, refused to lift a hand or spend another dollar. In the face of all opposition, however, the money has, at this writing, been almost raised. The three countries parties to the treaty have added largely to their subsidies, and the leading Swiss railways and cities have each voted sums proportioned to the advantages they hope to reap. The work goes on—in fact has never stopped. The contract for this enormous work is most interesting. It was granted to Mr. Louis Favre, of Geneva. By its terms Mr. Favre promises to deliver the works of the tunnel, completed, by the 1st of October, 1880 For each day the work may be done before that time the company agrees to pay him $1,000. On the other hand, however, the contractor is bound to pay handsomely for all delays. For each day in arrear of contract he forfeits $1,000. If delay continue six months, the forfeit is $2,000 per day; and should he be one year in arrear with his work, he surrenders the contract, and forfeits $1,600,000, which he, and his friends for him, have deposited with the company as security. On Jan. 1, 1877, the headings, or a sort of advanced gallery eight feet square pushed forward at the top of the tunnel, were half-way in. Whether the gigantic work can really be completed within the time specified is a grave question for Mr. Favre. Opinions differ, and even engineers can do little more than guess.—*Harper's Magazine.*

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending September 28, as reported by the several carrying companies, amounted to 214,734 tons, against 424,368 tons in corresponding week last year, a decrease of 209,634 tons. The total amount of anthracite mined for the year is 11,583 487 tons, against 14,161,762 tons for same period last year, a decrease of 2,528,275 tons. The quantity of bituminous coal sent to market for the week amounted to 76,125 tons, against 87,595 tons in corresponding week last year, a decrease of 11,470 tons. The total amount of bituminous mined for the year is 2,451,004 tons, against 2,439,970 tons for corresponding period last year, an increase of 11,034 tons. The total tonnage of all kinds of coal for the week is 290,859 tons, against 511,963 tons in corresponding week last year, a decrease of 221,104 tons, and the total tonnage for the coal year is 14,084,491 tons, against 16,601,732 tons to same date last year, a decrease of 2,517,241 tons. The product of the mines of the Cumberland coal region for the week ending September 28 was 43,560 tons, and for the year to that date 1,167 610 tons, an increase of 59,918 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 20,046 tons; for the year, 636,267 tons, an increase of 37,823 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 18,834 tons; for the year, 439,745 tons, an increase of 42,174 tons as compared with 1877. The shipments to the Pennsylvania Railroad, were, for the week, 4,680 tons; for the year 91,598 tons, a decrease of 20,079 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the fourth week in September was 106,889 tons, of which 87,950 tons were coal, and 18,939 tons coke. The total carried for the year is 3,540,549 tons, of which 2,777,282 tons were coal and 753,339 tons coke. These figures embrace all the coal carried over the road, east and west. The shipments of coal over the Reading Railroad for the five days of the week ending on the 5th inst. was 171,000 tons, of which 51,000 tons went to Port Richmond and 39,000 tons in the same time were shipped from thence. The amount of coal on hand at Perth Amboy September 28th was 70,260 tons, to which was added by receipts during the week to the 5th instant 15,515 tons, making a tonnage to that date of 85,775 tons. The shipments during the week to the 5th were 14,409 tons, leaving of stock on hand of 71,366 tons, against 74,895 tons to corresponding date last year.—*Phila. Ledger, Oct. 7.*

Imports of Dry Goods at New York.

The imports of foreign dry goods at New York for the month of September, were:

ENTERED FOR CONSUMPTION.

	1877.	1878.

☞ The injunction restraining the directors of the Nashua and Lowell Railroad Company from leasing its property to the Boston and Lowell Railroad Company, originally ordered by the United States District Court to hold till the 8th inst., has been continued to November 11th.

☞ A meeting was held at Yuma, Arizona, on the 8th inst. to organize the Southern Pacific Railroad, under the Territorial laws of Arizona, at which D. D. Colton, A. P. K. Safford, Charles Hudson, George Tyng and Charles F. Crocker were elected directors; D. D. Colton was elected President; A. P. K. Safford, Vice President; T. S. Douty, Treasurer and H. M. Wright, Secretary. Construction is to be begun at once.

☞ Justice Harlan, in the U. S. Circuit Court at Chicago, has decided in several cases involving the Tanner Brake patent, that under the statute of 1870 suits for infringements under the original terms must be brought within six years after the expiration of that term, and all suits for infringements under the extended term must be brought within six years after the expiration of that term.

☞ The directors of the Rhode Island and Massachusetts Railroad Company, recently elected, are: James P. Ray, Enoch G. Sweatt, James M. Freemen, George W. Wiggin, Joseph G. Ray, Edgar K. Ray, Ariel C. Whipp'e. The officers are: President, James P. Ray; Vice President, Edgar K. Ray; Treasurer, Joseph G. Ray; Clerk, George W. Wiggin.

☞ A firm of iron bridge builders at Phœnixville, Pa., are engaged in building six large bridges for the Quebec, Montreal, Ottawa and Occidental Railroad. They have also finished a bridge to span the Tombigbee river, at Columbus, Miss., and another for the Mobile and Ohio Railroad.

☞ Messrs. Van Brunt and Dinsmore, of this city, have the contract for the completion of the People's Passenger Railway, Baltimore, from Locust Point to Druid Hill Park, the former contractors having relinquished all interest in it.

☞ Henry C. Ohlen has obtained a mandamus directing the New York, Lake Erie and Western Railroad to accept and transport to this city within reasonable time such crude petroleum as he may offer at regular rates.

☞ A project is on foot for building a railroad to be called the Philadelphia and Chester Railroad, to be located near Cooperstown, Newtown Square and Sugartown.

GRAND CENTRAL HOTEL,

Broadway near 3d street,

NEW YORK CITY.

American plan.

Rates $2 50 to $4 00 per day.

FINANCIAL.

ALEX. FROTHINGHAM & CO., BANKERS AND Stock Brokers, No. 12 Wall st., buy and sell stocks on the New York Stock Exchange and carry the same as long as desired on a deposit of three per cent. Careful attention given to orders for investment from $25 upwards in "Puts" and "Calls," which frequently pay from ten to twenty times the amount invested. Explanatory Circular and their Weekly Financial Report sent free on application.

WM. A. GUEST & CO.,
No. 17 Nassau Street,
NEW YORK.

Purchase all marketable Railway Securities. A specialty of Stocks and Bonds of Roads leased to Erie and New York Central, either interest-paying or defaulting. Also, Stock and Bonds of City Railroads.

RAILROAD IRON.

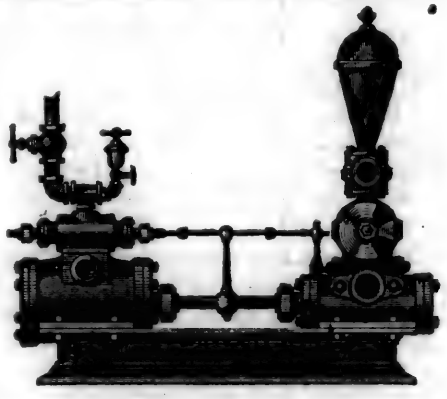
THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American or Welsh, Steel or Iron Rails,** and of any required weight and pattern.

PERKINS, LIVINGSTON, POST & Co.,
23 Nassau Street,
NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

Railroad officers desiring further information will please address



G. F. THOMAS, 549 & 551 Broadway, New York.

LENG & OGDEN,
IRON & STEEL
MERCHANTS,
4 Fletcher and 212 Pearl Streets,

The Balance of Trade.

We call frequent notice to the present peculiarities of our own trade both foreign and domestic. The reason for doing so is to create an increased interest in general mercantile affairs; to induce our readers, business men or others, to watch the causes and effects, the fluctuations that constantly occur in general commercial affairs apart from their own special and individual interests. For in no better way probably can the average business man be brought to study political economy divested of all technicalities and useless verbiage.

Political economy is nothing more than the right way of doing the right thing at the right time. Learned simpletons have made a great mystery over a simple matter of practical common sense. Why should we follow them?

The condition of Europe to day compared with ourselves is peculiar and ought to be gratifying to us. The great war between Russia and Turkey has ended without any real advantage to any European nation. We have profited by it from the sale of war munitions to both combatants, and a still greater profit from the increased demand for our food products caused by the partial closure of Russian ports. For three years our exports have been steadily swelling in amount and value, while our imports have been as steadily diminishing. We are now at the point of transition from a debtor to a creditor nation. Are we prepared to take full advantage of our new position?

In the very beginning of our prosperity comes a wail from our best customer, England. Increased demand and consumption of foreign products with a diminished demand for English manufactures are the causes assigned for the trouble. Truth compels us to say that while the final consequences may be serious enough to English commerce, at this moment the alarm is greater than the real distress. The balance of trade now in our favor is against England; but not yet to an extent too serious for repair. Compared with her neighbors who make less complaint England is rich and ought to be happy.

War and the fear of it will be the real cause of European decline and decay; and, per contra, a factor in our prosperity and ultimate strength. Germany, not a rich country in natural resources, is to-day the most powerful military nation in the world; but at what an expense. The army of Germany amounts to 401,659 men on a peace footing; and more than three times that number (1,283,791) on a war footing.

France, Austria, Russia, England, and even Italy—now claiming to rank as a first-class power—have each vast armaments that cost hundreds of millions, which money is simply wasted. Our little handful of 20,000 men over which we haggle because too costly seems pitiful and insignificant beside our great neighbors. But in truth we are stronger than many of our more warlike neighbors. If Germany can afford to support nearly half a million of men in idleness we cannot. We have drones enough without more military ones.

At the close of the Franco-Prussian war the balance of trade in France took an astonishing turn. It was largely in favor of France up to 1876. In that year there was a sudden turn, the imports exceeding exports by some $80,000,000. For this current year a still worse exhibit will be made by France. Germany, which gained enormously by the indemnity paid by France, has spent the money and is yearly growing poorer. It is the fear of war now, that costs so much and impoverishes them. England in 1872 exported $1,280,000,000; but in 1877 those figures had fallen to $990,000,000, a loss of $290,000,000. This current year, 1878, a still greater falling off will be shown. Great as this loss appears, it is rather a loss of profits than of capital. England is the greatest of creditor nations, and half the world is paying tribute in interest to her for borrowed money. Up to this time England has only sent us back our own bonds in payment for all the millions we have shipped her. Only now, when we have so nearly paid our entire foreign indebtedness, is England alarmed at the prospect of having to part with the money we have been paying her.

But the course of trade is inevitable for a time, at least; and that course is in our favor. The gold must come to us as for so long a time it went from us. Time alone will show whether we shall be able to keep all that will be coming to us.

Eastern Railroad of Long Island.

It is proposed to build a narrow gauge railroad between East New York and Babylon, L. I. According to the plan of its projectors it is to be owned by the residents upon the line, and operated in their interests exclusively. Its length will not exceed thirty miles, and the Manhattan Beach Railroad company has offered the use of its tracks between East New York and Bay Ridge and Greenpoint. It is to be called the Eastern Railroad of Long Island, and it is proposed to build it with stock subscriptions alone and to issue no bonds. The estimated cost of construction of the road is $240,000, and of equipment $110,250—making a total cost of $350,250. The reasons given for preferring a narrow gauge road are that it can be built and operated one-third cheaper, that fifty per cent less dead weight is carried, that less coal is consumed, and that there is less wear and tear on it than on a broad gauge road. According to a pamphlet issued by the projectors

of the road, it will have a market at its Greenpoint terminus, where farmers can consign farm produce and have it sold without any expense except freight and a commission for selling.

Southern Pacific Railroad.

The Los Angeles Herald says that the Southern Pacific Railroad Company are in earnest in their efforts to push across Arizona forthwith, and then adds:

Large shipments of ties are on their way to Wilmington to be used in bridging the distance which separates Yuma from Tucson. There is no doubt of the fact that the Southern Pacific people intend to build eastward until they meet somebody coming west from that section. Their right to lay a track in Arizona cannot be disputed. The concession procured from the Arizona Legislature, two years ago, is now the law of the land, through the failure of Congress to rescind it. The laws of the United States provide that where Congress neglects to repeal a law of a Territorial Legislature within one year from its passage, the act becomes valid. Stanley Matthews introduced such a repealing act in the United States Senate. It passed that body, but failed of passage in the House. There is, therefore, no legal obstacle to the progress of the Southern Pacific to the New Mexico line, and the presumption is that, with the opening of October, they will push for Tucson at the rate of a mile a day.

Baltimore and Hanover Railroad.

The Hanover (Pa.) Spectator says the grading of the Baltimore and Hanover Railroad is all completed between Hanover and Hempstead, except section No. 4, work upon which is progressing satisfactorily. The high trestle at Hoffacker's run, which is 34 feet high and 318 feet long, has been completed, and the track is being laid across it. Two sections between Hampstead and the intersection of the Western Maryland Railroad are being graded. The rest of the work is almost ready to let, and will soon be put under contract. Six sections remain to be let to reach Emory Grove camp ground.

Western Union Telegraph Co.

At the annual meeting of the stockholders of the Western Union Telegraph Company, held in this city on the 9th inst., the following report for the year ending June 30, 1878, was presented:

The capital stock of the company is $41,073,410, of which there was in the treasury, belonging to the company, at the beginning of the year, $7,255,335. From this there has been transferred and reissued 12,500 shares, in part payment for the purchase of Atlantic and Pacific Telegraph Company stock, and five shares in the purchase of stock of leased companies, leaving the amount in the treasury $6,004,835, and the amount outstanding on the 30th June, 1878, $35,068,575.

The bonded debt at the close of the year was as follows:

Seven per cent Gold Building Bonds, due May 1, 1902		$1,873,000 00
Six per cent Sterling Bonds, due March 1, 1900		981,234 00
Seven per cent Currency Bonds, due May 1, 1900		8,920,000 00
		$6 274,234 00
Less amount of Sinking Funds and accrued interest thereon, held by the Union Trust Company, trustees		95,292 86
Total		$6,178,941 64

During the year, $125,000 of the Building Bonds of 1902, and $10,206 (£2,100) of the Sterling Bonds of 1900, were redeemed by the trustees of the Sinking Funds. There was also purchased and cancelled $39,000 of the Currency Bonds of 1900, with the balance of the previous year's Sinking Fund appropriation for such bonds, which was returned to the company by the trustees, because the holders of drawn bonds to that amount did not present them for redemption.

BUSINESS OF THE YEAR.

The revenues accruing to this company were		$9,385,810 67
The expenses (including rental of leased lines) were		6,173,810 90
The net profits (after reserving amount sufficient to meet the claims of the Atlantic and Pacific Telegraph Company under existing agreements) were		$3,161,999 77
From which there was applied:		
For four quarterly dividends of 1¼ per ct. each	$2,103,726 00	
For interest on debt	453,741 52	
For sinking funds appropriations	79,970 40	
		2,637,437 92
Leaving surplus of net revenue for the year over dividends, interest, and sinking fund appropriations.		$524,561 85
From which surplus there was appropriated:		
For construction of new lines and erection of additional wires	$216,320 93	
For purchase of sundry telegraph stocks (other than Atlantic and Pacific), patents, etc	44,758 49	
		261,079 42
Balance		$263,482 43

GENERAL STATEMENT.

The balance of $263,482 43, together with the balances of previous years, has been applied towards the carrying of the amount due on account of the purchase of Atlantic and Pacific Telegraph Company's stock, the whole being represented in the following exhibit of the profits and disbursements of the company, for twelve years from the date of the general consolidation, July 1st, 1866:

The surplus of income account July 1st, 1866, was		$275,357 24
The net profits for twelve years, from July 1, 1866, to June 30, 1878 (inclusive of $173,487 50 profit—excess over cost—on 12,500 shares of Western Union stock owned by the company, which was issued at 72 per cent in part payment of Atlantic and Pacific Telegraph Company's stock purchased), were		35,933,823 70
Making an aggregate, June 30, 1878, of		$36,209,180 94
During this period there was applied—		
For dividends to stockholders (including dividend payable July 15, 1878)	$14,225,718 34	
For interest on company's bonds, etc.	4,587,970 36	
For amount reserved for sinking funds, and for interest on bonds, accrued to June 30, but not yet payable	106,086 64	
For discount on issue of bonds payable in 1900	250,058 00	
		19,169,828 84
Leaving a surplus of		$17,039,352 60

which is represented as follows:

Construction of new lines, erection of additional wires, etc.		$6,369,420 82
Purchase of telegraph lines, and of the stocks of companies controlled by the Western Union Company, upon which interest or dividends are paid as rental		1,627,049 42
Western Union Telegraph Company's stock (60,048 shares)		3,327,894 69
Atlantic and Pacific Telegraph Company's stock (72,010 shares)	$1,806,250 00	
Less balance due on account thereof, June 30, 1878, (since paid)	537,166 44	
		1,269,083 56
Gold and Stock Telegraph Company's stock (47,810 shares)		1,167,509 00
International Ocean Telegraph Company's stock (10,385 shares)		961,606 42
Anglo-American Telegraph Company's stock (£1,808)		7,500 00
Central District and Printing Telegraph Company's stock (200 shares)		10,000 00
Western Electric Manufacturing Company's stock (500 shares)		50,000 00
Western Union bonds redeemed and canceled		1,319,763 96
Sinking funds (portion not yet used for redemption of bonds, and exclusive of accrued interest allowed by Trustees)		80,450 79
Broadway and Dey Street building	$2,295,639 52	
Less amount provided from the proceeds of bonds	1,802,202 00	
		493,437 52
Real estate, other than above		344,499 04
Sundry railroad bonds and stocks		18,152 60
Supplies and material on hand unissued		243,043 28
		$17,289,410 60
Less the amount which was applied from the profits to make good the discount on the bonds of 1900		250,058 00
Total surplus of income account June 30, 1878		$17,039,352 60

STATISTICS.

The following statistical tables show the operations of the company from July 1, 1866, to June 30, 1878; the annual increase in lines and wires, offices, traffic, and of messages per mile of wire; the steady reduction in the average rate of tolls per message, and in the cost of transmission, with the annual average profit per message. A reference to the figures in these tables will show a larger increase of lines and wire during the past year than in any one year since 1874, a larger increase of telegraph offices than in any year since 1872, and a larger increase in the number of messages sent than in any previous year, being an increase of 2,759,953 messages, or over 18 per cent; while, notwithstanding the friendly arrangement with the Atlantic and Pacific Telegraph Company early in the year, and advance of some competing rates, the reduction of 4.7 cents per message, or 10.8 per cent on the average rate of tolls collected, compares favorably with previous years; and the reduction of 4.8 cents per message, or 16.1 per cent in the average cost of transmission, is the largest reduction of expenditures, in proportion to the work done, ever effected in any previous year. These reductions demonstate that one telegraph company, having all the business to handle, and relieved from the expenses of numerous competing offices, can afford to do the business of the country at lower rates, with a living profit, than it could be so done if divided between two or more companies.

Statement showing the mileage of lines and wires, number of offices and traffic of the company, for each year from June 30th, 1866, to June 30th, 1878.

Year.	Miles of Line.	Miles of Wire.	No. of Office.	No. of Messages Sent.	Receipts.	Expenses.	Profits.
1866	37,380	75,686	2,250		$	$	$
1867	46,270	85,291	2,565	5,870,282	6,568,925 36	3,944,005 68	2,624,919 78
1868	50,183	97,594	8,219	6,404,595	7,004,580 19	4,362,849 32	2,641,710 87
1869	52,099	104,584	8,607	7,934,933	7,316,918 80	4,568,116 85	2,748,801 45

Statement showing the miles of wire, number of messages transmitted, together with the average tolls, and profit per message, for each year from June 30, 1867, to June 30, 1878:

	Miles of Wire.	Number of Messages Sent.	Average Tolls per Message.	Av. Profit per Message.
1868....	97,594	6,404,595	104 7	41.8
1869....	104,584	7,934,933	89.8	34.6
1870....	112,191	9,157,646	75.5	24.8
1871....	121,151	10,646,077	69.5	23.8
1872....	187,190	12,444,499	66.2	22.4
1873....	154,472	14,456,832	62.5	19.1
1874....	175,735	16.829,256	54.9	15.4
1875....	179,496	17,153 710	54.	18.8
1876....	183,832	18,729,567	50 9	17.4
1877....	194,323	21,158,941	43.6	13.8
1878....	206,202	23,918,893	38.9	13.9

INTERNATIONAL OCEAN TELEGRAPH COMPANY.

Out of the Capital Stock of $1,500,000, the Western Union owns $1,038,500, and the company itself owns $97,300; and there is owned by other parties $364 200. The Western Union owns nearly three-fourths interest in the International Ocean Telegraph Company.

The net earnings of this company for the year ending June 30, 1878, were $254,204 05. It has paid regular quarterly dividends at the rate of 8 per cent per annum, and paid over $100,000 of its bonded debt during the year, and had a surplus at the close of $51,072. It has further bonded liabilities, amounting to about $130,000, which mature, and will be paid, during the ensuing year, from its surplus earnings, without interfering with its regular dividends, and, it is confidently believed, without any reduction of the surplus.

GOLD AND STOCK TELEGRAPH COMPANY.

This company has a capital stock of $2,500,000, of which it holds in its treasury $55,075, and the Western Union Company owns $1,195,250, or a little less than half the stock outstanding.

The net earnings of this company for the year ending June 30 were $264,093 15, out of which were paid quarterly dividends, amounting to 6 per cent to stockholders, $32,700 in interest on bonds, and over $48,000 for construction and purchase of lines and patents. The surplus of $36,000 has nearly all been invested in the American Speaking Telephone Company, of which latter company the Gold and Stock Company owns a two thirds interest, and has the control and management.

The Gold and Stock Company has a bonded debt of $500,000, maturing May 1, 1885, of which it owns and has in its treasury $65,500, and the Western Union Company hold $100,000. The earnings of the company show an increase over the previous year; and the prospect appears quite as favorable for the ensuing year.

GENERAL REVIEW.

Summarizing, in round figures, the general statement in detail of the financial condition of the company, the net earnings in twelve years past have been over thirty-six millions, of which fourteen and one quarter millions has been paid in dividends to stockholders; something over four and three-quarters millions in interest, discount and sinking fund on bonded debt, leaving a surplus of seventeen millions. Of this surplus, six and one-third millions has been invested in additional lines and wires; one and two-thirds millions in the purchase of stocks in leased lines, and half a million (in excess of the fund provided by the bonds) in the Western Union Building, making eight and one-half millions invested in new permanent property. For the remaining eight and one-half millions, the company holds in its treasury valuable dividend paying stocks and bonds, including over six millions of its own stock, over seven millions of stock in the Atlantic and Pacific, and over one million each in the Gold and Stock and the International Ocean Telegraph Companies, all and severally worth more than the cost value at which they are stated.

The reduction made to the public in the average tolls per message during the previous year resulted in a reduction of the profits, and loss to the company of over three and a half cents per message; but during the last year a still larger percentage of further reduction in the average rate of tolls has been made to the public, without reducing the average profit per message to the company; and it is confidently believed that the economies in expenditures now fairly inaugurated will be found to justify still further reductions in its average rate of tolls to the public, without reducing the average profit per message, but securing a further increase of business and of net revenues to the company. In fact, the reduction of expenditures and increase of revenues shown have all accrued during the last half of the year; the first half having to compare with the autumnal half of the year 1876, in which the Centennial Exposition and Presidental election rendered the business very large, showed an actual falling off, which was more than made up during the other half of the year. And since the close of the fiscal year the gains to the company in both respects have been, are at this writing, and promise to be during the ensuing year, much larger than any such gains previously realized.

Respectfully submitted,

NORVIN GREEN,
President.

☞ At Hartford, Conn., on the 15th inst., William T. Hart President, George B. Phippin Treasurer, and S. A. Carlton and John Goldthwait Directors of the New York and New England Railroad Company, paid for the bonds of the Hartford, Providence and Fishkill Railroad held by that city, and the bonds were surrendered to them. The City Treasurer had been instructed to make the surrender by vote of the Common Council, under a decree by Judge Shipman. The same officers began to pay off the floating debt of the old road, and paid out over $100 000. All of the Connecticut mortgage bonds have been taken up, except $163,000, which, in many cases, have been held back, awaiting the action of the city.

Long Island Railroad Accident.

At the coroner's inquest it was shown that the recent accident on the Long Island Railroad was caused by a broken flange of the cast iron wheel under the forward truck of the engine. Mr. Atwood, of this city, the veteran car wheel inventor and manufacturer, was called in as an expert to testify as to the condition of the wheels. He states that the wheel was made from a better than usual quality of iron, but a flaw in the wheel, technically called "cold checks," which can only be found after it is broken, caused the disaster. Mr. Atwood has for the past twenty years given this subject of flaws in cast iron wheels his particular attention, and has spent much time and money to produce cast iron wheels that would be free from these defects—trying to introduce the use of hot chills instead of cold ones—which would greatly diminish such defects; but railroad companies would not encourage the use of this improvement on account of the extra cost, which would be 50 cents for each wheel. It is a recognized fact among iron men, that in order to get a perfect casting for chilled rolls for rolling mills the roll must be cast in a hot chill in order to get a sound casting.

☞ The Street Car System of Philadelphia is claimed by the Record of that city to be the most perfect in the world, and, considering the service rendered, the cheapest. The aggregate length of track within the city limits is 279 miles. During the year 1877 86,586,870 passengers were carried, at an average cost per passenger of five and one third cents for a single fare. The taxes paid for repairs of streets and city and State levies amount to from seven to ten per cent of the gross earnings.

☞ The Pittsburg Chronicle notices the arrival at that place of four car loads of iron for the Pittsburg Southern Railroad, and says that an additional supply is also on the way. Eight miles of iron will be delivered and laid from that end of the road, while track laying will be pushed forward from the Thomas' store end, and in a few weeks the workers will meet each other at Cloakey.

☞ E. S. Washburne has been appointed General Traffic Agent, John Adams General Superintendent, E. K. Turner Assistant Superintendent, and F. S. Pratt Purchasing Agent of the Fitchburg Railroad Company. The office of General Traffic Agent is a new one necessitated by the constantly increasing business from the West through the tunnel.

☞ The interest on the first mortgage funded bonds of the Orange and Alexandria Railroad Company to 1st of May, 1878, and on second mortgage funded bonds to 1st July, 1878, will be paid at the Receiver's office in Alexandria, Va., on presentation of the bonds.

☞ A company has been organized to extend the Narrow gauge line already built from Toledo southwesterly a few miles. The route is through Van Wert, Ohio, to Bluffton, Ind., which point, it is said, will be reached in 1879.

Patent Railroad Switch and Signals.

Much has been said about "electric switches" on the Pennsylvania Railroad, and a reporter has taken the trouble to find out that the switch now being erected at East Liberty is not worked by electricity, but purely by leverages and muscular power. The signal tower telegraph operator will have charge of the switch levers, which changes switches, signal lights, at a distance of over 1,000 feet east and west of the tower. To turn one switch requires the movement of two levers, and one for the signals—the signals before the switch can be unlocked, thus preventing the possibility of an accident. The mechanical switch and signals are patented by Messrs. Toncey & Buchanan, of Harrisburg, manufacturers of railroad supplies, who are prosecuting the work at East Liberty. Mr. P. F. Smith, Chief of the Engineer Department, supervises the work. It will probably be finished during the present week.—*Pittsburg Chron.*

The Kid Glove Difficulty.

A difference of opinion or judgment concerning the value of French-made kid gloves has led to somewhat serious complications in the Custom House.

A brief history of the case is necessary to a clear understanding: A few large importers of kid gloves have either owned or controlled certain brands which were made for the American market alone. The glove known as the "Alexandre" has been the sole property of Messrs. A. T. Stewart & Co., and perhaps so named in compliment to the late Alexander T. Stewart. These Paris-made gloves form a part of the importations now in question.

For some time past it has been charged by manufacturers of kid gloves here together with small importers that certain high priced brands the Alexandre, Jouvin, Trefousse and others were undervalued by the importers. Acting upon these charges the Appraiser held the gloves for reappraisement. Merchant appraisers were called in to form a part of the board in accordance with the law. The verdict given then confirmed the valuation, 42 francs per dozen, as invoiced by the importer. The Government claiming the proper value to be 54 francs, but finally reducing that valuation to 49 francs.

This verdict of reappraisement by a joint board of Government and merchant appraisers is final, if we understand the law correctly. And it ought to be final; else what is the value of reappraisement by others than the General Appraiser?

It should be stated further that the importers as an evidence of honest valuation offered to sell other invoices of the same gloves at 42 francs in Paris. It looks as if this offer together with the valuation of the merchant appraiser should have satisfied the authorities. But it did not. Before making a decision, the Collector, it is asserted, was peremptorily directed by the Treasury Department to overrule the reappraisement and fix the value of the gloves at 49 francs, with its accompanying penalty of 20 per cent. This is the case, and it is bringing a perfect hornets' nest of sharp criticisms from the daily press upon the Secretary of the Treasury for his action in it.

If Mr. Sherman has done what he is charged with doing in the glove valuations—for the whole report has not yet been verified—it is an inexcusable blunder. Besides making trouble for himself he has placed the Collector in an awkward fix. If the reappraisement is final as has been generally understood and accepted heretofore, the Collector will be forced to withdraw his decision and affirm the first valuation of the importers. And the ultimate blame will of course rest upon Mr. Sherman who has apparently meddled most unwisely.

This glove matter is one of hardship for the importer and shows how the collection of Customs duties may interfere with legitimate commerce. The importation of gloves has been checked for months past by this hitch in valuations. A large stock has lain in Custom-house hands because the importers could not safely take them out until the difficulty was settled. Now, with the government valuation and penalty, the importers say they must lose money in any event; but the smallest loss will be in shipping the gloves back to France for sale.

New York, Lake Erie and Western R. R.

The following is a comparative statement of the gross earnings, working expenses and net earnings of the New York, Lake Erie and Western Railroad for the month of July, 1877 and 1878:

	1877.	1878.
Gross earnings.....	$1,041,205 29	$1,157,690 87
Expenses	869,888 80	830,981 44
Net earnings....	$171,316 49	$326,709 43

—showing an increase in gross earnings of $116,485 58, with a decrease in expenses of $39,907 36, making an increase of net earnings for the month of $155,392 94. The net earnings for the first ten months of the financial year exceed those for the same period last year by $913,558 37.

Snyder's "Little Giant" Engine.

The "Little Giant" Steam Engine is, as its name imports, of the class of light power engines especially adapted for manufactures, mines, hotels and other places, where moderate power in a small compass is a prime consideration.

The patentee of the Little Giant, Mr. Snyder, a practical engineer of large experience, has devoted many years to perfecting an engine which should combine the largest possible amount of strength and safety with the greatest economy attainable. In space and consumption of fuel the "Little Giant" is in all these respects unexcelled by any of its numerous competitors, and is sold at a price which renders it the best investment for all in want of a constant, simple and economical power.

The peculiarities of the construction of the Little Giant are: that the engine and boiler have separate foundations, and that the former is of the horizontal type. This arrangement renders the journals less liable to heat, enables the working parts to be kept cleaner and gives great facility of access to all parts both of boiler and engine when either requires attention. The boiler is constructed of extraordinary strength, the edges being lap-welded and the top and bottom caps screwed on so as to secure a uniformity of pressure over the whole area. To obtain the greatest result from the smallest amount of fuel, a series of lap-welded tubes pass from the lower portion of the boiler through the fire-draught between the outer shell of the furnace and the boiler itself, re-entering the boiler in the space between the water surface and the crown. This arrangement largely increases the area subjected to the direct action of the furnace, and more than compensates for the increased strength of the boiler plates.

The safety plug is so arranged that as soon as it acts it extinguishes the fire in the furnace by means of the escaping steam, and is so fixed that in the event of a short supply of water, through carelessness or otherwise, instead of an explosion occurring, the damaging of the fire plate is the worst that could happen.

The engine is provided with a cut-off at ¼ stroke, which thus saves thirty-three per cent of steam and a proportionate amount of fuel, though work equivalent to a full stroke is performed by the expansive qualities of the steam in the cylinder.

The amount of fuel required for an ordinary stove is sufficient to work one of the smaller sized "Little Giants," and the other favorable features in the construction of this engine are such as to render it one of the most popular of the numerous competitors for public favor.

American Institute Fair.

AUSTIN'S PATENT EXPANDING LEADER.

"Beware of the Spout," was a familiar notice on the house walls of New York thirty years ago, and many a good citizen who neglected the warning on a rainy day paid for his thoughtlessness with a wet jacket.

When the progress of improvement brought round leaders to carry off the roof water, the good old "Beware of the Spout" notice came down, and builders fancied that they had effectually cured an evil which made the middle of the street better to walk in than the pathway whenever a shower of rain fell.

But they soon found out their mistake. When winter came with its heavy snows and cold snaps, the leaders got choked, the water in it froze, and the round pipe, unable to expand with the pressure, burst, no matter what its thickness, and damaged walls, ruined plaster and heavy mechanics' bills made matters worse than before. These evils began the first year round leaders were introduced and they are just as bad now after thirty years' trial. Those only escape vexations expense who use the very ingenious metal pipes, invented by Mr. Austin, a collection of which of various sizes in the form of a trophy, are a prominent feature in the American Institute Fair.

Mr. Austin's principle is simplicity itself. Round pipes burst under internal pressure because they cannot expand either in material or in shapes. He argued that if cheap metal pipes were used the expense would be less, and if these pipes were corrugated (which, as all our readers know, means wrinkled) they would distend under pressure, increasing their internal dimensions and thus discharge all their contents, whether ice, snow or water, without the possibility of bursting and when the pressure was removed would return again to their original size.

We are astonished that so radical and ready a cure for the expense and annoyance caused by the present round leaders, is not more generally adopted. We have no doubt our numerous railway depots and shops would use them at once, especially in their new structures, if they knew of their existence. No landlord or householder would allow another round leader to be put up on his buildings if he had once seen or heard of Mr. Austin's patent. We refer to the advertisement in another column, and have no doubt that our suggestions will not be lost upon the building section of our numerous and intelligent readers. We should add that Mr. Halliday, of 218 East 9th street, an experienced tin and slate roofer, is the sole agent in this city.

Brooklyn and Rockaway Beach R. R.

A map of the proposed extension of the Brooklyn and Rockaway Beach Railroad across Carnarsie Bay to Rockaway Beach, was filed in the office of the Register of Kings county, on the 15th inst. by DeWitt C. Littlejohn, President of the company. The work will probably be begun in the spring and completed about the first of July. It is proposed to run trains of the above road, from Greenpoint to East New York, over the Manhattan Beach Railroad. The distance from Greenpoint to the beach will be 13½ miles, and the fare fifty cents. The road will be of narrow gauge, and the running time between Greenpoint and the beach will not, it is thought, exceed thirty-five minutes.

New York City Consols.

"New York City Five per cent Consols," is a fresh term in our list of stock quotations, and one which cannot fail to attract the favorable attention of permanent investors.

The easy ability of our metropolis to meet even the heaviest burdens imposed on it by unscrupulous officials has been so satisfactorily demonstrated that its securities have never failed to find a ready market, and this high credit has never been impeached by any attempt on its part to evade the slightest of its obligations to its numerous creditors.

It was a full appreciation of these facts that induced the Syndicate composed of the three leading banking firms of this city, i. e., Messrs. Drexel, Morgan & Co., August Belmont & Co., and Winslow, Lanier & Co., to purchase the whole amount of this issue of the new fives, and to place a portion of it on the market at a slight advance on the original cost.

The European credit of the firms composing the Syndicate, will doubtless be a better guarantee to outside purchasers for the value of the stock as an investment, than its official title, and this may well be so since no banking firm has done more to sustain the credit of New York and identify themselves with the financial welfare of the city in its most trying times, than that of one of the members of the Syndicate.

It is well, however, for investors to note that there is an internal strength and security in these consols which render them equal in absolute stability to Federal bonds. The interest and principal are specifically payable in gold, without the contingency which attaches to Federal securities, of greenbacks or silver being regarded as legalized substitutes. The amount of the city consols is limited to a portion only of the present city indebtedness, and only so much can be issued at any time as will equalize the annual expenditure required to meet the maturity of bonds now outstanding. The whole amount offered will doubtless be absorbed in a short time, but if there were enough to go round, there is no stock of a similar character on the market to which it would not be a formidable competitor. The long term these consols have to run makes them a remarkably desirable security for savings banks and for the investment of trust funds.

A Spark Arrester.

An experiment was recently tried upon an engine on the Baltimore and Ohio Railroad which has so far proved a success. The improvement consists in an extension being placed upon the smoke box, which, by means of some intricate mechanism, arrests the sparks and cinders and keeps them within the box, which is sufficiently large to contain all the sparks and cinders that may accumulate during the entire run of a division. The engine which was the first to pull a regular passenger train with this improvement had a straight, slim stack, emitted no heavy clouds of smoke, and ran better than the unimproved engines. It is understood that all the passenger engines on the road will be altered to this improvement as speedily as possible should the officers be convinced of its entire success.

☞ The Bound Brook Line between Philadelphia and New York is steadily building up an important traffic. It makes quick time, it has a superb road bed and fine rolling stock. Connections are made by an annex boat with Brooklyn and with the Erie depot, Jersey City. It is an admirably operated line, and is meeting the fullest requirements of the travelling public, not only by the frequency of its trains but also by the promptness with which they are run. The general passenger Agent of the line is H. P. Baldwin, 119 Liberty St.

☞ At the annual meeting of the stockholders of the Ohio and Mississippi Railroad, held in Cincinnati on the 10th inst., W. T. McClintock and C. A. Beecher were re-elected Directors, and R. L. Cutting, Jr., elected in place of Ashley. A committee, consisting of Wm. Wainwright, Adrian Iselin, Jr., R. L. Cutting, Henry M. Day and W. W. Scarborough, was appointed to prepare a plan for the reorganization of the Company and report as soon as possible to the Board.

☞ At San Francisco, on the 15th inst., in the case of Gallatin against the Central Pacific Railroad Company, being an action to restrain the defendants from paying a dividend of 1 per cent on the capital stock, on the ground that under the Funding act of 1878 the company should pay 5 per cent of its earnings into the United States Treasury as a sinking fund, Judge Sawyer, in the United States Circuit Court, overruled the demurrer and, the defendants not appearing, gave judgment for the plaintiff. The case now goes to the United States Supreme Court.

☞ The managers of the Boston and Albany Railroad have issued orders prohibiting the running of double-headed freight trains on their road, as it is thought one engine with thirty cars can be more safely run than two engines with seventy or eighty cars. The use of torpedoes has also been ordered in a variety of contingencies, calculated to prevent accidents, and when one is snapped the engineer is required to bring his train to a full stop.

☞ R. G. Rolston and others, purchasers of the West Line (N. J.) Railroad, have organized a corporation under the name of the Passaic and Delaware Railroad Company. The directors are: Samuel Sloan, President; Moses Taylor, R. G. Rolston, Benjamin G. Clarke, John Brisbin, Jacob Vanatta, Percy R. Pyne, Andrew Reasoner, and Solomon Griffith. A common seal was adopted. The capital stock of the new corporation is $1,000,000, in shares of $50 each.

☞ The project of building a railroad up Mount Vesuvius, is to be carried out by a Naples banker. A double line, supported on pillars, and 919 yards long, will carry the trains, which will be hauled up to the mouth of the crater by wire ropes connected with stationary engines. Each train will consist of four carriages holding four persons each, and as one ascends the other will descend.

☞ The New York, Lake Erie and Western Railroad Company on the 5th inst. executed a trust deed or mortgage covering all property of the railroad to the Farmers' Loan and Trust Company as trustees, to secure bonds amounting in the aggregate to $36,477,400. The instrument was recorded at the office of the Register of this county on the 10th inst.

☞ At a meeting of the stockholders of the Richmond and Danville Railroad Company on the 15th inst., the action of the board of directors, in relation to the recent arrangement looking to the purchase of the Charlotte, Columbia and Augusta Railroad, was approved and the report adopted.

☞ The first spike on the Eastern Extension Railway in Nova Scotia, was driven at New Glasgow, on the 3d inst. Mr. James McDonald is the contractor. It is expected that trains will be running from New Glasgow to Antigonish early next summer.

☞ Forty or fifty men convicted at Malad, Idaho, for cutting timber for the Utah Northern railroad on the Bannock reservation, have been sentenced to aggregate fines of about $9,000 and six months' imprisonment. This action delays the progress of the railroad.

☞ The Kankakee and Southwestern railroad, a branch of the Illinois Central, is being rapidly constructed. Four stations have been established, and considerable traffic is being transported over the completed portion of the line.

☞ The Narrow gauge Railway Convention will be held at Cincinnati, October 28; and the State Railway Commissioners' Convention at Columbus, Ohio, November 12.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

Ashtabula and Pittsburg Railway.

A certificate has been filed with the Secretary of State of Ohio of the Ashtabula and Pittsburg Railway Company, as reorganized, extending from Youngstown to Ashtabula, via Girard, Niles and Warren, in Trumbull county. Capital stock, $1,700,000, in shares of $50 each. The new company is the successor of the Ashtabula, Youngstown and Pittsburgh Railroad Company. The road was sold under judicial proceedings, and the company is now reorganized as above, with Warren Packard, H. L. Morrison, A. C. Fisk, J. J. Brooks, C. B. Wick, Wm. S. Bissell, F. Harrington, Wm. Thaw, W. P. Shinn, William Mullens, Thomas D. Messler and George B. Roberts as Directors. The road is controlled, as heretofore, in the interest of the Pennsylvania Railroad. Warren Packard is President of the company.

Statement of the Public Debt of the United States, October 1, 1878.

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$388,276 80
Kansas Pacific bonds, 1862-64	6,303,000 00	94,545 00
Union Pacific bonds, 1862-64	27,236,512 00	408,547 68
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	24,000 00
Western Pacific bonds, 1862-4	1,970,560 00	29,558 40
Sioux City and Pacific bonds, 1862-64	1,628,320 00	24,424 80
Totals	$64,623,512 00	$969,352 68

Interest paid by United States, $39,835,039 84; interest repaid by transportation of mails, &c., $10,279,181 35; balance of interest paid by United States, $29,555,858 51.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

* This amount includes $41,500,000 Five-twenty called Bonds not yet matured, against which a like amount of 4 per cent Bonds have been issued and are embraced in this statement, and the amount included in the coin balance.

☞ The rails on the New Brunswick Railway are now laid to Edmundston, Victoria County, to which point regular trains will run in a short time. About six miles of the road are ready for ballasting.

☞ The managers of the Shenango and Allegheny Railroad are considering the project of extending their road from Hilliard's Mills, the present terminus, to East Brady, Clarion county, Penn.

☞ Track laying on the Pittsburgh Southern railway was commenced at Washington, Pa., on the 8th inst., and it is expected that cars will be running through from Pittsburgh to Washington by the 10th of November.

☞ An effort is being made to consolidate the Washington and Waynesburg and Pittsburgh Southern Railroads.

☞ The Board of Directors of the Profile and Franconia Notch Railroad have decided to build the road at once.

American Railroad Journal.

Saturday, October 19, 1878.

Financial and Commercial Affairs.

The week closed with a feeling of restless nervousness. There was slight change in quotations or in the volume of business done. This was the condition on Saturday. Monday opened with cable news that the Governor and Directors of the Bank of England met that day and promptly raised the rate of discount to 6 per cent. This is the second recent extraordinary meeting of the Bank of England officials on Monday instead of Thursday to change the Bank's rate to a higher figure. This news, with the feverish symptoms shown at the close on Saturday, and a well-planned gold movement on the part of certain operators famous for a similar manœuvre on "Black Friday," set the machinery of the Stock market into rapid motion. The sales for the day amounted to 816,500 shares; while the dealings in gold ran up into the millions at as high a figure as 101¼.

On Monday when the gold operators were having things entirely their own way Mr. Sherman, Secretary of the Treasury, came promptly into the field and ended the speculation. He issued the following order which virtually places fifty millions of gold on the market—there being that amount of called bonds yet to be presented for redemption:

The Secretary of the Treasury has authorized, until otherwise ordered, the Treasurer in Washington, D. C., and the Assistant Treasurer at New York to pay any outstanding called bonds at any time before the maturity of the call, with interest accruing thereon to and including the date of presentation.

By the terms of this order the holders of called bonds can present them here whenever they ma choose to do so without the delay of sending to Washington as heretofore. And this action of the Treasury has put an extinguisher upon gold speculation for the present and future.

We are of the opinion that this movement to make cash gold abundant might have been inaugurated sooner with benefit to general business and without danger to the Treasury in its redemption requirements on the 1st January, 1879. But the present good effect of Mr. Sherman's order is to squelch the desperate kite-flying of the gold speculators, at the same time bringing gold very nearly to par where it ought to be. To this can be added another change by Secretary Sherman in his method of purchasing bar silver for coining. Hereafter purchases will be made only on bids to be received at the Treasury in Washington for silver to be delivered at the Philadelphia Mint.

The Stock market has been active, irregular and excited throughout the week. The failure on Tuesday of Messrs. Haar & Co. with liabilities of more than $225,000 caused a large amount of stocks estimated from 20,000 to 40,000 shares to be sold for their account "under the rule." The dealings in gold by this firm during Saturday and Monday amounted to $3,500,000; a large amount of which was sold likewise under the rule. The sales of stocks on the Stock Exchange were on Saturday, 176 000 shares; Monday, 316,500; Tuesday, 153,500, and Wednesday, 135,000.

Boston advices report a firmer Money market. Business is fairly active for the season. Discounts are now quoted at 4½@5 per cent for prime commercial paper with not large offerings. Call loans have advanced somewhat since our last and may now be quoted at 5, 5½ and 6 per cent; with occasional dealings at a still higher rate. The market is gradually hardening and rates now favor lenders.

From Philadelphia there is slight change reported in the money market and rates are not quotably higher. But banks and institutions having suffered heavy losses by three or four recent large failures are now scrutinizing all paper offered very closely. We now quote railroad stocks moderately active. At the close Pennsylvania Railroad shares were sold at 32¾@32⅞. Reading Railroad quiet at 13¾@13⅞. Call loans were made at 3@4 per cent to strong names. For four months and longer dates the rates were 5@5½ per cent. Loans on Government securities were at 3½@4 per cent. Loans on miscellaneous stocks about 6 per cent.

Baltimore advices show a very dull Stock market, and general business quiet and slightly unsettled from present uncertainty concerning exports to European markets. In the Money market the offerings of money are less liberal than heretofore, although prime paper is in good demand at unchanged rates. The market, however, is hardening. Baltimore and Ohio Railroad, common stock, was dull and lower, closing at 85@86. Scrip was sold at 85. Northern Central dull without reported sales.

In our last issue we reported a considerable falling off in subscriptions to the new Government 4 per cents. That condition continuing the reported purchases have fallen on some days of the week below a hundred thousand dollars. This, however, is not from any dislike to the bonds but from a better demand for money from business sources. When money can be employed in business at 5@6 per cent readily, only the most careful investors will prefer a four per cent Government bond. We now quote Government securities of all issues as follows:

United States 6s, 1881, registered, 107⅝@107⅞; do. coupon, 107⅝@107⅞; 5-20s, 1865, new, registered, 102⅝@102¾; do. coupon, 102⅝@102¾; do. 1867, registered, 105⅝@105⅞; do. coupon, 105¼@105⅝; do. 1868, registered, 107¼@107½; do. coupon, 107½@107¾; ten-forties, registered, 105¾@105⅞; do. coupon, 105¾@105⅞; 5 per cents, 1881, registered, 104⅛@104¼; do. coupon, 105¾@105½; 4½ per cents, 1891, registered, 103@103⅛; do. coupon, 103@103⅛; 4 per cents, 1907, reg., 99⅞@100; do. coupon, 99⅞@100; sixes, currency, 119@119¼.

The City bank statement again shows a reduction in legal tenders and currency which has been shipped West freely to assist in moving the crops. The present demands for money from the cotton and grain regions are large, but are readily met.

Gold was run up to 101¼@⅜ on Monday, but before the day closed fell to 100⅜. We now quote it at 100½ and dull. Silver is reported very dull in London at 50d.—a decline.

Foreign Exchange since our last has been unsettled and lower. A decline of nearly 2 per cent was suffered during the week. At the close there was slight advances from 4 78½ to 4 79 for prime 60 day bills; and 4 85 for demand. The unsettled condition of the London market has caused but slight call for any but demand or cable exchange. Southern commercial cotton bills are now quoted 4 77; and a sale was reported of Citizens' Bank (New Orleans,) bills at 4 78.

Domestic Produce owing to the panicky condition of the English money market is notably lower. The free exportation is for the moment checked and shippers are anxiously awaiting further cable advices from the foreign markets. The exports of produce for the week have been $6,858,904 against $5,941,568 last year. Total exports since January 1st, 1878, $275,486,876 against $221,812,845 for the same time last year.

Cotton has declined slightly from our last quotations in part from unfavorable foreign advices, and, also, large receipts. We now quote middling uplands at 10⅛ cents per pound and dull. Futures have been sold below 10 cents. The quotations for futures at the close were, for October, 10.03; for November, 10.01; for December, 10.08; January, 10.10; February, 10.17@10.20. Receipts of cotton at all the ports since September 1, 601,597 bales; against 322,145 bales, same time last year. Consolidated stock on 15th Oct. 340,982 bales. Stock in New York, 49,363 bales.

Metals are dull and Pig Iron is unsettled. Financial troubles in Scotch markets caused a heavy decline, which has been in part recovered. In the absence of sales it not easy to quote actual prices for either American or Scotch Pig. Iron Rails are dull and quiet. Steel Rails in good demand as heretofore at 44@45 per ton.

Ocean freights are firm although not quotably higher. The business done, however, is moderate and will be less, owing to the unsettled condition of the markets abroad. Engagements to Liverpool for grain, by steam 6⅛@7d. Cotton 5 16d. To London, grain, by steam, 7@7⅛d, To Havre, grain, by steam, 6s. per quarter; cotton ⅝c. compressed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Stock and Bonds of the New York Elevated Railroad.

We desire to call the attention of capitalists and investors to the advertisement elsewhere in our columns for "Proposals for Stock and Bonds" of the New York Elevated Railroad Company. The eastside branch of the road is already doing a very large and profitable business which will be still further increased upon the completion of the road to Harlem. It is a first-class investment security, and we commend it as such.

☞ The great point to be gained in all speculative ventures, and especially in stock operations, is success. How to achieve this, often puzzles the oldest and wisest heads in Wall St. The conspicuous Banking House of Messrs. Lawrence & Co., 57 Exchange Place, N. Y., have adopted a system of combining or pooling the orders of customers into vast aggregates, and in this way operate in such a manner as to secure immense profits, where any other style of doing the business would fail of profitable results. By this system $25, $50, or $100 would bring a return, in 30 days of $100, $250 or $500 according to the market. We invite the attention of our readers to this system and the firm of Messrs. Lawrence & Co., who stand high in the financial world.

Pittsburg, Cincinnati & St. Louis Railway.

The following is an approximate statement of results in the operations of the Pittsburg, Cincinnati and St. Louis Railway Company for the nine months ending September 30, 1878:

Gross earnings (including interest received on equipment hired), January 1 to October 1, 1878		$2,306,330
Expenses (including interest on car trust car and rent of Monongahela extension) for same period		1,477,877
Net earnings		$828,953
The interest on the bonds for these nine months is:		
$3,000,000 Steubenville and Indiana Railroad 6 per cent.	$135,000	
$775,000 Steubenville and Indiana Railroad 7 per cent	40,687	
$6,222,000 Pittsburg, Cincinnati and St. Louis Railway 7 per cent	326,655	
		502,342
Surplus		$326,610

Grand Central Hotel.

Situated on Broadway, near 3d street, in the very heart of the business centre of New York. This magnificent hotel is unrivaled in the United States, it is conducted on the American plan, the fitting and furnishing is of the most elaborate design and finish and the bill of fare is everything the most fastidious epicure could desire.

☞ Plans for a railway up Vesuvius have been completed and the work is to be begun at once. The cars will be drawn by a wire rope, moved by a stationary engine. The road is to be ready within a year.

☞ Regular trains are now running on the Lake Champlain and St. Lawrence Junction Railway from Farnham to St. Guillaume, to which point it is now completed. The road is 48 miles long, and is narrow gauge.

☞ A controlling interest in the Ashuelot Railroad stock was sold on the 12th inst. to large individual stockholders in the Connecticut River Railroad. Over $150,000 changed hands.

☞ It is expected that the Springfield, St. Paris and Sidney Narrow Gauge Railroad will be completed and the cars running from Springfield to Sydney within the next twelve months.

☞ The Attorney General has given an opinion that the Utah and Oregon Railroad Company can pass through the Bannock Indian reservation.

☞ The work of grading the Chester County Narrow Gauge Railroad, between Philadelphia and West Chester, will shortly begin.

☞ Mr. J. N. Blake has been re elected President, and Colonel Tisdale Vice President of the Lake Simcoe Junction (Ca.) Railway Co.

☞ James McCrea has been appointed to succeed the late Mr. Barker as Superintendent of the Pennsylvania Railroad at Jersey City.

Baltimore and Ohio Railroad.

The directors of the Baltimore and Ohio Railroad company have declared a dividend of four per cent on the capital stock of the main stem for the half year ended September 30, payable in the stock of the company on and after November 25, proximo; and also a dividend of five per cent on the capital stock of the Washington branch, payable on and after the 10th inst. The stock dividend on the shares of the Baltimore and Ohio Railroad amounts in the aggregate to $546,800, and increases the capital stock of the company to $14,216,800, in 142,168 shares at a par value of $100 each. The net earnings of the road for the six months ending 30th September, and which is the end of the fiscal year, are said to be considerably in excess of the dividend announced. The course of the management in declaring a stock dividend now, as for the previous six months, is in pursuance of the policy determined on some time since of applying the earnings to the payment of the floating debt, which had been largely created in making extensions and substantial improvements, and aiding by advances connecting roads. By this action the credit of the company has been so much elevated of late that the offerings of money for its use are largely in excess of its requirements.

Steel Manufactures.

Three several processes, all of recent invention, are now employed in the manufacture of steel, and as the area to which that useful form of refined iron is applied is daily extending, a glance at these several methods may not be uninteresting to our readers.

THE BESSEMER PROCESS is the first in order of these three, and that which has obtained the greatest popularity in this country. In this invention, cast iron of a special quality is brought into a state of fusion, and then a number of currents of air are forced up from beneath by powerful pressure, through perforations in the bottom of the receptacle. The heat evolved by this intermolecular combustion while the oxygen streams through the molten metal, raises and maintains it at a very high temperature, and produces that chemical change which distinguishes steel from iron. This operation is economical when worked on a large scale, although the plant is costly.

THE MARTIN-SIEMENS PROCESS followed the Bessemer in order of invention. In this method a gas furnace is employed, which heats the molten cast iron and retains it at a high temperature, the incandescent oxygen of the Bessemer process being supplanted by a constant exterior application of heat. Into this molten cast iron malleable iron is thrown in certain proportions, which, fusing with the other, leavens the whole mass and produces steel of a quality determined by the quantity of malleable iron in the mixture. Trial ingots are taken as the operation goes on, and thus by successive additions of malleable metal, any quality may be arrived at according to the use for which it is intended. In this process any remnants of waste and old steel can be used up, and no special quality of pig iron is necessary as in the Bessemer process. It has this advantage also, that the nature of the metal can be modified as explained above, while the Bessemer Steel is necessarily of uniform quality.

THE PONSARD PROCESS, the last of the three recent inventions, is that of M. Ponsard, a Belgian. It is an adaptation and combination of the Bessemer and Martin-Siemens processes, with an additional mechanical device for the removal of phosphorus. A gas furnace is used, heated to a high temperature, and having a moveable hearth supplied with a number of the Bessemer *tuyeres*, or blast pipes. After these latter have been in operation for a certain time, a partial rotation of the apparatus disconnects them, and the further process is continued on the Martin-Siemens plan. This apparatus is now in operation at a foundry in Belgium and with success, no fewer than eight charges being operated on in twenty-four hours.

Commerce of New York.

The foreign imports at New York for the month of September, 1878, are officially stated as follows:

	1877.	1878.
Entered for consumpt'n.	$10,369,979	$12,164,546
Do. for warehousing	5,161,879	4 895,877
Free goods	6 375,986	8,056,044
Specie and bullion....	2,903,358	652,856
Total entered at port...	$24.811,202	$25,268,823
Withdrawn fr. wareh'use	10,581,826	7,314,987

The foreign imports at New York for nine months from January 1, were:

	1877.	1878.
Entered for consumpt'n	$106,496,398	$103,295,867
Do. for warehousing ..	71,510,582	52,687,957
Free goods	68,078,962	58,696,178
Specie and bullion	11,682,992	15,360,346
Total entered at port..	$257,768,884	$230,040,448
Withdrawn fr. wareh'se	61,878,015	53,221,722

The following is a classification of imports for nine months ending September 30:

	1877.	1878.
Dry goods	$64,839,584	$59,861,616
General merchandise..	181,246,308	154,818,886
Specie...	11,682,992	15,360,446
Total	$257,768,884	$230,040,448

The duties received at New York for nine months ending with September, were:

	1877.	1878.
January	$8,058,988 72	$7,154,924 85
February.....	8,224,484 61	7,914,953 48
March..	8,695,637 63	8,571,501 20
April	7,569,482 75	7,696,248 89
May	7,054,082 33	6,527,083 58
June.....	6,102,426 72	5,957,185 22
July	7,132,747 46	8,103,513 74
August	10 018,122 33	10,149,191 69
September	9,068 929 44	9,080,936 88
Total....	$71,924,801 99	$71,155,484 08

The exports from New York to foreign ports in the month of September, were:

	1877.	1878.
Domestic produce.....	$29,215,062	$31,537,999
Foreign free goods.....	84,081	215,364
Do. dutiable....	484,093	351,517
Specie and bullion.....	893,289	370,163
Total exports.....	$30,677,425	$32,475,043
Do. exclusive of specie.	29,784,136	32,104,880

The exports from New York to foreign ports for nine months from January 1, were:

	1877.	1878.
Domestic produce.....	$204,159,073	$256,974,848
Foreign free goods....	1,643,029	2 698,770
Do. dutiable.....	3.460,514	4,163,061
Specie and bullion....	24,831,138	11,314,376
Total exports	$284,093,754	$275,151,054
Do exclusive of specie.	209,262,616	263,836,679

Western Union Telegraph Co.

At the annual meeting of the stockholders of the Western Union Telegraph Company, held on the 9th inst., the following directors were chosen for the ensuing year: Norvin Green, Wm. H. Vanderbilt, Edwin D. Morgan, Augustus Schell, Harrison Durkee, James H. Banker, Samuel F. Barger, Joseph Harker, Alonzo B. Cornell, Hamilton McK. Twombly, John Van Horne, Cornelius Vanderbilt, Moses Taylor, Wilson G. Hunt, Edwards S. Sanford, Cambridge Livingston, Chester W. Chapin, Robert Lenox Kennedy, J. Pierpont Morgan, George M. Pullman, John R. Duff, Darius R. Mills, Oliver H. Palmer, Samuel A. Munson, David Jones, Anson Stager, Edwin D. Worcester, Henry M. Phillips and Wm. D. Bishop.

At a meeting of the new board of directors held on the 12th inst., the following officers were elected:

President.—Norvin Green.

Vice Presidents.—Augustus Schell, Harrison Durkee, Anson Stager, H. McK. Twombly, John Van Horne.

Secretary.—A. R. Brewer.

Treasurer.—R. H. Rochester.

Executive Committee.—Norvin Green, E D. Morgan, Augustus Schell, Harrison Durkee, William H. Vanderbilt, G. F. Barger, H. McK. Twombly, Joseph Cochrane, Jas. H. Banker and Alonzo B. Cornell.

Mr. Horne, whose name appears as one of the Vice Presidents, was formerly General Superintendent of the Southern Division.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending October 5th, as reported by the several carrying companies, amounted to 427,014 tons, against 365,034 tons in corresponding week last year, an increase of 61 980 tons. The total amount of anthracite mined for the year is 12,060 501 tons, against 14,526,796 tons for same period last year, a decrease of 2,466,297 tons. The quantity of bituminous coal sent to market for the week amounted to 83,315 tons, against 81,088 tons in corresponding week last year, an increase of 2,727 tons. The total amount of bituminous mined for the year is 2,531,821 tons, against 2,538,426 tons for corresponding period last year, an increase of 7,105 tons. The total tonnage of all kinds of coal for the week is 510,329 tons, against 446,122 tons in corresponding week last year, an increase of 64,297 tons, and the total tonnage for the coal year is 14,591,822 tons, against 17,065,224 tons to same date last year, a decrease of 2,473,402 tons. The product of the mines of the Cumberland coal region for the week ending October 5 was 42,413 tons, and for the year to that date 1 210 023 tons, an increase of 57,261 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 18,700 tons; for the year, 654,267 tons, an increase of 44,896 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 17,692 tons; for the year, 457,437 tons, an increase of 30,960 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the last day September and the first week in October was 186,652 tons, of which 111,805 tons were coal, and 25,847 tons coke. The total carried for the year is 3,677,201 tons, of which 2,889 087 tons were coal and 779,186 tons coke. These figures embrace all the coal carried over the road, east and west. The coal tonnage of the Reading Railroad for the week ending on the 12th instant was 187,000 tons, of which 49,500 tons went to Port Richmond and 51,000 tons in the same time shipped from thence.—*Public Ledger, Oct. 14.*

A GOOD PLAN

The most profitable plan for operating in stocks is that of uniting capital of various sums by combining or pooling the orders of thousands of customers and using them as *one mighty whole*, which has been done so successfully by Messrs. Lawrence & Co., Bankers, 57 Exchange Place, N. Y. City. By this co-operative system each investor is placed on an equal footing with the largest operator, and profits are divided *pro rata* among shareholders every 30 days. An investment of $10 would pay $50, making 5 per cent on the stock during the month. $25 would return $150, or 6 per cent; $100 would make $1,000, or 10 per cent., and so on, according to the market. *Frank Leslie's Illustrated Newspaper*, June 29th, says: The Combination method of operating in stocks is the most successful ever adopted." *New York Independent*, Sept. 12th, says: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." *Brooklyn Journal*, April 29th, says: "Our editor made a net profit of $101 25 on an investment of $20 in one of Messrs. Lawrence & Co.'s combinations. The firm's new circular (copyrighted and sent free) contains "Two unerring rules for success in stock operations," and explains everything. All kinds of Stock and Bonds wanted. New Government Loan supplied. Best references. Address *Lawrence & Co., Bankers and Brokers*, 57 Exchange Place, New York City."

A World of Railroads.

The new world is a world of railroads. More than 83 000 miles of track are distributed over the surface of North America alone, and of this length 77,470 miles fall within the United States. Between a third and a half of the railroads of the world are included within the limits of our territory. The 17.263 miles of Great Britain, the 18,229 miles of Germany, the 13,702 miles of Russia and the 12,722 miles of France are inconsiderable in comparison. The development of the railway system of the United States, though it has already reached vast proportions, and has, in the excitement of flush times of the past, sometimes extended in unprofitable directions, has not reached its highest point. Unless the invention of some means of cheaper and more rapid transportation than by steam shall supersede the locomotive, the work of laying railway tracks in this country will not be brought to an end for many years. The advantages of railroads in opening up new and undeveloped sections of the country and in binding together the more densely settled portions do not need to be dwelt upon. One of the great offices performed by them is the transportation of the mails From the time when a single coach first gave way as a mail carrier to the postal car, the railroad mail service has steadily grown, and its growth has been commensurate with that of the railway system in general. The only check to its increase was at the time of the breaking out of the civil war, when mail service was discontinued in the South over some seven thousand miles of railroad. All this was regained at the close of the war. From 84,015 miles of railway service in 1867 the total is now 74,546 miles, or not far from the entire length of the railroads of the country. Of the 10 years in which this growth of 40,000 miles has taken place only five have been prosperous. The increase in new routes was more than eight thousand miles in 1872, while for each of the last three years it has been less than two thousand five hundred miles.—*Washington Star.*

☞ The Portsmouth, Ohio, Tribune says that 53 miles of the Cincinnati and Southeastern Narrow Gauge Railroad are in operation, and doing well. A contract has just been closed for the extension of the road from Winchester to Galena, the work to be done in ten months from the 4th inst. Efforts are being made to further extend the road to Portsmouth, the cost of which is estimated at $100,000, of which Portsmouth is expected to contribute one-half. Should the necessary amount be raised, this portion of the road could be proceeded with at the same time to advantage, and the whole road completed within the ten months.

☞ Mr. John W. Doherty has been elected President of the North Pacific Coast Railroad. He has been for sometime, and still is, General Manager of the road.

☞ D. C. Dodge, has been appointed General Superintendent of the Denver and Rio Grande Railway.

OFFICE OF THE NEW YORK ELEVATED RAILROAD COMPANY, No. 7 BROADWAY, NEW YORK, Oct. 14, 1878.

SEALED PROPOSALS IN ENVELOPE, INdorsed "Proposals for Stock and Bonds," are invited and will be received at this office until 12 o'clock M. of MONDAY, the 28th day of October, 1878, for 6,750 shares of the Capital Stock of the New York Elevated Railroad Company, and $675,000 of the First Mortgage Bonds of the said company, or any part thereof. Each bid must be made for an equal amount of stock and bonds. No bids for the stock will be considered which are for less than the par value thereof, namely, $100 per share. The bonds are 7 per cent per annum, coupon bonds of the denomination of $1,000 each, the principal due Jan. 1, 1906. Coupons payable 1st January and 1st July in each year. The bonds will bear interest from the first day of January, 1879.

Interest will be allowed at the rate of 7 per cent per annum on all payments made before that date.

A deposit of 5 per cent will be required from all bidders, which must accompany the bid, and which 5 per cent will be indorsed on all such bids as are accepted. On such bids as are not accepted the deposits will be returned to the bidders.

Fifty per cent on all accepted bids will be required Nov. 15, 1878, on the payment of which one-half the stock and bonds will be delivered; the remaining 45 per cent will be required Nov. 30, 1878, when the remainder of the stock and bonds will be ready for delivery.

The company reserve the right to reject any and all bids which are not deemed satisfactory.

JAMES A. COWING, Treasurer.

ALEX. FROTHINGHAM & CO., BANKERS AND Stock Brokers, No. 12 Wall st., buy and sell stocks on the New York Stock Exchange and carry the same as long as desired on a deposit of three per cent. Careful attention given to orders for investment from $25 upwards in "Puts" and "Calls," which frequently pay from ten to twenty times the amount invested. Explanatory Circular and their Weekly Financial Report sent free on application.

WHO WANTS MACHINERY!

We have for sale the *Largest and Most Varied Assortment* of Machinery, both NEW and SECOND-HAND, to be found in the hands of any firm in the United States, and we offer at prices far below the market value. Send stamps for our No. 17 PRINTED LIST, fully describing over 1,200 machines with price affixed to each, comprising from one to a dozen machines of each of the following articles, with many others not named.

Anvils	Clothespin Machinery	Hay Presses	Planers, Iron
Ax Handle Lathes	Dovetailers	Horse Powers	Planers, Wood
Bellows	Drop Presses	Hub Machinery	Portable Mills
Belting	Drill Presses	Hoisting Engines	Power Hammers
Blowers	Daniels Planers	Hydraulic Presses	Portable Engines
Brushers	Door Machinery	Irregular Moulders	Printers' Machinery
Band Saws	Edgers	Jacks	Pipe, steam & water
Buss Saws	Elevators	Jig Saws	Planers & Matchers
Bolt Cutters	Extractors	Jack Screws	Portable Grist Mills
Bolt Machines	Emery Wheels	Looms	Rolls
Bobbin Lathes	Engines, 1 to 300 h p	Lathes, Iron	Re-Saws
Boring Machines	Excelsior Machines	Lath Machinery	Radial Drills
Boiler Feed Pumps	Fans	Lathes, Wood Turning	Rivet Machines
Boilers, 1 to 100 h p	Forges	Leather Belts, 2 to 24 i	Ring Spin'ing Frames
Box Board Matchers	Fire Pumps	Matchers	Rubber Belt'g, 2 to 24i
Blind Slat Crimpers	Foot Lathes	Mortisers	Saws
Blind Slat Tenoners	Fire Engines	Mill Spindles	Scales
Box Board Machinery	Friction Clutches	Milling Machines	Shears
Cards	Gearing	Moulding Machines	Saw Mills
Chucks	Grist Mills	Nut Tappers	Saw Arbors
Cupolas	Governors	Nut Machinery	Surfacers
Crushers	Gear Cutters	Pumps	Swing Saws
Cob Crackers	Gauge Lathes	Punches	Steam Pumps
Circular Saws	Grindstones	Pickers	Steam Yachts
Cotton Machinery	Gray & Woods' Plan'r	Pulleys	Steam Gauges
Circular Saw Mills	Hose	Pulp Pumps	Spoke Lathes
Clapboard Machines	Heaters	Power Presses	Steam Hammers

Shingle Mills, Skein Winders, Sash Machinery, Spining Machines, Stationary Engines, Tenoners, Trip Hammers, Upright Engines, Upright Boilers, Vises, Veneer Saws, Victor Lathes, Variety Moulders, Whistles, Wire Rope, Water Wheels, Woolen Machinery, Yachts.

No matter what machine or machines you are in want of, do not purchase until you send for and read one of our LISTS, and see the prices at which we sell. *State fully just what you want.* Address:

NEW YORK.

THE THOMAS PATENT CASH AND TICKET INDICATOR.

This is the only invention which will positively regulate and furnish railroad companies with a full and complete record of all passengers carried on trains, either having tickets, paying cash, or otherwise. As will be seen by the above illustration, it is a box with a glass front. After the conductor takes the passenger's ticket, he punches it and places it in the box, as per example: The passenger's destination is New Brunswick; the conductor punches the ticket, and, as we have stated, places it in the box; upon the arrival of the passenger at New Brunswick, he leaves the train, and another passenger takes his place whose destination is Wilmington; the conductor takes his ticket, punches it, and lifts the lid of the Indicator, when the New Brunswick ticket falls to the bottom, the Wilmington ticket taking its place. The lid is so arranged that it is impossible for the passenger or conductor to again get possession of the ticket, but every passenger can keep his ticket in sight until he arrives at his place of destination. The box is placed between the windows of the car on the panel under the rack. If a traveler is going from New York to Baltimore, the conductor need not raise the lid of the box until the arrival of the train at Baltimore, and then only to put the Washington ticket in. Upon the arrival of the train at Washington, or any station which the proper officer may designate, his agent goes around and collects every ticket or receipt for money collected. As will be seen, not a ticket can be sold or a dollar collected on the train that is not known by every passenger on the car.

American Railroad Journal.

New York, Saturday, October 26, 1878.

Our Trade with Spanish America.

It is time that we cultivate more intimate trade relations with our near neighbors. Spanish America, and by this name is included the whole list of Spanish Republics, Mexico, Guatemala, Honduras, Salvador, Costa Rica, Nicaragua, Colombia, Venezuela, Chili, Bolivia, Ecuador, Peru, the Argentine Republic, Paraguay, Uraguay, with the Empire of Brazil, all these are near enough to us for all purposes of commerce, much nearer to us than England is to them, yet she enjoys almost the monopoly of their foreign trade.

Some statistics published by the British Board of Trade show with what care and energy England has cultivated the trade of Spanish America. Where there was lack of regular communication steamship lines were established, the government granting liberal subsidies whenever necessary for the maintenance of those lines. Everything possible was done to hold and increase trade.

On the other hand we have sat with folded hands, not even attempting to secure the trade of Mexico and the other republics that are our next door neighbors. As for Brazil to whom we pay yearly for coffee between thirty and forty millions, we have made a feeble effort to create a larger trade with her; but the results are not yet apparent.

The Mississippi Valley is nearer to Brazil than New York. The millers of St. Louis directly and indirectly have long enjoyed a very moderate trade in flour with Rio de Janeiro. Recently enterprising manufacturers in the West have made trial shipments of agricultural implements and other wares to Brazil. Commercial travelers have also been sent there, but the result is not yet encouraging because nothing systematic has been attempted. We do not yet understand the wants and requirements of those markets; hence most of our wares either in quality or in style are unsuited to Spanish American wants. There is less change among those people than with us. What was used fifty years ago is still thought to be most desirable in many of their markets. Brazil, however, has adopted the French metric system of measurement. Our cotton cloths measured and branded in yards would not suit a market where only metres are used. So with styles and finish of a multitude of articles which we now manufacture as cheaply as England. But the English manufacturer understanding the requirements of his Spanish-American customer makes his goods accordingly and sells them readily, while our manufacturer knowing little or nothing of his customer's peculiar wants fails to satisfy. First of all the goods must be suited to the trade.

From the official report of the British Board of Trade referred to before, it appears that the total trade of Spanish America for 1875 was $643,923,096. Of this large total England, of course, had the lion's share, as compared with the United States. The exact figures show British exports to Spanish America for 1875 to have been $99,138,677 against exports of $29,182,167 from the United States. Imports for the same year to Great Britain from Spanish America amounted to $129,159,165 against $85,831,502 imported from the same countries into the United States.

These figures show the balance of trade for the year 1875 against England with Spanish America to have been $30,025,488. While the balance against us is nearly twice that, being $56,649,335.

If England finds it to be a wise policy to extend government aid to steamship lines in order to facilitate trade, we must to some extent follow her example or fall behind. It is a hard matter to extend our trade without ships. Our communications with South America are now insignificant and wholly inadequate. Even the little Argentine Republic is favored with some nine steamship lines, but we are not the owners of any one of them.

Here is a fine commercial field at our very doors, shall we enter and cultivate it or leave it to our more enterprising neighbors?

Sale of the Montclair Railroad.

The Montclair and Greenwood Lake Railroad of New Jersey, having defaulted on its bond interest, and being in other respect a losing concern to its shareholders, was sold under foreclosure about two weeks ago, for $160,000, the names of its actual purchasers being withheld at the time.

The Bondholders had previously arranged to save themselves by reorganizing the company after buying it in at the sale, and to this end an assessment of five per cent had been levied and a committee for purchase and reorganization appointed, consisting of the heaviest bondholders, among whom were Cyrus W. Field, Abram S. Hewitt, A. W. Benson, and others. At the evening previous to the sale, if the information received on this point is reliable, and it is given on credible authority, the gentlemen constituting the committee for reorganization sold their Bonds to the Erie Company for fifty cents on the dollar, arranging not to bid against the company at the sale of the road. These bonds, with the $156,000 paid for the road, cost the Erie Company a round sum of $450,000, for which amount they acquired possession of the line and a controlling interest in the bonds.

The holders of the second mortgage bonds and those of the first mortgage who were not fortunate enough to be on the purchasing committee, bitterly complain of their being thus ignored by the gentlemen they deputed to act for them, and

who they say simply used their position to save themselves, leaving their fellow bondholders out in the cold. The circumstances appear to give these complaints much weight.

The Erie Co. will continue their new purchase from its present terminus at Penhorn creek, where it now joins a short and independent line connecting it with the Pennsylvania Railroad, to their Jersey City Terminus through their new tunnel, cutting off its connection with the Midland and Pennsylvania Railroads. The want of proper terminal facilities was one principal reason why the Montclair Railroad was unable to be run with profit.

Louisville and Nashville Railroad.

To the Stockholders of the Louisville and Nashville Railroad Company:

The President and Directors respectfully submit their report of the management of the Louisville and Nashville Railroad Company during the fiscal year ending June 30, 1878.

The bonded debt, as per last report, was		$16,484,230 00
Cecilian Branch Mortgage bonds issued during the year		1,000,000 00
		$17,484,230 00
Redeemed—		
Memphis and Ohio Railroad Income bonds	$1,500	
Mortgage on main office, lot, and building	10,000	
Memphis, Clarksville and Louisville Mort. bonds	32,010	
		43,510 00
		$17,440,720 00
In this is included City of Louisville bonds, without mortgage		850,000 00
		$16,590,720 00

We have also reduced the bonded debt of the Nashville and Decatur Railroad Co. by the payment of twenty of its First Mortgage bonds into the Sinking Fund, and the bonded debt of the South and North Alabama Railroad Co. by the purchase of sixty-eight thousand dollars of its Sterling bonds for the Sinking Fund.

The net earnings of the Louisville and Nashville R. R. Co. for the past year were	$1,708,675 84
The interest on the bonded and floating debt of same	1,024,284 35
Showing surplus earnings of	$684,391 49

Semi-annual dividends of 1½ per cent upon the capital stock have been declared, amounting to $270,174.

NASHVILLE AND DECATUR RAILROAD CO.

The gross earnings were	$737,756 37
Operating expenses	400,111 82
Net earnings	$337,644 55
The net earnings last year were	262,845 37
Increase 1877–78	$74,799 18

The interest and dividends for which the Louisville and Nashville Railroad Company is liable have been paid, and are as follows:

Interest on bonded indebtedness	$149,501 79
Hire of engines and cars	84,682 71
Dividend on stock	98,553 44
	$282,737 94
Net earnings	337,644 55
Showing a surplus of	$54,906 61

The amount charged to the construction account of the road during the past year was $21,966 65; during former years, $281,159 20—making a total of $288,125 85, which is to be reimbursed at the end of the lease.

SOUTH AND NORTH ALABAMA RAILROAD CO.

The result of the operation of this road during the past two years has been as follows:

	1876-77.	1877 78.
Gross earnings	$758,682 01	$844,688 87
Operating expenses	560,825 81	551,039 99
Net earnings	$197,856 20	$293,648 88
Interest paid on bonded debt	$345,930 96	
Hire of engines and cars	74,466 17	
	420,397 13	
Deficit	$126,748 25	
Amount advanced on construction account	45,215 52	
Sixty-eight Sterling bonds	62,666 77	
Advances and interest on old account	95,055 54	
Total amount advanced during the year	$329,686 08	

GENERAL REMARKS.

Another year of financial depression has been added to those already passed, and still your road has continued to improve in prosperity.

The list of mercantile failures during the past year is larger than ever before, and all business circles have been affected to a serious extent, but your road has not failed to keep pace with the ratio of annual increase in prosperity which has marked the results attendant upon its operation during the past few years.

In 1872–73, the fiscal year previous to the panic, the gross earnings of the various lines operated by the company were $6,106,051 84, and the net, $1,484,047 87; in 1873–74, the gross earnings were $5,510,695 45, and the net, $1,565,382 34; in 1874–75, the gross earnings were $4,863,873 80, and the net, $1,682,182 84; in 1875–76, the gross earnings were $4 961,490 29, and the net, $1,967,960 05; in 1876–77, the gross earnings were $5,315,826 80, and the net, $2,140,520 28, and in the past fiscal year the gross earnings were $5,607,598 48, and the net, $2,344,242 42, or $860,195 05 more than in the year preceding the panic.

This result in brief shows that the net earnings of your road have increased 58 per cent since the panic, and as the advance has been stable and uniform in its character, it certainly demonstrates the enhanced value of your property since that time.

These results have been reached with low rates of freight unparalleled in the history of your road.

To show the low rates at which we are carrying traffic compared with preceding years, it is only necessary to notice the fact, that in the year before the panic we carried 177,466,795 tons of freight one mile, while in the past year we carried 224,654,030, or an increase of 47,187,235, or 26 per cent more traffic for considerably less revenue.

In accomplishing this, the road has in the meantime not been allowed to deteriorate, but its physical condition has been improved at least 50 per cent.

In producing the results placed before you in this report, the management believe its success due to the strictest economy and the most careful supervision in every department by the best skilled officers that can be commanded—a policy from which the management do not think it safe to depart in the future.

During the past few years the management has paid much attention to the development of the local traffic of the road. It has encouraged manufactures along its lines, and the results have proven the wisdom of its efforts in the large increase in the local traffic, and it is believed that this policy should be continued.

* * * * * *

Your Main Stem, extending from Louisville to Nashville, will compare most favorably with any road in the country. It is almost entirely laid with steel rail, thoroughly ballasted, and all its appointments are in perfect keeping with a first-class road.

The Branches and the Memphis Line are also in good condition, and, as feeders to our Main Stem, play an important part in our system.

The Cecilian Branch, which we have operated since January, 1877, has proven to be a wise investment. The receipts have increased largely, in many cases doubling those of the corresponding month of the previous year. Its purchase was made with the single idea of protecting our Main Stem against a ruinous competition continually threatened by a chain of bankrupt roads, which had it in their power at any time to very materially reduce our revenue without great danger to themselves. Not only has protection against this competition been firmly, and it is believed permanently secured, but the purchase has yielded us sufficient additional revenue for the large payments made on the road.

We also pass a large business over the Main Stem between Louisville and Elizabethtown, which when the Cecilian Branch was owned by the Louisville, Paducah & S. W. Road, was naturally diverted over the Branch. This business is worth to us over $50,000 net annually.

We take pleasure in stating that the Nashville and Decatur Road has, during the past year, earned its operating expenses, the interest upon its bonded indebtedness, the sinking fund, etc., and yielded us a surplus of $54,906 61.

The South and North Alabama Road has also made the usual improvement. In 1876-77, the gross earnings were $758,682 01; in 1877-78, $844 688 87, an increase of $86,006 86. The operating expenses in 1876 77 were $560,825 81; in 1877-78, $551,039 99, a decrease of $9,793 82.

To show more clearly how this road has improved in earning capacity since its construction, a comparison of its operation in the first and the last fiscal year may prove interesting. In 1873-74, the first full year of the operation of this road, the net earnings were $95,579 94; in 1877-78, $293 648 88, a difference of $198,068 94.

As the annual deficit of the South and North Alabama R. R. Co. bears an important relation to the general finances of the Louisville and Nashville R. R. Co., the comparison cannot fail to be gratifying.

Substantial improvements have been made along the line of your roads during the past fiscal year. A commodious passenger station has been finished at Montgomery, a new depot constructed at Columbia, a new iron bridge at heavy cost has been thrown over Duck River, and several minor structures have been erected.

Better accommodations at Nashville and Memphis are needed, and steps have already been taken toward procuring the same in the former city.

On all our roads we have laid large quantities of steel rail during the past year.

The former management of the road, in the year before the panic, having every reason to expect a large increase in traffic, contracted with the Rogers Locomotive Works for a number of locomotives specially adapted to our road. The panic coming on, and our business falling off very materially, the locomotive builders agreed to postpone delivery of fifteen of these engines. By the terms of the contract, as afterward adjusted, we received a number of these locomotives in the past fiscal year, and although our motive power was more than ample, we believe that the volume of traffic on our road will soon reach proportions that will make these engines available to us.

We have, during the past year, built for the South and North Alabama Railroad the Wetumpka Branch. The road extends from Elmore to Wetumpka, a distance of seven miles. Its construction was demanded by a contract the South and North Alabama Railroad Company made for important advantages secured to itself in past years. The road penetrates to the center of a rich and fertile valley, and will be a valuable feeder to our system.

At the close of the year negotiations were in

progress, and have since been concluded, for the construction of that part of the Cumberland and Ohio Road between Lebanon and Greensburg, Ky., about thirty-one miles in length. This road in its entirety was originally intended as a competitor of our own for valuable business, but its projectors failed for want of means after expending about four million dollars, and it having been thought desirable that our company should control the portion of it stated, and which had been offered us, a lease of twenty five years was effected. By the terms of the lease we acquire the middle portion of the road, upon which about $1,600,000 has already been expended, and to complete which it will take about $180,000, for which sum we are secured by a first and only mortgage of $300,000 on the road. The road penetrates a rich, fertile country, capable, under this new stimulus, of yielding a great traffic, not only to the projected road itself, but to others in our system.

During the past year this company had added to its Bonded Debt one million dollars. This amount was placed in a mortgage on the Cecilian Branch, 46.3 miles long. The amount of the mortgage is very small for the property covered, it originally costing over two millions. This bond has not yet been placed upon the market, nor will it be until a fair price can be obtained.

We have during the past year extended aid to the Brownsville and Ohio Railroad Company, which is building a road from Brownsville to Friendship, Tenn. Part of this road has already been built, and the whole, when completed, will form a valuable feeder to our system, as it penetrates a rich, agricultural country.

The subject of emigration still continues to be an object of interest with the company. The great success of the colony of Cullman, described in former reports, still continues. All the settlers are prosperous, and many of them, in the short time since the founding of the colony, have achieved wealth. The great prosperity of this colony has induced the settlement of others contiguous to it, the most promising of which is Garden City, thirteen miles below Cullman. A few settlers arrived at this place in December; they were followed by others in February, and now there are over seventy-five families located at this place. This colony has a very flattering prospect before it. The settlers are Germans from Chicago and the Northwest, and they are untiring in their energy and industry. With these two thriving colonies in North Alabama as a nucleus, it is believed that, in the next few years, we shall have a large, thriving population on the line of the South and North Road, and it is the opinion of your management that the liberal course it has pursued toward these settlers should be continued.

North Alabama is situated so far above the level of the sea, that while it has a moderate temperature during the whole year, it has been, and of necessity must be, free from those epidemics which are, periodically, a terror to other portions of the South.

The coal and iron interests on the line of the South and North Alabama Railroad, upon which that road so much depends, are advancing very materially. New mines are opening, and the Eureka Company, the pioneer in the manufacture of iron in that section, has added largely to its interests in North Alabama. Its works at Oxmoor and Helena are of the most extensive character, and the amount of product they turn over to our line for transportation forms a very important element in our revenue.

The coal and iron on the line of the South and North Alabama Railroad is practically inexhaustible, and as fast as new markets can be opened the product and our revenue will be largely increased.

In conclusion, your directory feel that they may justly congratulate the stockholders upon the improved condition and future prospects of their property. The country along our line is increasing in prosperity and population, new feeders to our lines are continually opening up new and fertile sections of country, and our receipts are now, and we believe ever must be, ample to meet all fixed charges and yield a surplus which we have no reason to doubt will annually increase until, at no distant day, your property will reach a value in earning capacity second to none in the country.

Respectfully submitted.

E. D. STANDIFORD, President.

New York and New England Railroad.

In the United States Circuit Court at Hartford, Conn., on the 18th inst., in the suit of the New York and New England Railroad Company to obtain possession of the Hartford, Providence and Fishkill Railroad, Judge Shipman made a final decree, granting immediate possession. The Trustees of the Hartford, Providence and Fishkill mortgage of $2 000,000 accordingly transferred the property to the New York and New England Railroad Co., and it is now operated by that company. The $500,000 mortgage held by the City of Providence has been paid; all the floating debt has been paid, and cash deposited in bank to pay the bonds not yet presented.

The New York and New England Railroad Company has now a line of 150 miles, from Boston to Waterbury. It also obtains control of the Providence Division, from Willimantic to Providence, 58 miles; also, of the Boston and Woonsocket Railroad, 34 miles, and the Stockbridge Branch, 18 miles, making 260 miles in all. It leases, besides, the Norwich and Worcester and the Rhode Island and Massachusetts Railroads. The corporation has out $3,400,000 of bonds, covering all its possessions, including the uncompleted portion of the road between Waterbury and Fishkill. Mr. Clark, the manager, says that no more bonds will be issued except for the development of the line westerly, and that it will require only about 60 days to put the road in running order to the Hudson River. It is not probable, however, that anything will be done before Spring. The amount of bonds the company has the right to issue is $10,000,000. Old Berdell bonds are now convertible into stock of the new company. The managers expect in a few days to put on through trains from Boston to Hartford, and connect there with the New York, New Haven and Hartford Railroad.

Australia's International Exhibition.

An intimation of Australia's intention to hold an international exhibition in 1880, has been forwarded to us by Mr. G. C. Levey, the Secretary of the Commission from the Colony of Victoria to the Paris Exhibition.

The high appreciation American manufactures are held in by our neighbors in Australia and New Zealand has led to an extensive export trade from our Pacific ports to those countries, and our merchants and manufacturers will not fail to improve these friendly relations by contributing a liberal display of their several specialties to the forthcoming Exhibition. Whatever the political ties which bind the Australian Colonies to their mother country, we cannot forget that as they are nearer to us in vicinage, so their institutions are more in harmony with our republican spirit than with any other. These fraternal feelings are worthy of cultivation for their own sake as well as for the commercial intercourse they promote, and on these grounds we must do our share towards making the Exhibition a success.

An illustrated paper accompanying Mr. Levey's note gives a sketch of the Exhibition buildings, which appear to be fully worthy of the handsome metropolis of the Colony of Victoria where they are being erected.

Gas Statistics.

Whether the electric light can or cannot be made an effective substitute for gas light is a question which appears to be rapidly approaching a solution unfavorable to the carburetted hydrogen which has so long stood us in good stead. However it may eventuate the public gains by the discussion, since they learn that gas can be supplied to them at a much lower rate than that they now pay and yet leave a handsome profit to the manufacturers.

That this is not a mere theory is proved in a most practical manner by the proceedings of a new gas company whose works are now being built in the upper part of this city and which is contracting to supply all its customers at the rate of $2 per thousand feet in place of $2 50 and $3 charged by other city companies.

A similar healthy competition in London combined with a fear of electric developments which are farther advanced there than here, has compelled one of the largest of the illuminating companies of that metropolis to reduce its price from $1 08 to 84 cents per thousand feet. This price is so much below the lowest price charged here that we must look for its cause rather in the greater economy in the manufacture and distribution of the gas, than in the difference in cost of the coal from which it is extracted. In our next issue we propose indicating the points in which our processes fall behind the English makers. That the concentration of a large supply in the hands of a single association is favorable to these economics is evident from the recent report of the Gas and Coke Company of London. This company during the first half of the current year converted 540,000 tons of coal into 5,587 million feet of gas from which they collected a gross rental of $6,250,000. The first cost of their coal was $3 80 per ton; but, as they sold the residual products of each ton for $2 14, the net cost of each ton was reduced to $1 66. As each ton yielded 10,348 feet of gas which sold at 84 cents per 1000 feet, the gross receipt for each ton converted into gas was $8 67 or $7 01 gain over the net cost of the coal. The gross rental of $6,250,000 referred to above was gained before the reduction in the price of gas.

☞ The directors of the Straitsville Central Mining Co., recently elected, are: J. S. Farlow, J. T. Burr, J. S. Pierson, J. Atkinson, H P. Clough, J. A. Jeffreys, J. C. Buxton, and J. L. Moore. H. P. Clough, of Middletown, Ohio, was elected President, and J. A. Jeffreys, of Columbus, Secretary and Treasurer.

☞ The Hanover, Penn., Spectator says that operations have been resumed on the Hanover Junction and Susquehanna Railroad. In about two weeks the grading will be completed, when the work of laying the rails will commence, and be pushed rapidly forward to completion.

☞ Essex, Conn., has voted to call in $48,000 of bonds issued to help build the Connecticut Valley Railroad, and to place them at a lower rate of interest, saving the town about $500 a year.

Boston, Revere Beach and Lynn Railroad.

At the annual meeting of the Boston, Revere Beach and Lynn Railroad Company, held in Boston on the 17th inst., the following board of directors was elected: Edwin Walden, John G. Webster, John B. Alley, Edward Tyler, David Loring, T. B. Dix, Henry Breed, David L. Webster, Chas. W. Slack, A. B. Martin and N. Gibson. President, Edwin Walden; Treasurer, John G. Webster; Clerk, John A. Tenno.

The report of the Treasurer, which was presented showed that the total receipts had been $121,264 98, the total expenses $83,940 96, and the net earnings $37,324 02. The expenditures to date for construction had been $397,447 52; for equipment, $94,869 67; for ferry, $109,618 23; for real estate outside of location, $26,000—total, $627,435 42. The capital stock is $349,200; the total debt $244,518 95, less cash and assets, $26,325 01, leaving balance of debt incurred for construction, $218,223 94; balance of profit or surplus, $60,011 48—total, as above, $627,435 42. In making his report, Mr. Parker said that the business of the year had been up to the average, and that the condition of the road warranted the belief that the company would soon be able to pay regular dividends. The business of the road this year has been very good, the receipts larger and the expenses smaller. It has outlived the prejudice with which it was first met. The roadbed is in a better condition than ever, sixty tons of steel rails were laid during the year, and hereafter steel rails alone will be laid. The claims for land damages are practically settled, and at a cost much within the estimate. The President said in answer to a question, that the construction account had been increased by the purchase of the new ferry boat in part, the payment of land damages and the improvement of the tunnel, and that so far as he knew there would be no call during the coming year for an increase of the construction account. He said further that he had been over the road carefully on foot, and had come to the conclusion, from his own observations and the statements of more experienced men that the road was better by $50,000 than it was three years ago. He explained the depreciation account of $16,087 95 to be caused by the loss on the old ferry boat, the loss on the sale of a locomotive which was not suitable to the company's use and the loss on certain notes which were given to the company as a gratuity on condition that the road was built, and were not paid.

Concerning the funding of the debt the President stated that it had been found that any bonds issued by the company would have to be sold at a discount; that instead of doing so, an arrangement had been made by which the whole debt was carried by banks and individuals at eight per cent for twelve months; that those notes would mature next month, and that they would then be renewed at seven per cent. The company needs $250,000, and if that sum could be funded at six per cent there would be no reason why the stock should not be worth par, and be as good a six per cent stock as there is in the market. He felt confident that unless there should be a great change in the money market the funding could be carried out successfully in a short time. He was of the opinion that the summer business of the road could be very much increased if a large building were erected somewhere on the beach where necessary holiday supplies could be obtained at a less cost than at the hotels; and he believed that it would pay the company to expend $25,000 for the erection of such a building. He said further that there was no competition with the Eastern Railroad, that the feeling in Lynn toward the road was excellent, and that in October, 1878, the receipts from season tickets from Lynn were double what they were in October, 1877.

Quarter Master General's Report.

The annual report of Quarter Master General Meigs to the Secretary of War, recently completed, contains a large amount of statistical information and makes several recommendations of importance. The total requisitions from his office during the fiscal year ending June 30, 1878, amounted to $12,792,603. The department moved during the year 79,260 passengers, 11,400 beasts and 109,261 tons of military material.

The Indian disturbances and labor riots made the presence of considerable bodies of troops necessary in May in different places, and the smallness of the army necessitated extensive and expensive movements in order to have sufficient force at the threatened points. Marches of 800 to 1,000 miles were common, and several of 1,800 miles, two of 3,000 and one of 4,800 miles were made. The largest movements were made by the Pacific railroads, and the appropriation for transportation was not large enough to liquidate their accounts. General Meigs therefore recommends that Congress should make a deficiency appropriation of $825,000 to settle the accounts for the past year's service.

He says that the operations for the department are embarrassed by the action of Congress relative to land grant railroads, to none of which can money be paid till the conclusion of a suit before the courts. As the principles and claims involved have been finally acted on by the Supreme Court and judgment in favor of the roads on the rates heretofore fixed by the War Department has been given in every case finally decided, it is thought that it would be wise and just to repeal this restrictive legislation and allow the railroad accounts to be settled like other accounts for military service, without imposing on the companies the delay and expenses of formal suits hereafter in court, the principles involved in which have been already decided in their favor.

The several Pacific railroads have earned by military transportation during the fiscal year $895,000. Their total earnings for this service have amounted to over $9,000,000. Seventy contracts were made during the year for transportation by teams and 76,559 tons of supplies were transported in this manner. Thirty-three thousand and eight passengers and 56,000 tons of stores were moved by water. The cost of transportation on the Upper Missouri to supply the posts in the Sioux country continues great, compelling increases of rates, and the rate is diminishing from year to year, but the supplies needed continually increase, though a reaction of the increase is expected before many years, with the establishment of communities able to protect themselves against the savages.

Two thousand, two hundred and fifty one horses and 1,162 mules were purchased by the department during the year at an average cost of $117 for the former and $130 for the latter. There were 11,875 horses and 9,688 mules in the army on the 30th of June, and the forage consumed was as follows: 892,000 bushels of corn, 1,100,000 bushels of oats, 136,000 bushels of barley, 37,000 tons of hay and 2,500 tons of straw. The purchases of fuel amounted to 77,000 cords of wood and 38,000 tons of coal.

The work of investigating claims for quartermasters' stores furnished during the war of the rebellion has been resumed under the act of July 4, 1864, and the appropriation of last November and 2,222 claims were disposed of during the fiscal year. Of these there were 1,355 (claiming $1,741,197) totally rejected, and those which were allowed were reduced from $692,876 to $355,084. There remained on file June 30, 11,670 more of such claims, aggregating $5,960,172. The average cost of investigating the claims disposed of was about $30 each. In addition to these claims (which originated in the border States) and irrespective of many thousand claims there are about twelve thousand unsettled claims on file, calling for about $7,000,000, not affected by the act of July 4, 1864, which requires proof of loyalty, etc.

The Quartermaster General invites attention to the danger of destruction by fire of these and many other records of great value to the government and its citizens, and urges that a cheap but fireproof building be constructed as a hall of records convenient to the more elaborate and costly buildings occupied by the Executive Department, and thus to guard against such losses as lately occurred at the Patent Office. He submits a plan of such a building, to cost about $100,000, and proposes that the records not in daily use of the several departments be stored in it, under charge of competent superintendents, to be properly filed and easy of access on receipt of telephonic orders, etc.

Western Maryland Railroad.

At the annual meeting of the stockholders of the Western Maryland Railroad Company, held in Baltimore on the 16th inst., the following gentlemen were elected directors for the ensuing year: John K. Longwell, Carroll county; Joshua Biggs, Frederick county; George W. Harris, John Welty, and C. W. Humrichouse, Washington county. The directors on the part of the city are Samuel H. Adams, Christian Devries, Daniel J. Foley, E. G. Hipsley, Nicolas G. Penniman, J. Alex. Preston, Alexander Rieman and George M. Gill.

Mr. J. M. Hood, President and General Manager, submitted his report for the year ending September 30, 1878, which was accepted and ordered to be printed.

This report shows gross earnings from passengers $140,925 70, freight and express $180,778 09, milk and marketing $17,934 88, mails $6,098 12, miscellaneous sources $1,474 84—total $347,201 63.

Operating expenses: transportation department $121,733 89, machinery department $35,070 31, road department $45,072 32, general expenses $15,398 91—total $217,275 43. Net earnings, $129,926 20.

Compared with 1877, the gross earnings show an increase of $15,115 76, with a decrease in expenses of $2,665 16—making the increase in net earnings $17,780 92.

The above statement of gross earnings, $347,201 63, does not include $29,317 61 earned upon the tracks of other roads east of Fulton Station, the "trackage" or tolls paid by this company being identical with the rates charged the public for the service. In 1877 the amount so earned and paid over was $28,214 95, and in 1876 $25,486 32.

There were moved during the year 368,956 passengers and 136,021 tons of freight; making an increase over 1877 of 29,845 passengers and 4,654 tons of freight. The average rates of transportation received during the year were 1.9 cents per passenger per mile, and 3.48 cents per ton per mile. The average earnings per mile of road for the year have been $3,857 80. The report says:

Important progress and large expenditures have

been made in strengthening the equipment, increasing depot, siding and other facilities, substituting steel for iron rails, introducing permanent structures for temporary or perishable ones, ballasting with stone, increasing excursion facilities, etc. In this manner $72,870 16 of the net earnings have been applied, and it will be found advisable to pursue the same course for several years to come, in order to place the road under the most favorable condition for safe and economic operation. About $9,000 have been expended in constructing the sheddding at the railroad, the pavilion and restaurant at Penmar Park, the observatory at High Rock, the supplying of steam and other pumps, tanks, cisterns and other conveniences at both points, cleaning up the grounds and constructing a first-class carriage road along the mountain side from Waynesboro' Station to High Rock, a distance of two miles. A hotel company will soon establish a first-class mountain resort for those desiring to spend their summers in this attractive region.

The matter of the purchase by the city of the second preferred bonds of the company, which has already been brought to the attention of the mayor and city council and the city finance commissioners, has much to commend it, and the directors on the part of the city will be prepared at the proper time to present the matter and show the important advantages the city may thus gain. During the year important progress has been made upon the Baltimore and Hanover and the Baltimore and Cumberland Valley Railroads, and there is every reason to believe that the influence of both, as operating roads, will be felt by this company before the close of another year.

The Home Insurance Co.

If we were asked to name the best work on the fire insurance business of this country, we would unhesitatingly recommend the inquirer to read the records of the Home Fire Insurance Company for the twenty-five years it has been in existence.

The formation of this company in 1853 marked an epoch in the history of fire insurance. Previous to its existence, small capital and mainly localized operations, were the distinctive features of companies underwriting risks by fire. The result of this timidity was that any extensive conflagration generally swept away the local corporations and left a double array of ruined merchants and bankrupt stockholders.

The aim of the spirited promoters of the Home Company was to diminish the average of loss by increasing the area of risk and by the medium of agencies all over the country, to gather so extensive a support that local losses, however heavy, could bear no undue proportion to the corporation's annual income. In this way and in this way only could there be anything like an absolute guarantee that a sudden collapse would not follow such fires as those of 1835 and 1845 which wiped out so many of the fire insurance companies in this city at those dates.

The condition of the Home Insurance Company to-day is a striking evidence of the sagacity of what was then considered a bold and hazardous experiment. Early in the field, it widened a pathway which hundreds have since followed, and it now stands pre-eminent in a competition which its own brilliant success has been the means of provoking.

We are pleasantly reminded of these facts by the eloquent address of Mr. Charles J. Martin, the indefatigable President of the Company, delivered at a festive gathering of its Board of Directors held in April of this year to commemorate the completion of the first quarter century of the company's existence.

The private nature of that entertainment accounts for Mr. Martin's graphic sketch of the company's career not having obtained at the time, the publicity it merited. The condensed and comprehensive form in which Mr. Martin presented the facts, rendered it well worthy of being retained in a permanent shape; and it is, therefore, in a handsomely bound libretto that we now have Mr. Martin's suggestive statement before us.

From the day the company opened its offices to the time of the great fire of Chicago, its record was one of large semi-annual dividends and of constant additions to its surplus, which not even three dividends in one year, amounting to 35 per cent in all, was able to reduce to moderate dimensions. The rapidity with which these undivided earnings increased is indicated by Mr. Martin's statement that in July, 1870, five hundred thousand dollars were taken from this fund and placed to the capital account, each stockholder receiving his pro rata in shares; and that in January, 1875, another half million was added to the working capital from the same source, this last increase raising the capital to three millions and forming a bonus to the stockholders of one share to every five then held by them.

Even after the capitalization of these large sums from undivided earnings, there remained a surplus of over a quarter of a million dollars, which had increased at the close of last year to the generous dimensions of $1,016,703.

The great fire of Chicago was but a slight check in the company's career of prosperity.

An assessment of a million and a half on that occasion, to restore the capital, was met by the stockholders in a spirit which showed their appreciation of the management of the company.

Within ten weeks after that national calamity which ruined so many of the fire associations of the country, the Home had paid nearly three millions of dollars to its insurers, and, with the assessment paid by the stockholders, remained in possession of an unimpaired capital. After this splendid evidence of stability and pluck, no wonder that its patronage was enormously increased.

The Boston great fire, a year after, which cost it three quarters of a million, while it brought down many companies which had staggered through the Chicago calamity, simply advertised the advantages of insuring in the Home. Many of our Boston readers who were policy holders in the Home at that time, have grateful memories of the readiness with which the amount of their policies was paid by that company.

It is impossible to dissociate the unexampled success recorded in Mr. Martin's address, from the kindred question of management. In this respect the Home has been most fortunate in enjoying the services of men whose ability and integrity are demonstrably of a high order.

We get a clue to this exceptionally good fortune in Mr. Martin's remark that liberality is the company's maxim, both in its payments to its servants and in its treatment of its policy holders.

Every word of Mr. Martin's statement is a proof of the company's wisdom in this respect and is moreover a higher compliment to the value of his own services, than the most labored panegyric could afford.

How thoroughly identified Mr. Martin is with the birth and subsequent prosperity of the company may be gathered from the fact that he made out and signed the first policy ever issued by the company, and after a lapse of twenty five years we find him recounting from his own personal knowledge and experience, every notable fact connected with the corporation during that long interval.

The history of Fire Insurance is now recognized as an important branch in the study of our domestic and social economy. We commend this record of the Home Company as one of the best exponents of its value ever published.

An Elevated Railroad for Boston.

The remarkable financial success which has attended the working of the Elevated Railroads of this city on the short sections they are now operating, has stimulated the formation of plans for similar constructions in other cities. Boston is the first to follow the example of New York. A charter is being applied for there for the construction of a rapid transit street railroad, on the plan of the Gilbert or Metropolitan Elevated Railroad of this city. Charlestown, Cambridge and the Highlands are the proposed termini of the road, which is estimated to cost $200,000 per mile. The capital of the company will be $2,000,000. Mr. M. F. Fowler, a well known citizen of Boston, and a relative of Cyrus W. Field of this city, is a promoter of the enterprise.

☞ The gross earnings of the Chicago, Burlington and Quincy Railroad for the month of August, 1878, were $1,682,207, the expenses $679,829, and the net earnings $752,878; for the month of August, 1877, the gross earnings were $1,330,248, the expenses $574,891, and the net earnings $755,857—showing an increase in gross earnings of $301,959, in expenses of $105,438, and in net earnings of $196,521. For the eight months ending August 31, 1878, the net earnings were $3,990,992, against $3,301,904, for the corresponding eight months of the previous year—an increase of $689,088.

☞ At the annual meeting of the stockholders of the Cincinnati, Sandusky and Cleveland Railroad Company, N. W. Percival and John Atkinson of Boston, and J. A. Jeffrey of Columbus, were unanimously elected directors for the ensuing three years. At a subsequent meeting of the directors J. S. Farlow, of Boston, was re-elected President; N. W. Pierce, of Boston, Vice President; and John L. Moore, Secretary and Treasurer.

☞ The directors of the Coney Island and Brooklyn Horse Railroad Company, elected on the 21st inst., are: E. C. Bogert, John A. Buckingham, Samuel Burhans, jr., Edgar M. Cullen, E. J. Denison, William Johnston, C. J. Lowry, W. C. Kingsley, Samuel McLean, George L. Nichol, W. H. Guion, Franklin Woodruff and Edward D. Peters.

☞ A company has been organized, with a capital of $2,000,000, to construct a narrow gauge railroad from Jacksonville, Oregon, to the Pacific ocean, a distance of 100 miles.

Kansas Pacific Railway.

A telegram from Leavenworth, Kansas, to the Kansas Pacific Railway headquarters at St. Louis, dated October 22d, says that Sylvester T. Smith, Auditor of the Kansas Pacific Railway under the late Receivers, was appointed Receiver of that road by Judge Foster, of the United States Circuit Court on that day, in place of Carlos S. Greeley, resigned, and H. Villard, removed. The appointment of Mr. Smith was made in pursuance of a request to the court signed by A. L. Williams, attorney for the Kansas Pacific Railway; Messrs. Hitchcock, Lubeke and Player solicitors for the complainants; Wallace Pratt, attorney for the Denver Extension bondholders, and T. A. Hurd, attorney for Adolphus Meier, constituting all the representatives of the complainants and defendants in the case.

Statement of the Public Debt of the United States, October 1, 1878.

Western Pacific bonds, 1862-4	1,970,560 00	29,558 40
Sioux City and Pacific bonds, 1862-64	1,628,320 00	24,474 80
Totals	$64,623,512 00	$969,352 68

Interest paid by United States, $39,835,039 84; interest repaid by transportation of mails, &c., $16,279,181 35; balance of interest paid by United States, $23,555,858 51.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

* This amount includes $41,500,000 Five-twenty called Bonds not yet matured, against which a like amount of 4 per cent Bonds have been issued and are embraced in this statement, and the amount included in the coin balance.

☞ The directors of the Central Park, North and East Rivers (Belt Line) Railroad Company, elected on the 15th inst., are: Frank Curtiss, G. Hilton Scribner, Thurlow Weed, Augustus L. Brown, David Dows, Benjamin H. Hutton, Henry D. Coppet, Henry W. Smith, John T. Terry, Edward Weston, Abijah Curtiss, Charles Dana and Curtiss, president; G. Hilton Scribner, vice president; Heber R. Bishop. The officers are: Frank Curtiss, president; Johnson L. Valentine, treasurer; C. Densmore Wyman, secretary, and E. W. Hindes, superintendent.

☞ Judge Choate, of the United States District Court, has discharged Duncan, Sherman & Co. from bankruptcy. Some objection was made by a number of the creditors. The Judge's decision was in these words: "No evidence is offered that sustains the specifications of the opposing creditors. Discharge granted."

☞ Surveys are being made of South Lawrence, Mass., preparatory to the proposed entrance of the Lawrence and Lowell Railroad into that city.

American Railroad Journal.

Saturday, October 26, 1878.

Financial and Commercial Affairs.

The week has been an unsatisfactory one. A feeling of uneasiness has prevailed, due in large part to the panicky feeling reported from British money centres. The Bank of England, however, has not raised its rate of interest which remains at six per cent as at our last report. But the peculiar state of the general market abroad has checked the free movement of breadstuffs and cotton temporarily until a more confident feeling is restored. Gold is arriving at New York from Paris in payment for shipments of grain and flour already made. Foreign wants will be supplied from our markets largely until an absolute panic prevails there, which we trust and believe there is now slight ground to fear.

The failure of the Bank of the City of Glasgow proves now to be quite as disastrous as first reports made it. The Directors have been arrested and there is a vigorous clamor for their criminal prosecution by the indignant and virtuous British public. There is no doubt the management of this broken bank made "cats and dogs" of the funds in their hands; but had the twelve per cent dividends paid to the stockholders only been earned, even by speculation in its wildest form, those unlucky Directors would now be treated with the respect due to shrewd financiers. Public opinion in moral Scotland and elsewhere makes success respectable and failure criminal.

Since our last report a single large failure in the Dry Goods trade has occurred. Messrs. Dodd, Brown & Co., of St. Louis have suspended with

liabilities estimated at $1,500,000. With one exception, this house was the largest west of New York; their field of trade covering a vast region of the West and Southwest. The cause assigned for this suspension is the failure to make collections in general, but especially in the Yellow Fever districts. It is now believed that at the worst this will only be a temporary suspension; and we trust this may prove true. The debts of Messrs. Dodd, Brown & Co., are due almost wholly to New York commission houses.

A sharp frost covering nearly all the territory afflicted with Yellow Fever has brought that scourge to an end. We may now look for a rapid revival of trade in the South. The free distribution of merchandise for the winter will now commence, while the movement of cotton, heretofore checked largely, will be equal to all requirements.

A fair activity has characterized the dealings for the week at the Stock Exchange. The active list has not been increased but changes have brought stocks into some prominence which have been hitherto neglected. The sales on Saturday were 121,000 shares; Monday, 150,000; Tuesday, 142,000, and Wednesday, 174 000.

Boston advices report an easy Money market. There is abundance of funds now offering for all legitimate purposes. No change in rates for money can be named. Prime business paper is done at about 4 per cent. The highest grades of manufacturing paper passes readily at 3½ per cent. Balances at the Clearing House at the close were abundant, ruling at 2½@2 per cent—the rate drooping. Dealings in Stocks were large and the market reported fairly active.

Philadelphia reports show a moderately active Stock market, with prices slightly higher than our last quotations. Pennsylvania Railroad shares sold at 33¼ at the close, ranging from 32⅞ to 33⅝ during the day. Reading Railroad quoted at 13⅝@14 with a drooping tendency. Money is unchanged. Call loans are made at last quoted rates—3@4 per cent for strong names. Prime commercial paper is passed at 4½@5 per cent. Four months and longer date paper at 5@5½ per cent. The distribution of merchandise is now fair for the season. The general trade is not large in amount as compared with more prosperous times, but is upon the whole satisfactory.

From Baltimore there are complaints of an unsettled and dull produce market. Unfavorable European advices have operated to check exportation and lower prices. It is hoped this condition is but temporary. Money, as heretofore, is quoted easy and abundant. Stocks are dull, and Baltimore and Ohio R. R., ex-dividend common stock, is lower. Dealings were small with 82@82½ quoted at the close. Northern Central nominal.

We have now to repeat our last week's report of subscriptions to the new 4 per ct. Government bonds. A general hardening of the money market, caused by an increasing volume of business, has enabled capitalists and investors to place their money at somewhat better rates than 4 per cent. This, with the hope of still better rates has materially checked sales of 4 per cents in first hands. The very large amount of idle capital now seeking investment has brought into the market a good supply of corporate, municipal and State securities; all of which bearing a higher rate of interest than Government securities have found buyers to a great or less extent.

The fact, however, that national banks all over the country find themselves compelled to reduce their capitals because too large for present business, shows most plainly that there is still a large amount of capital which for want of other employment must go into Government or other securities until better times. We now quote all issues of Government bonds as follows:

United States 6s, 1881, registered, 107¾@107⅞; do. coupon, 107¾@107⅞; 5-20s, 1865, new, registered, 102¾@103; do. coupon, 102¾@103; do. 1867, registered, 105½@105⅝; do. coupon, 105⅝@105½; do. 1868, registered, 107½@108; do. coupon, 108@108½; ten-forties, registered, 105¾@106; do. coupon, 105¾@106; 5 per cents, 1881, registered, 104¼@104⅜; do. coupon, 105¼@105⅜; 4½ per cents, 1891, registered, 103⅛@103¾; do. coupon, 103⅛@103¼; 4 per cents, 1907, reg., 99⅞@100; do. coupon, 99⅞@100; sixes, currency, 119⅝@119⅞.

Money in this market continues easy. Call loans were steady at 4@5 per cent. Stock loans were made at 5 per cent. with both higher and lower rates paid. Prime commercial paper was discounted at 5@7 per cent according to date. The suspension of a well-known Western Dry Goods house caused a decided flurry in that trade when first announced, and caused commercial paper to be sharply scrutinized.

Gold has settled back into quietude at rates so long current—100⅛@⅜.

Foreign exchange is again firmer, although shipments of gold have been made to New York for French account, and others are to follow. The quotations now current are 4 81½ for 60 day bills; and 4 88 for sight. Actual business is done at ⅛ cent below the rates given. The free exportation of cotton now to begin from New Orleans and ports virtually closed by Yellow Fever heretofore will, we believe, bring the exchange market down to a point that will cause continued shipments of gold from London as well as Paris.

Domestic Produce is irregular owing to the unsettled condition of British markets. The receipts at tide water continue large as do exports. The week's exports, exclusive of specie, have been $7,455,993.

Cotton, which was unsettled and lower at our last report, has suffered a further decline. Generally unfavorable advices with stoppage of mills in Manchester and other spinning districts made Liverpool market depressed and heavy. This naturally sent our market down. We now quote middling uplands at 9¾ cents. Futures are also lower. Sales were made for October at 9.70@9.72; November, 9.55@9 62; December, 9.60@9 69; January, 9 65@9.70. Receipts at all the ports since September, 1st, 959,249 bales, against 477,454 bales in 1877 for the same time.

Ocean freights are unchanged in rates, although business is light. Engagements to Liverpool, by steam, for grain, 7d.; for cotton, 5-16d.@5 32d. compressed. To Havre, steam, cotton, ⅝c. compressed. To Glasgow, grain, by steam, 5¼d. To Marseilles, grain, by sail, 5s. 9d. per quarter. To Lisbon, grain, by sail, 16c.

Metals continue dull. The trade in American and Scotch Pig Iron is confined to retail lots. Occasional sales are made of larger lots, but in general sellers decline to quote prices received. We now quote No. 1, American Pig $17½@18; No. 2, 15½@$16½. Scotch Pig—Eglinton, $21; Glengarnock, $22@$22½; Coltness, $22½@$23. Scrap, No. 1, Wrought, $19. Steel Rails $44@$45; Iron do. $32@$35.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

One Week in Wall Street.

On October, 7th, 1878, Western Union Telegraph stock sold at the New York Stock Exchange at 96⅛ per share. October 14th, 1878, this same stock sold at 86¾, a fluctuation of 9⅜ per cent in 7 days. 10,000 shares of this stock, sold at 96⅛ on a margin of 1 per cent, required an actual capital of $10,000. The same stock delivered at the reduced price, 86¾, showed a profit of $937 50 per 100 shares, or 9⅜ per cent on the stock. On the whole 10,000 shares the actual profit was $93,750, or 9⅜ times the capital used within the brief space mentioned. People often theorize about supposable cases. The above are hard facts shown by the official record. Very few persons, however, are able to invest singly the $10,000 necessary to reap such fabulous profits as *were made* by the above transaction, but Messrs. Lawrence & Co., Bankers, 57 Exchange Place, New York City, have issued a new circular showing how large or small sums may be used successfully in stock speculations by their Combination Method of pooling thousands of orders into one immense sum and operating them as a whole, which places every customer on an equality with the largest operators, and divides profit *pro rata* among shareholders every 30 days. By this system large profits are made in short periods. $15 would make $75, or five per cent; $50 pays $850 or 7 per cent; $100 makes $1,000, or ten per cent on the stock during the month, according to the market. The new circular explains everything; also contains "Two unerring rules for success in stock operations," and much other valuable information. Copyrighted and sent free. All kinds of Stocks and Bonds, wanted. New Government Loan supplied. Apply to Messrs. Lawrence & Co, Bankers, 57 Exchange Place, N. Y. City.

Philadelphia and Reading Railroad.

Comparative statement of gross receipts, tonnage and passengers, of the Philadelphia and Reading Railroad Company, for the month of September:

	1878. Month.	1878. Year to date.
Gross receipts:		
Railroad traffic.....	$674 113 22	$8,977,389 19
Canal traffic.....	56,058 89	640,964 77
Steam colliers.....	38,286 88	447,029 63
Richmond coal barges	11,022 05	79,041 46
Total Railroad Co..	$779,480 99	$10,144,425 05
Reading Coal & Iron Company.....	622,266 79	6,152,475 01
Total of all.....	$1,401,747 78	$16,296,900 06
Tonnage and passengers:		
Tons of coal on railroad.	827,589 15	4,409,999 17
Tons of merchandise...	262,829 07	2,599,987 12
Passengers carried....	628,674	5,333 971
Coal transported by steam colliers.....	49,218 00	484,720 00
Tons of coal mined:		
By coal and Iron Co...	139,736 11	2,049,749 05
By tenants.....	63,079 19	822,828 19
Total mined from lands owned and controlled by Co. & from leasehold estates.....	202,816 10	2,872,578 04

	1877. Month.	1877. Year to date.
Gross receipts:		
Railroad traffic.....	$1,831,581 71	$9,877,395 81
Canal traffic.....	140,826 95	765,928 69
Steam colliers.....	42,282 98	531,628 18
Richmond coal barges	12,748 15	102,819 42
Total Railroad Co..	$1,527,439 79	$11,277,766 60
Reading Coal and Iron Co.....	1,142,705 09	7,923,624 05
Total of all....	$2,670,144 88	$19,201,390 65
Tonnage and passengers:		
Tons of coal on railroad.	824,116 13	5,786,897 15
Tons of merchandise...	287,552 11	2,598,904 03
Passengers carried....	682,731	5,572,991
Coal transported by steam colliers.....	53,971 10	482,947 10
Tons of coal mined:		
By Coal and Iron Co..	419,602 06	2,980,378 18
By tenants.....	180,931 01	1,089,947 15
Total mined from lands owned and controlled by Co. and from leasehold estates.....	600,533 07	4,070,326 13

The reduction of receipts is due to the restriction of coal production, the mines having been worked but nine days in September, 1878, against a full month in 1877.

☞ Mr. John S. Barnes, of J. S. Kennedy & Co., bankers, has been elected by the first mortgage bondholders of the St. Louis, Alton and Terre Haute Railroad a trustee in place of the late Robert Bayard.

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending October 12th, as reported by the several carrying companies, amounted to 495,093 tons, against 445 206 tons in corresponding week last year, an increase of 49 887 tons. The total amount of anthracite mined for the year is 12,555,594 tons, against 14.972,004 tons for same period last year, a decrease of 2,416,410 tons. The quantity of bituminous coal sent to market for the week amounted to 86,169 tons, against 86,477 tons in corresponding week last year, an increase of 308 tons. The total amount of bituminous mined for the year is 2,620.489 tons, against 2,694,911 tons for corresponding period last year, a decrease of 74,422 tons. The total tonnage of all kinds of coal for the week is 581,262 tons, against 531,683 tons in corresponding week last year, an increase of 49,579 tons, and the total tonnage for the coal year is 15,176,083 tons, against 17,666,915 tons to same date last year, a decrease of 2,490,832 tons. The product of the mines of the Cumberland coal region for the week ending October 12 was 39,760 tons, and for the year to that date 1 249 783 tons, an increase of 59,012 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 19,132 tons; for the year, 674,099 tons, an increase of 49,602 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 15,093 tons; for the year, 472,530 tons, an increase of 26 238 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the second week in October was 129,965 tons, of which 104,226 tons were coal, and 24,739 tons coke. The total carried for the year is 3,796,166 tons, of which 2,933,263 tons were coal and 803,905 tons coke. These figures embrace all the coal carried over the road, east and west. Owing to the suspension there was no anthracite coal carried by the the Reading Railroad Company last week. There was shipped from Port Richmond 31,000 tons. The coal on hand at Port Richmond was 38,700 tons, of which 26,500 tons belonged to the Reading Coal company and 12,200 tons to individuals. The Lehigh Valley Railroad Company reports of coal on hand at Perth Amboy October 12, 1878, 63,933 tons; received during the week ending October 19, 1878, 11,000 tons, making a total of 74,933 tons. Amount shipped during the week, 21,000 tons, leaving on hand October 19, 53,933 tons, against 92 500 tons October 25, 1877.—*Phila. Ledger, Oct* 21.

Vermont and Canada Railroad.

At the recent annual meeting of the stockholders of the Vermont and Canada Railroad the President made the following statement:

Another year of vexatious delay in the satisfactory adjustment of the interests of your road with the Central Vermont has been passed, making the sixth since interest, justly due, has been withheld by the managers of that company. It is not strange that discouragement should to some extent prevail among the holders of stock in the Vermont and Canada, but it must be remembered that this protracted contest has not extended over so long a period as that conducted by a former Director of your road with the Rutland several years ago, which terminated most triumphantly and satisfactorily for the owners of the property. This celebrated case, when it finally reached the Supreme Court in full bench after more than seven years of litigation before Chancellors, was decided in accordance with the principles of equity and justice, and it affords good grounds for encouragement as regards your property interests, which are now in the way of reaching final adjudication before the same dignified and unbiased tribunal.

That you may understand the present attitude of affairs as relates to the Vermont and Canada, it may be well to quote the closing paragraphs of the last statement presented (1877). It will be recollected that authority to execute a contract for sale of your road to the Central Vermont was conferred upon your President at a legal meeting of the Company held at Bellows Falls, Vt., on the 25th of April, 1877. This contract was duly executed, but it has been made null and void, according to its provisions, by subsequent important events. The petition of the Central Vermont for liberty to sell the Vermont and Canada was pending before the Supreme Court of Vermont at the time the last statement was made (October 1877,) and the closing paragraphs were as follows:

"It may be stated that under the contract the Vermont and Canada surrenders none of its rights to defend its interest in the Courts of Vermont in any hearings which may arise in pursuance of the same, and consequently at the hearing of the petitioners before Chancellor Royce at St. Albans in July its rights and claims were forcibly presented by its counsel, Messrs. Willard and Walker. Also at the subsequent hearing in August, before the full bench of the Supreme Court, the same counsel was present and submitted most able answers to the demands of the petitioners, the Central Vermont Company. It was deemed important that the decision should be according to the strict legal and equitable merits of the questions at issue, uninfluenced by any engagements entered into by the contending parties.

"Chancellor Royce, at the St. Albans hearing in July, dismissed the petition for liberty to sell the roads, as asked for by the Central Vermont Company. This was understood to be a *pro forma* proceeding, a decision made with view of bringing the question at issue before the Supreme Court of Vermont.

"No decision has been reached by the Supreme Court, or at least none has been declared. What this will be it is impossible to predict. The mutual obligations of the Canada and Central Companies are clearly defined in the existing contract, but the decision may be of such a nature as to postpone adjustment, or render further proceedings or negotiations necessary.

"It is confidentially expected by those best able to judge of the character of the Justices of the Supreme Court of Vermont that the decision will be in accordance with law and equity, and it is safe to say that such decision is one most devoutly wished for, by those sharing in the interests of the Vermont and Canada Railroad Company."

In a few weeks after this was presented (Oct. 30, 1877), the case came up for decision at Montpelier in the Supreme Court, full bench, (with the exception of Judge Royce of St. Albans), and a long and very able review of the whole case was presented by Justice Barrett, and judgment was rendered, dismissing the petition of the Central Vermont Company. This decision was fatal to the hopes and expectations of the Central Vermont, and for the time disconcerted all their plans. It was a blow from the highest judicial tribunal in the State wholly unanticipated. Its immediate and prospective bearings upon your interests was important, and the elaborate and learned opinion together with the decision could be regarded in no other light than as gratifying and favorable.

The Supreme Court was not called upon to decide other points in the controversy save the one presented, that of permission to sell your road; but in the very able and thorough review read by Judge Barrett, and concurred in by all the Justices, the numerous questions at issue are discussed fully. While opinions are entertained of the views of the Court, in consonance with the prejudices or interests of the parties concerned, it must be, and is conceded by the most impartial and able legal gentlemen in Vermont and elsewhere that there is a decided leaning toward the claims of the Vermont and Canada. It would seem, so far as the meaning of words can be understood, that there is a clear expression of opinion, that what is known as the Compromise decree of 1864 is, and has been, in full legal force since that date, and the rights of the Vermont and Canada as established by that decree have remained unimpaired. The full establishment of your rights under this decree, by the Supreme Court, when final decision is reached, will place your property under your control, and once more render it remunerative and valuable.

The present aspect of matters may be very briefly stated. A new bill has been filed in the Chancery Court at St. Albans, asking for final adjudication upon the important points involved, and it is hoped that this will by appeal reach the Supreme Court at the term to be held in December next. An answer has been filed by the counsel of the Central Vermont, and as it would appear from many considerations that it is important for the interest of the parties controlling the Central Vermont to have this long contest brought to a close, it is hoped that no further impediments will be interposed to prevent legal adjustment.

It will be well, however, for you to remember that further vexatious delays are possible; they may even be extended over a considerable period of time, but the end must come, sooner or later, and certainly the experience of the past year has been such as to afford good ground for hope that right will ultimately prevail over might, and the claims so persistently urged by your Directors for almost half a decade of years will be ultimately established by decision of the Supreme Court of Vermont.

JAMES B. NICHOLS,
President Vermont and Canada R. R.

Survey of the Amazon and Madeira Rivers.

Commander Selfridge has returned to New York from Washington where he has been with the report and charts of the Amazon and Madeira Rivers, showing the new survey which had been made by the officers of the Enterprise. The vessel went as far as Urua Island, 250 miles from the mouth of the Madeira, and the steam-launch continued the survey as far as San Antonio Falls, a distance of about 375 miles. It was found that the pilots had greatly exaggerated the perils of the passage at Urua, and that a good channel of seven fathoms led through the rocks. The success of the expedition is unqualified, and of great commercial value. It has been definitely proved that a navigable channel for vessels drawing fully 16 feet or more exists during the greater part of the year all the way up to San Antonio, which is the new terminus of the new Madeira and Mamore Railroad, now constructing.

☞ Work is progressing favorably on the Central Railroad of Guatemala. Several miles have already been cleared and prepared for grading, and a mile or two is now ready for the rails. The prevalence of rains just at present prevents a greater demonstration of activity, but with the beginning of the dry season gangs of men will be put upon each section and the work rushed through in a few months. The bark Zephyros, with material of various classes for the work, is expected at San Jose the latter part of this month.

☞ The Whitfield and Jefferson Railroad was organized at Plymouth, N. H., on the 11th inst. by the choice of the following Board of Directors: Aaron Ordway, A. L. Brown, W. G. Brown, N. R. Perkins, J. T. Vose, S. N. Bell, J. A. Dodge and W. F. Daniels. Aaron Ordway was chosen President; S. U. Bell, clerk; A. L. Brown, Superintendent, and E. D. Harlow, Treasurer.

☞ The Guatemala Railroad Company filed articles of incorporation in the office of the County Clerk on the 10th inst. The company has a capital of $1,000,000, divided into 10,000 shares. Its object is to construct a railroad from San Jose, Guatemala, to Escuintla, in the same State.

A GOOD PLAN

The most profitable plan for operating in stocks is that of uniting capital of various sums by combining or pooling the orders of thousands of customers and using them as *one mighty whole*, which has been done so successfully by Messrs. Lawrence & Co., Bankers, 57 Exchange Place, N. Y. City. By this co-operative system each investor is placed on an equal footing with the largest operator, and profits are divided *pro rata* among shareholders every 30 days. An investment of $10 would pay $50, making 5 per cent on the stock during the month. $25 would return $150, or 6 per cent; $100 would make $1,000, or 10 per cent., and so on, according to the market. *Frank Leslie's Illustrated Newspaper*, June 29th, says: The Combination method of operating in stocks is the most successful ever adopted." *New York Independent*, Sept. 12th, says: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." *Brooklyn Journal*, April 29th, says: "Our editor made a net profit of $101 25 on an investment of $20 in one of Messrs. Lawrence & Co.'s combinations. The firm's new circular (copyrighted and sent free) contains "Two unerring rules for success in stock operations," and explains everything. All kinds of Stock and Bonds wanted. New Government Loan supplied. Best references. Address *Lawrence & Co., Bankers and Brokers*, 57 Exchange Place, New York City."

Baltimore and Delta Railroad.

The Belair (Md.) *Æ is says* that the survey and location of the Baltimore and Delta railway, under Major Dandridge, is completed. The consolidation with the Baltimore and Towsontown railroad which secures access to the limits of the city of Baltimore, has been effected. The right of way, with few exceptions, has been secured without cost from Boundary avenue to Delta station. The stock subscribed has reached something over $200,000. It is thought the estimate which Major Dandridge will submit to the board in a few weeks of the cost of grading and masonry, based upon actual surveys and carefully calculated, will not exceed the one previously given of $5,000 per mile. The subscription books show that nearly every responsible land holder near the line of the proposed road has subscribed towards its construction.

Denver and Rio Grande Railroad.

The Denver and Rio Grande Railroad has been leased to the Atchison, Topeka and Santa Fe Railroad Company for thirty years from December 1, 1878, the former company to receive 43 per cent of the gross earnings, the proportion to be reduced 1 per cent per annum for six years. From the seventh to the fourteenth year, 37 per cent will be paid. All future extensions are to be of a three-feet gauge and a line is to be built to the San Juan silver mines and through the Grand Canon of Arkansas, so as eventually to form a connecting link with and get possession of the Kansas and Pacific Railroad.

☞ The gross earnings of the Great Western Railway of Canada for the month of August, 1878, were $335,800, the expenses $252,100, and the net earnings $83,700; for the month of August, 1877, the gross earnings were $308,000, the expenses $235,000, and the net earnings $73,000—showing an increase in earnings of $27,800, in expenses of $17,100, and in net earnings of $10,700.

☞ The Chicago and Northwestern Railway Company has opened for business the Rochester and Northern Minnesota Railroad, a connection of the Winona and St. Peter Railroad, from Rochester to Pine Island, Minn., thereby adding sixteen miles to the roads already operated by the company.

☞ The iron steamer Virginia, for the Baltimore and Norfolk line, was launched from the Harlan & Hollingsworth Company's yard, at Wilmington, Del., on the 16th inst.

OFFICE OF THE NEW YORK ELEVATED RAILROAD COMPANY, No. 7 BROADWAY, NEW YORK, Oct. 14, 1878.

SEALED PROPOSALS IN ENVELOPE, INdorsed "Proposals for Stock and Bonds," are invited and will be received at this office until 12 o'clock M. of MONDAY, the 28th day of October, 1878, for 6,750 shares of the Capital Stock of the New York Elevated Railroad Company, and $675,000 of the First Mortgage Bonds of the said company, or any part thereof. Each bid must be made for an equal amount of stock and bonds. No bids for the stock will be considered which are for less than the par value thereof, namely, $100 per share. The bonds are 7 per cent per annum, coupon bonds of the denomination of $1,000 each, the principal due Jan. 1, 1906. Coupons payable 1st January and 1st July in each year. The bonds will bear interest from the first day of January, 1879.

Interest will be allowed at the rate of 7 per cent per annum on all payments made before that date.

A deposit of 5 per cent will be required from all bidders, which must accompany the bid, and which 5 per cent will be indorsed on all such bids as are accepted. On such bids as are not accepted the deposits will be returned to the bidders.

Fifty per cent on all accepted bids will be required Nov. 15, 1878, on the payment of which one-half the stock and bonds will be delivered; the remaining 45 per cent will be required Nov. 30, 1878, when the remainder of the stock and bonds will be ready for delivery.

The company reserve the right to reject any and all bids which are not deemed satisfactory.

JAMES A. COWING, Treasurer.

NEW YORK, October 18, 1878.

THE DIRECTORS OF THE EMPIRE GOLD MINING COMPANY have this day declared a dividend of 8 cents, in gold, per share, (par value $10,) out of the net earnings for the month of September, payable at the office of the Treasurer, No. 8 Wall-st., on the 31st day of October inst. The books to close on October 26, and reopen on the first of November.

S. V. WHITE, Treasurer.

ALEX. FROTHINGHAM & CO., BANKERS AND Stock Brokers, No. 12 Wall st., buy and sell stocks on the New York Stock Exchange and carry the same as long as desired on a deposit of three per cent. Careful attention given to orders for investment from $25 upwards in "Puts" and "Calls," which frequently pay from ten to twenty times the amount invested. Explanatory Circular and their Weekly Financial Report sent free on application.

New York, Saturday, November 2, 1878.

Early Western Railroads.

In the year 1850 railroads west of Ohio were very few in number. Prior to this date the legislators in all Western States had repeatedly avowed their appreciation of the value of "internal improvements," and had as repeatedly attempted to carry out their appreciation. In the matter of railroads they never got much beyond grading, which was a fair start considering the "shaky" condition of both people and finances. Canals, requiring no outfit on the builders' part except water, were a more marked success in those early days.

Ohio in 1850 had but one trunk line railroad, running from Cincinnati to Sandusky, connecting the Ohio River and Lake Erie. Although this road was yet partially laid with flat rail it was pointed at with pride by the citizens as an evidence of Buckeye enterprise.

There was a curious disposition on the part of Western law makers in those days to facilitate legislation. The capital of the State must first be rendered easy of access they thought. Accordingly in several States the first railroads beginning nowhere in particular always ended at the capital—if the money held out.

Indiana built a railroad of this description beginning at Madison on the Ohio River and terminating at Indianapolis. For several years prior to 1850 this was the only railroad in the State. It was of some commercial value since it gave an outlet to the surplus grain of central Indiana; but it was at first prized most because it gave easy access to the capital of the State.

Illinois made a similar start in railroad building. It was proposed to connect Springfield, the capital, with the Illinois River at Naples. The road was built and run from Naples to Jacksonville; but it did not reach the capital for many years afterwards. This first Illinois railroad was not perhaps so profitable as to tempt immoderate watering of the stock; but it was a model of safety and convenience for the traveling public. It was not run at a speed to endanger human or animal life; while travelers were kindly called for or dropped at any farmhouse along the line. Such a difference between the democracy and comfort of the one car train of those days and the drawing room car exclusiveness of to-day!

Kentucky, too, early caught the fever of internal improvement. For some unexplained reason it was thought wise to connect Lexington with Frankfort, the capital, by railroad. The road might or might not have been built to facilitate legislation. The length of the road, some 25 miles, could not do much more than stimulate engineering skill in railroad construction. And it did that successfully at an early day. This first Kentucky railroad was built with an inclined plane and stationary engine at Frankfort, that place being at a much lower level than the line of road. Trains were raised and lowered over this inclined plane having a substantial depot building at the bottom, and no thought of broken cables or runaway trains. But in the course of things a cable broke and a train went down the plane at an unprovided for rate of speed knocking out the end of the depot building besides knocking things generally to prices. A loud call for improved engineering was then made and soon after Frankfort was given a tunnel and a mile or two of direct and reverse curves in place of the inclined plane.

The first railroad suspension bridge in the United States was that over the Kentucky river at Frankfort, opened for trains in the summer of 1851. It was not at first a complete success, there being too much suspension. When a locomotive was run upon the bridge it would tilt—one end go down and the other up. It was only by a free use of horse power that locomotives could be extricated at first from this too much suspended bridge.

West of the Mississippi River there was not a mile of railroad in 1850. Missouri, like her neighbors, built her first railroad, (the Pacific) from St. Louis to Jefferson City, the capital; and there the road ended for some years.

Iowa, curiously enough, followed in the same manner. A railroad was built from Davenport to Iowa City, then the capital, where the road halted for years before being pushed through to the Missouri River.

Such were some of the curious features of early railroad building in the West. As a rule none of those pioneer railroads were profitable. They were too cheaply and hastily constructed; too carelessly managed; and the country was yet too new, poor, and too sparsely settled for any hope of immediate profit to the builders. But in the years since 1850 what a change. The traveler of to-day who was familiar with the West and its railroads in those early days can scarcely credit the marvelous changes on every hand. And that is why the reminiscences and remembrances of the old times have such a pleasant flavor for some of us who saw all the changes as they occurred.

☞ Mr. J. E. Mathews, assistant engineer of the Western Maryland railroad, has submitted a plan, profile and estimate of the cost of a branch railroad from the Western Maryland railroad, near Arlington station, to the Pimlico fair grounds. The estimates are for a road bed 16 feet wide in excavations and 14 feet wide on embankments; weight of rails 56 pounds per yard, 93⅛ tons of

iron rails, 2,800 cross ties, 8,000 lbs. fish plates, 1,300 lbs. fish plate bolts, and 6,000 lbs. spike will be required. Total estimated cost of the road, $7,218 75.

Louisville and Nashville Railroad.

The following is a condensed statement of the earnings of the Main Stem, Branches and Leased roads for the year ending June 30, 1878:

	Memphis Division.	Clarksville Division.	Main Stem.

Pennsylvania Railroad.

In pursuance of a resolution adopted March 26, 1878, by the stockholders of the Pennsylvania Railroad Company, the Board of Directors of that company have created a trust for the purchase of bonds and shares of other companies that have been guaranteed by it. The preamble of the trust recites the legislation of Pennsylvania and other States authorizing the guarantees referred to, also the resolution of the shareholders of March 26, 1878, and it is then provided that upon the first Monday in November, 1878, and upon the first Monday in each month thereafter, the treasurer of the Pennsylvania Railroad Company shall set apart the sum of $50,000, to be placed to the credit of the managers of the Trust. That once in each year, and oftener if deemed prudent, there may be an additional sum set apart after payment of dividend to the stockholders, but the aggregate amount in any one year shall not exceed 2 per cent upon the capital stock that may be then outstanding. Five managers of the Trust are appointed viz: the president, the second vice-president, and Messrs. Wistar Morris, Henry M. Phillips and D. B. Cummins of the Board of Direct-

ors. The manner in which the Trust shall be conducted is then fully and carefully provided for. An audit by two stockholders, not members of the Board of Directors, is established which audit may take place at any time the auditors may deem proper, but at least once a year. No compensation is paid to the managers of the Trust or to the auditors. Provision is made for such further action on the part of the directors as will secure the more efficient operation of the Trust, and also for the termination of the Trust by action on the part of the shareholders. We understand the Trust was unanimously adopted at a full meeting of the Board of Directors held on the 29th ult.

The Fishery Question.

We are in danger of a serious complication with the English government concerning the interpretation of the existing treaty in relation to fisheries.

On the part of Great Britain it was claimed, and admitted by us, that certain encroachments on the fishing grounds of the former had been made by our fishermen. A joint commission known as the Halifax Commission was created which met and awarded a large sum to Great Britain as damages. This award we thought to be excessive, but not willing to quibble, our government made full provision for the payment of the award. The money is now in London awaiting the President's order for payment on the 24th November next, the time fixed within which the award must be paid.

But, between the awarding by this Commission and the date of payment, a new cause of difficulty has arisen. It is, strictly speaking, a conflict of authority between the local law of Newfoundland and the higher treaty provisions of the mother country, England, with us. On the 8th January, 1878, a party of American fishermen then fishing in Fortune Bay, the day being Sunday, were attacked by a mob, their seines cut, and they were compelled to abandon their occupation by force. It is claimed by the people of Newfoundland in justification of their violence that the American fishermen violated three local laws: fishing on Sunday; fishing between October and May; and fishing with seines.

Upon complaints made to the State Department at Washington concerning this violence and deprivation of the treaty right of fishing inshore, the attention of the British Foreign Minister was called to the matter. Captain Sullivan was sent by the British government to investigate and report upon the alleged violence. The report of that officer made to the British Secretary of Foreign Affairs evidently considers the local law of Newfoundland as paramount and superior to the treaty obligations, since he, Capt. Sullivan, thinks the American fishermen not entitled to redress for injuries suffered because they were fishing in violation of local law.

Mr. Evarts declined to accept as satisfactory the above mentioned report of Captain Sullivan when received from and virtually sustained by Lord Salisbury in his communication to Mr. Evarts.

This is a very brief statement of the difficulty as it now stands. It is certain that our government will not accept the plea that the local law of Newfoundland or any other British dependency must be held superior to the solemn treaty contracts of the British government. As for the money due on the 24th November to fulfill the award of the Halifax commission, it is not probable that the President will delay payment until the settlement of the Fortune Bay outrage can be effected. The daily press is urging such delay, but we do not think the circumstances justify it.

Wicket Dams.

The Pittsburg Chronicle notices an experiment looking to the improvement of the navigation of the Ohio river, it being the application of the Chamoin system of dams in that river, a few miles south of Pittsburg, Pa. A government appropriation of about $400,000 is to be expended on the work, the design of which is primarily to give Pittsburg a harbor of navigable depth at all seasons, and further to show the feasibility of rendering the whole length of the Ohio navigable at the lowest water by a succession of these dams. The peculiarity of the dam is that it consists of a series of wickets which can be raised or lowered at will by hydraulic power. When the stream is high the wickets bend low beneath the flood, and boats pass over them; when the water falls as midsummer approaches the wickets are hoisted, and the confined waters become of sufficient depth to float the river craft, which will pass the dam by means of a lock. This dam is a French institution, and is successfully applied to many of the European rivers. Col. Mahan, who is superintending the construction of the Pittsburg dam, stakes his professional reputation on its success.

Lonergan & Thiel's Private Detective Agency.

The most perfect system of checks yet devised has failed to prevent peculation of goods and embezzlement of money by officials whose opportunities are greater than their honesty. That careful supervision will sooner or later lead to the disclosure of glaring and wholesale dishonesty, is unquestionably a fact; but it often happens that the suspicions first excited on the part of the victims of fraud are unable to be substantiated, owing to lack of time or ignorance of the best means to be employed in tracing it, so the theft remains undetected or the offenders are quietly dismissed and the sufferers get no restitution for their loss.

This is especially the case with railroad companies whose transactions are on so large a scale that robberies and embezzlement attain very serious dimensions when they remain undiscovered or unpunished for any length of time.

The necessity of looking outside the company's staff for the ability and integrity to conduct investigations of this nature, is so well recognized by the leading and responsible officers of railroad companies, that several private secret service firms find constant employment in investigations which are either too intricate or beyond the scope of the regular authorities.

Amongst these firms, that of Lonergan & Thiel of New York and St. Louis, enjoy a high reputation for the rapidity and success of their work.

These two gentlemen, one of whom—Mr. T. E. Lonegan—has his headquarters at 82 Nassau St., in this city, while his partner—Mr. G. H. Thiel—operates from St. Louis, have made frauds on railroads their special study, and have been instrumental in detecting many deeply planned schemes of wholesale plunder that have never been allowed to reach the public ear. In this respect it may be remarked that these gentlemen undertake to *detect*, both the crime and the offenders, and no more. Their work is done when this is effected, and whether or not the Criminal Courts are called on to act, is a matter they leave unreservedly to their employers. Hence it arises that the police get the newspaper credit of discovering all the heavy cases that come before the Courts, and that startle the public by their magnitude, while not even the names of the private detectives who have actually done the work, are so much as mentioned. This fact renders their services doubly valuable as it enables them to maintain a secrecy which is as beneficial to their employers as to themselves. This fact will account for the firm we name not being known to many of our readers. If however any of them have unfortunately reason to require the services of efficient detectives, we confidently name Messrs. Lonergan and Thiel as being capable and worthy detectives.

Recognized Success.

A well sustained and successful business through adverse times and difficulties is something worthy of comment. And when a merchant is able by his industry and good business tact to show an increase instead of a falling off praise is certainly due him. From a small beginning to the largest business in the United States in his line has NICOLL THE TAILOR raised himself. From a buyer in a small way to a large importer of cloths he has steadily advanced until his stock and facilities for manufacturing are unequalled in the country.

To Railroad Superintendents, Government Officials, and all others desirous of uniforms, civilian suits or cloths, we commend the establishment above named as the largest and best in its line within our knowledge.

☞ In the United States Circuit Court at Richmond, Va., on the 26th ult., in the matter of the Atlantic, Mississippi and Ohio Railroad, on motion for a decree of foreclosure of mortgage and sale of the road, Judge Bond ordered the reference of the master's report back to him for a new report of the assets of the company, with liabilities and the liens upon the property in just order of priority, to be returned in thirty days. The case upon the original motion will come up for final hearing on the 15th of January.

☞ The foreclosure sale of the New York, West Shore and Chicago Railroad at the suit of Florence V. Lewis, which was to have taken place on the 28th ult. at the Real Estate Exchange, was adjourned until December 9, by order of Commissioner Shields, Master in Chancery.

☞ The bids for stock and bonds of the New York Elevated Railroad, 6,750 shares of stock and $675,000 in first mortgage bonds, were opened on the 28th ult. They were all taken, at prices ranging from 45 to 85 for the bonds, and par for the stock.

☞ Track laying on the Spencer (Mass.) Railroad was to have been commenced this week.

Northern Pacific Railroad.

At the annual meeting of the stockholders of the Northern Pacific Railroad Company, held at their office No. 23 Fifth Avenue, New York, on the 25th of September, 1878, the following resolutions were adopted;

Resolved, That the subscription heretofore made by this company to the capital stock of the Western Railroad Company of Minnesota, for the term of ninety-nine years from the 1st day of May last; the prosecution of the work on the branch line in Washington territory; the use and application of the surplus earnings of the company's road for these purposes, and all the acts, doings and proceedings of the board of directors for and during the present year, and of the several boards of directors since the organization of the company, September 29, 1875, be and the same are hereby approved, ratified and confirmed.

Whereas, the interests of the company demand an independent connection between its road and the railroads centering at Minneapolis and St. Paul; and

Whereas, the Minneapolis St. Cloud and Sauk Rapids Railroad Company, a corporation existing under the laws of the State of Minnesota, propose to construct a first class railroad from Sauk Rapids to Minneapolis, the capital stock of said corporation being fixed at 2,000 shares of $100 each, bonds of said company are to be issued to an amount not exceeding $10,000 per mile, bearing interest at seven per cent per annum and said bonds not to be sold or negotiated for a less price than 85 per cent of the par value.

Resolved, That it is the sense of this meeting that unless within sixty days from this date there shall be made suitable and permanent arrangements for the use by this company of the lines of the First division of the St. Paul and Pacific Railroad Company, between Sauk Rapids and Minnesota and St. Paul, this company should aid the said Minneapolis, Sauk Rapids and St. Cloud Railroad Company in the construction of its railroad by means of subscription to its capital stock for a majority of the shares thereof, for the purpose of forming a connection of said railroad with the railroad of this company; and should take and enter into a lease of said proposed railroad, when completed, for the term of ninety-nine years, commencing six months after the same shall be ready for operation throughout, at an annual rent of 35 per cent for the first five years and 35 per cent thereafter of the gross earnings thereof; and the assent of the stockholders of this company is hereby given to the furnishing of said aid and the taking, entering into and perfecting of said lease.

Joint Stock Enterprises.

Joint stock enterprise is, under any conditions, heavily weighed in the contest with personal enterprise. It is only the necessity of collecting capital to an amount which individuals are not prepared to find, which has rendered necessary, and thus practicable, the railway system of England. No one familiar with business in England for the last half century can doubt that, if our railways could have been made by such men as Stephenson, Brassey, or Brunel, with their own means, they would have been far cheaper, and probably far better, than has proved to be the case. Look alone at the contract system for executing the work. No doubt without that system the companies would have paid far more than they have done. But the contractors have made their percentage—often a good percentage—merely for coming between the paymaster and the workman. And each such percentage—call it 10, or even rate it as low as 5—is a weighting of the financial and economical power of the joint stock company as compared with that of the individual capitalist. Where millions are required, and thus the individual cannot compete, the collective force of associations may arrange to make both ends meet. It cannot, however, fairly be said that this has been done, as a whole, on our English railways. Six hundred and sixty millions sterling have been expended on the 16,872 miles of the railways of the United Kingdom. The net income earned on that sum in 1876 was 4.36 per cent. Looking at the risky nature of the property, the depreciation of structures, works, and of rolling stock, and of all the thousand contingencies that must affect the future value of an industry not more than 50 years old, this rate of interest can hardly be called remunerative. In the United States it is considered that 7 per cent is needed to cover interest, depreciation and risk; and in England a permanent investment, involving hazards of many kinds, at less than 5 per cent, can hardly be regarded as at par.—*Frazer's Magazine.*

District of Columbia Securities.

Since the first of October Treasurer Gilfillan has been paying at the treasury in Washington and at the assistant treasury in New York the quarterly interest on certain District securities which became due at that date. The securities upon which the quarterly interest is due and the amounts due are as follows: The five per cent registered stock of the corporation of Washington, $662 50; six per cent registered stock of the corporation of Washington, $10,275; six per cent registered general stock of the corporation of Georgetown, $2,674 50; six per cent registered market stock of the corporation of Georgetown, $450; eight per cent registered general stock of the corporation of Georgetown, $400; the six per cent registered bounty stock of the corporation of Georgetown, $300. All these are currency bonds. Total amount of interest which was due October 1, $14,462.

November 1 the semi-annual interest on the six per cent funding loan bonds of the corporation of Washington will become due. This is a coin bond, and the semi-annual interest (coupon) will amount to $19 800. The only District bonds with maturity at pleasure are as follows: Five per cent registered stock of the corporation of Washington, $53,000; six per cent registered stock of the corporation of Washington, $685,000; six per cent registered canal stock of the corporation of Washington, $47,500; six per cent registered general stock of the corporation of Georgetown, $178,300; six per cent registered market stock of the corporation of Georgetown, $30,000.

January 1 next the six per cent ten-year (Bowen) bonds of the corporation of Washington will mature. Their amount is $279,000. March 1 next the 7.30 steam force pump bonds of the corporation of Georgetown, amounting to $2,500, will mature.

The next bonds to mature will be the eight per cent registered general stock of the corporation of Georgetown, amounting to $420,000. This bond matures July 1, 1881. September 24, 1881, the six per cent registered bounty stock of the corporation of Georgetown, amounting to $20,000, will mature. July 1st, 1891, the 6 per cent permanent improvement bonds of the District of Columbia, amounting to $3,995,000, will mature. On the same date mature the 7 per cent permanent improvement bonds of the District of Columbia, amounting to $670,000. After that date bonds will mature as follows. Their principal is given with them: July 26, 1892, 7 per cent market stock bonds of the District of Columbia, $150,000; July 1st, 1892, six per cent funding loan bonds of the corporation of Washington, $1,150,000; October 1st, 1901-2, 7 per cent water stock bonds of the District of Columbia, $423,000; November 1st, 1902, 6 per cent funding loan bonds of the corporation of Washington, $660,000; August 1st, 1924, 3-65 fifty year funding bonds of the District of Columbia, $13,743,250.

The above include all the bonds of the funded debt of the District of Columbia. Their total amount is $22,106,550. All these bonds are currency bonds except the two classes of 6 per cent funding loan of the corporation of Washington and the six per cent 1891 permanent improvement bonds of the District of Columbia which are coin securities.

City Passenger Railways.

City Passenger railways seem to be a peculiarly American institution, and when transplanted to other lands they are very apt to struggle along through a precarious existence, or, like an exotic in an unfriendly soil, to wither away and die. With us they flourish abundantly, and have become the principal means of locomotion in our cities. We do not mean to say the corporations which run such roads always declare large dividends, but we do mean that, as a general thing, the people patronize them enough, and are willing to pay fares high enough to return a fair usance on the capital required to build, equip and run them. What is done with the money after the people have paid it is quite another matter. Sometimes it is turned over in dividends, and sometimes it is not; but the fact remains all the same, our people use the roads and are willing to pay a good, round profit on their real cost. There have been exceptions, as, for instance, in Worcester, Mass., where, after going through numerous bankruptcies, the street railroad was finally abandoned and the rails taken up. But these exceptions only prove the rule that with us these roads are paying properties.

In Europe, however, the case seems to be different. There the rule is that tramways, as they call them, are found to be unprofitable. It will be remembered that George Francis Train undertook to introduce them into England, and, after making something of a spread eagle sensation, collapsed in unredeemed failure. There have been several attempts since to start enterprises of the kind in one city and another, but the English people do not want "any in theirs," and these undertakings have not met with any considerable success.

The same seems to be true of the French people, or, at all events, of the Parisians, and Paris is France, we are told. According to the following accounts, lately received, one difficulty in this case seems to be too great cost.

The French tramway companies, although generally making large receipts, have so far been complete failures from a commercial point of view. The costs of promotion and construction were so enormous that the profits are now scarcely sufficient to cover the loan charges. There are two great companies in Paris, the Northern and the Southern, but neither has yet paid any dividends from its earnings, and do not appear likely to pay any. The 500 franc shares of the former are now worth only 185 francs, and those of the latter, after being palmed on the public by

clever financing at 200 francs premium, are now at 200 francs discount. The Company General of Tramways established to construct lines in the provincial towns, has just called up the second half of its capital, or 250f. per share, to buy in a part of the debentures, the interest on which absorbed all the profits. The value of 250f. already paid on the shares is depreciated to 45f. The Paris Omnibus Company, on the contrary, continues to exhibit excellent results, and is profiting largely by the afflux of visitors to the exhibition. The receipts for the last week published amounted to 544,437f, against 493,911f. in the corresponding week of 1877. The earnings from the commencement of the year to the 9th of September amounted to 22,426,483f., an increase of 4,150,996f. on 1877. The dividend of 10 per cent paid last year will no doubt be largely exceeded, but the increase is already discounted, as the price of the 500f. shares has reached 1260. This company has laid down rails for trams on many of its lines.

Mexico's International Exhibition.

We are pleased to learn from a correspondent in the city of Mexico that energetic preparations are being made there for an International Exhibition in April of next year, and that President Diaz and his cabinet have made special arrangements for the admission free of duty and transportation at reduced charges, of the exhibits of foreign contributors. This additional evidence that our Sister Republic is gradually abandoning the spirit of exclusiveness which has so long retarded her political and material growth, will be welcomed by every friend of real progress. As being her nearest neighbors the United States has the greatest interest in her welfare and should be, by geographical right, the chief source of the supplies she draws from abroad. What Mexico needs we are best able to give her, what she can give we are the most ready to take and to pay for. Under these circumstances our Merchants and Manufacturers will heartily respond to the invitation of President Diaz.

We note that Mr. Ellis Read, a well known American Citizen, is appointed Commissioner at Mexico City for communicating with foreign exhibitors.

☞ The directors of the Massachusetts Central Railroad Company, elected on the 30th ult., are: Silas Seymour of Boston, Mass., Milton Courtright of New York, Francis Brigham of Hudson, Mass., J. Edwin Smith of Worcester, Mass., E. B. Shattuck of Worcester, Mass., Lewis J. Dudley of Northampton, Mass., Luke Lyman of Northampton, Mass., Henry F. Hills of Amherst, Mass., Wm. A. Dickinson of Amherst, Mass., Charles A. Cutting of Boston, Mass., Jas. S. Draper of Wayland, Mass., Franklin Bonney of Hadley, Mass., Charles M. Harris of W. Boylston, Mass., James T. Joslin of Hudson, Mass., J. W. Rollins of Boston, Mass.

☞ The President of the National Narrow Gauge Railway Convention, which met in adjourned session at Cincinnati on the 23d ult., stated that on the first of last January there were nearly 3,100 miles of narrow-gauge railways in operation in the United States, the greater portion of which has been built in the last five years, and as many more are now projected. The committee's report claimed that a narrow-gauge engine of the same capacity as a standard engine can take up the same grade more tons of paying freight, because it has less dead weight of cars, and that in the transportation of the passengers the same rule would prevail.

Indianapolis, Bloomington and Western Railroad.

The Indianapolis, Bloomington and Western Railroad was sold at Bloomington, Ills., on the 30th ult., by order of the United States Court to a committee of the first mortgage bondholders for $1,000,000. The total amount of the first mortgage bonds is $5,000,000, which, with interest additions to the total preferred claims, charged up but not all confirmed, amounts to $8,080,000, or $40,000 per mile for the line between Pekin and Indianapolis. The buyers estimate total preferred claims for which they are responsible at about $700,000. It is understood that there is an agreement between the first mortgage bondholders and the owners of the second mortgage bonds, $1,500,000, by which the latter look for payment and are not to appear legally hereafter.

After the sale a company was organized in accordance with the Illinois law, with a capital of $2,800,000. The stockholders are: R. E. Williams, Bloomington; Fred. W. Peck, Chicago; George W. Parker, Charleston; John L. Farwell, New Hampshire; John D. Campbell, Iowa; Charles L. Capen, Bloomington; George S. C. Dow, Brooklyn. President, John L. Farwell; Secretary and Treasurer, Charles L. Capen; Directors, Messrs. Parker, Speck and Campbell.

☞ The gross earnings of the Chicago, Burlington and Quincy Railroad for eight months ending August 31, 1878, were $8,996,424, the expenses $5,005,432, and the net earnings $3,990,992; for eight months ending August 31, 1877, the gross earnings were $7,631,596, the expenses $4,329,692, and the net earnings $3,301,924—showing an increase in gross earnings of $1,364,828, in expenses of $675,740, and in net earnings of $689,088.

☞ The $25,000 stock required for the Georgian Bay and Wellington Railway has been subscribed, about equally between Durham and Mount Forest—$1,000 being also taken by residents of Holstein. Bonuses to the extent of $155,000 have been already voted by municipalities along the proposed route. A little less than $7,000 per mile over the first section is thus secured for the promoters.

☞ The Electric Light Company—to produce light, heat and power by means of electricity—has been formed in this city with a capital of $300,000. The incorporators are: Tracy R. Edison, James H. Banker, Norvin Green, Robert L. Cutting, Jr., Grosvenor P. Lowrey, Robert W. Galloway, Egisto P. Fabbri, George R. Kent, George W. Soren, Charles F. Stone, William G. Miller, Thomas A. Edison and George S. Hamlin.

☞ The receipts of the Hanover Branch (Mass.) Railroad for the year ending September 30, 1878, were $81,978 93. The expenses, including interest, taxes and insurance, have been $69,997 61; $5,000 have been paid on mortgage; a dividend amounting to $3,714 was declared January 1, 1878; and funds amounting to $3,226 72 remain on hand at the close of the year. The road is in good condition, and the report shows a gain upon its debt from year to year.

Chicago and Eastern Illinois Railroad.

At the annual meeting of the stockholders of the Chicago and Eastern Illinois (formerly Chicago, Danville and Vincennes) Railroad Company, the following directors were chosen for the ensuing year: F. W. Huidekoper, Chicago; Franklyn H. Story, Boston; George W. Gill, Worcester, Mass.; Thomas W. Shannon, John W. Brookman and Henry B. Hammond, New York; C. E. Stevens, Boston; Joseph G. English, Danville, Ill.; and T. F. Leonard, Springfield, Ill. Subsequently the directors met and elected the following officers: F. D. Huidekoper, President; A. S. Dunham, Secretary and General Ticket Agent; J. C. Calhoun, Treasurer; G. S. Lyford, Superintendent; and Robert Forsyth, General Freight Agent. The annual report, which was presented, showed that the gross earnings during the past year were $784,555, the operating expenses, etc., $555,039, and the net earnings $229,516.

☞ The directors of the Maine Central Railroad Company are surveying a route for a railroad to Aroostook county direct from Bangor. It is proposed to run fifteen miles west of Houlton, and the road can be built at a very slight expense, as the proposed route is an easy one. It will be built by the Boston and Maine, Eastern and Maine Central Railroad Companies.

☞ The receipts of the Ohio and Mississippi Railroad (John King, Jr., Receiver) for the month of September (including $13,796 26 cash on hand at the commencement of the month) were $387,956 57; and the disbursements $337,593 80—leaving cash on hand October 1, 1878, $50,362 77.

☞ Sixty thousand tons of Scranton Coal were sold on Wednesday by the Delaware, Lackawanna and Western Railroad Company at the following prices: Grate, $3 57½; stove, $4 05; steamer, $3 45@$3 47½; egg, $3 67½; chesnut, $3 30@$3 35.

☞ The New Brunswick Railway has been constructed thus far in advance of the appointed time. The road lies close to the St. John river, and the trial train made the distance from Grand Falls to Edmundston, 39 miles, in 2½ hours.

☞ The Kankakee and Southwestern branch of the Illinois Central Railroad, 37 miles in length and running from Kankakee to Chatsworth, Ills., was completed last week.

☞ The earnings of the Philadelphia and Erie Railroad in September, 1878, were $288,083 70, the expenses $193,330 83, and the net earnings $94,752 87.

☞ A number of hands were recently discharged by Satterlee & Co., contractors of the Shenandoah Valley Railroad, because of the inability of the contractor to sell county bonds.

☞ The first spike of the Valley Railroad was driven at Akron, Ohio, by D. L. King, President of the company, on the 26th ult.

☞ The Evansville and Terre Haute Railroad Company has declared a semi-annual dividend of 2½ per cent.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

Pennsylvania Railroad.

The following statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for September, 1878, as compared with the same month in 1877, shows

A decrease in gross earnings of	$147,762
A decrease in expenses of	15,242
A decrease in net earnings of	$132,520

The nine months of 1878, as compared with same period in 1877, show

An increase in gross earnings of	$813,660
An increase in expenses of	554,682
An increase in net earnings of	$1,368,292

All lines west of Pittsburg and Erie for the nine months of 1878 show a deficiency in meeting all liabilities of $391,062, being a gain over the same period in 1877 of $225,964.

Statement of the Public Debt of the United States, October 1, 1878.

DEBT BEARING COIN INTEREST.

Decrease of debt since June 30, 1878	9,878,345 84

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$388,276 80
Kansas Pacific bonds, 1862-64	6,303,000 00	94,545 00
Union Pacific bonds, 1862-64	27,236,512 00	408,547 68
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	24,000 00
Western Pacific bonds, 1862-4	1,970,660 00	29,558 40
Sioux City and Pacific bonds, 1862-64	1,623,320 00	24,424 80
Totals	$64,623,612 00	$969,352 68

Interest paid by United States, $39,835,039 36; interest repaid by transportation of mails, &c., $10,279,181 35; balance of interest paid by United States, $29,555,858 51.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

* This amount includes $41,500,000 Five-twenty called Bonds not yet matured, against which a like amount of 4 per cent Bonds have been issued and are embraced in this statement, and the amount included in the coin balance.

Grand Trunk Railway of Canada.

The gross receipts, working expenses and net profit of this road for month of August, 1877 and 1878 were:

	1878.	1877.
Gross receipts	£145,657	£162,411
Working expenses	118,817	124,069
Net profit	£27,840	£38,342

—showing a decrease in receipts of £16,754, in expenses of £5,752, and in net profit of £11,002.

Aggregate for months of July and August:

	1878.	1877.
Gross receipts	£278,574	£305,650
Working expenses	227,054	237,684
Net profit	£51,520	£67,966

—showing a decrease in receipts of £27,076, in expenses of £10,630, and in net profit of £16,446

☞ The gross earnings of the Wabash Railroad Company for four months ending August 31, 1878, were $1,653,787, the operating expenses $1,248,764, and the net earnings $404,978. The payments during the same time (including $285,705 for interest on funded debt) were $460,212—being $55,239 in excess of the net earnings.

American Railroad Journal.

Saturday, November 2, 1878.

Financial and Commercial Affairs.

The week has been a fairly active one on the Stock Exchange. The volume of business is very largely speculative, of course, yet the tone of general business is healthy and satisfactory. Even the bold robbery of nearly $3,000,000 in securities from the Manhattan Savings Bank failed to create the slightest effect beyond casual comment in business circles. The distribution of merchandise is reported fair for the season. Profits are but moderate, but, with quite satisfactory payments as a rule, merchants speak encouragingly both of present trade and future prospects.

British financial difficulties are now beginning to react upon our export business, as we have before advised our readers would be the natural result. The week's exports of merchandise show a falling off of nearly $2,000,000 from last week, and several preceding weeks. Prices of domestic produce and cotton have declined in consequence; and a still further decline is feared in cotton by reason of continued unfavorable advices from the English manufacturing districts. The receipts of cotton at our ports are less than the anticipated amount, but a principal reason for this is an unsatisfactory and declining market. The moderate importation of coin from Europe, previously noticed, still continues. Thus far the coin received has been for French account. Whenever British money markets subside into normal quietude considerable shipments of coin may be expected from that quarter.

Business on the Stock Exchange has been

larger in volume for the week than any preceding week since the activity of midsummer. The whole active list shared in the movement without any special prominence. For the first time, sales of Erie were reported on Tuesday with the $4 assessment paid. The assessment is payable in gold, and carries interest at 7 per cent from April 1, 1877; making it nearly $4 46 currency, or 4½ per cent. A large amount of Erie common stock is said to be yet in default as to the payment named, while the time within which payment can be made expires on the 31st October. Stock sales on Saturday amounted to 179,000 shares; on Monday, 194,000; on Tuesday, 242,000, and Wednesday, 179,000.

Boston advices indicate an increased activity in general business. There is now a g od demand for money, with a supply as yet fully equal to the demand. Rates of discount are firm at 4½@5 per cent; while names not actually A-1, are not negotiated at less than 5½ per cent. New York rates being for the time higher than Boston, has caused considerable New York paper to seek discount in Boston. Bank rates for loans on Clearing House balances were generally at 3 per cent. Call loans to Bankers at 4@5 per cent. Manufacturing paper was in fair supply and the distribution of merchandise was fair for the season.

From Philadelphia we have reports of an increased activity in stocks and bonds, especially the latter. The Money market presents no new features worthy of remark. For choice short date paper a trifle less than 5 per cent is named; but in general that figure is the rate, with frequent transactions above it. Call loans are made at 3@4 per cent. Choice commercial paper is done at 4½@5 per cent. Four months and longer date paper may be quoted at 5@5½ per cent. Loans are made on Government collaterals at 3½@4 per cent; on miscellaneous stocks at about 6 per cent. Pennsylvania Railroad shares sold at the close at 33½@33⅝. Reading Railroad lower at 13⅛@18⅜.

Baltimore advices report a dull and quiet market both for stocks and merchandise. Money continues in amply supply for all legitimate wants. Railroad shares are quoted dull with very limited dealings. Baltimore and Ohio Railroad, common stock, is lower at 80¼@81. Northern Central nominal and unchanged. Railroad bonds are in better demand both for investment and for speculation. Rates for money are unchanged.

In this market Government securities are in fair demand and closed strong at prices quoted below. While the increasing demand for money has checked the late free purchase of new 4 per cents, the demand for this issue continues fair and leaves little doubt that the Government will ultimately reduce the rate of interest on the entire public debt to 4 per cent. We quote all issues of Government bonds as follows:

United States 6s, 1881, registered, 108@108⅛; do. coupon, 108@108⅛; 5-20s, 1865, new, registered, 103@103¼; do. coupon, 103@103¼; do. 1867, registered, 106@106⅛; do. coupon, 106@106⅛; do. 1868, registered, 108@109 do. coupon, 108⅛@109; ten-forties, registered, 106¼@106½; do. coupon, 106½@106⅝; 5 per cents, 1881, registered, 104⅝@104⅞; do. coupon, 105⅞@106; 4½ per cents, 1891, registered, 103⅞@104; do. coupon, 103¾@103⅞; 4 per cents, 1907, reg., 100@100⅛; do. coupon, 100@100⅛; sixes, currency, 119⅜@119⅞.

Money has been in good demand and rates have been irregular and generally higher. As noticed elsewhere in this report, Wall Street has sought discounts in other markets where abundant funds made lower rates than here. Call loans were made at irregular rates, 5@6 per cent being generally paid, with occasional transactions at 3@4.

Gold has shown slight variation since our last report. The quotations at the close were 100 5-16@100⅜. Silver has taken a sharp upward movement in London and cable quotations are at 50½d. per ounce. Under the new mode of purchasing silver by the Treasury Department, bids for 400,000 ounces were opened on the 25th Oct. The bids were reported at ¾ to 1¼ cent per ounce below London quotations. The whole amount advertised for was not purchased.

Foreign exchange has ruled higher during the week, but at the close on Wednesday there was a decided falling off in the demand for cable transfers and sight bills. Commercial bills have been offered more freely, The extreme stringency of the London money market operates to maintain the current rates of exchange, while also serving to check exports. We now quote prime 60 day bills at 4 82; sight drafts at 4 87½@4 88, and cable transfers at 4 89.

Domestic Produce has been irregular and owing to continued unfavorable advices from Liverpool the market has dragged. The offerings were free prior to the close with prices pretty fairly sustained. Exports have been seriously checked, but this condition it is hoped is but temporary. For the week, exclusive of specie, the exports have been $5,696,537 against $7,455,993 last week While shipments of grain to British ports have suddenly fallen off a fair demand continues for French account. There was a firmer feeling exhibited at the close which was not tracable to anything made public.

Cotton has ruled weak and prices have not been maintained. We now quote middling uplands at 9 7 16 cents per pound. Both spot cotton and futures dropped under the extreme weakness reported in the Liverpool market. Sales of futures were at 9 32 for October; for November, 9.20@9.24; for December, 9.32@9.37; for January, 9.42@9.45; for February, 9.52@9.56; for March, 9.62.@9 65; for April, 9.74@9.76. Total receipts since September 1, have been 921,594 bales.

Metals show no change in prices but sales of round lots of Pig Iron have been made during the week, and there is a better feeling in the market. Sales of about 2,400 tons American pig are reported on private terms. Of Scotch pig sales are reported of 100 tons Glengarnock, to arrive, at $22 50. Iron Rails dull at $32@$35. Steel Rails are in good demand at $43@$45, the former price delivered at the mill.

Ocean freights exhibit no material change in rates but may be quoted firm with fair activity in the demand for tonnage. Engagements were made to Liverpool for grain, by steam, at 7d.@7½d.; flour, at 8s. 6d.; cotton, at 19-64d. To London, by sail, grain, 7½d. flour, 2s. 6d.; measurement goods at 22s. 6d. per ton. To Bristol, by steam, grain, 8¾d. per bushel of 60lbs. To Bremen, by steam, grain, 1.80 marks; cotton, ¾c. To Havre, by sail, grain, 5s. 4d. per quarter; cotton, by steam, 11-16c. compressed.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

The Growth of the Steam Engine.

Elsewhere in our columns will be noticed a new publication from the Messrs. Appleton's press, entitled A History of the Growth of the Steam Engine, by Robert H. Thurston, A. M., C. E. It is a work of more than ordinary value to the scientific reader or the practical engineer. Is is profusely illustrated and handsomely executed throughout. It is one of the few mechanical text-books which when read commends itself.

☞ The November coupons of the Income and Indemnity bonds of the Houston and Texas Central Railway Company will be paid on presentation at the office of the company in Houston.

☞ The Wilmington and Weldon Railroad Company has declared a dividend of 3 per cent on the capital stock, payable on the 30th of November.

☞ A gold medal has been awarded at the Paris Exhibition to the Philadelphia and Reading Railroad Company for their exhibition of an American locomotive; also, a gold medal to the Philadelphia and Reading Coal and Iron Co. for their display of American Anthracite coal.

Boston and Albany Railroad.

The receipts of this road for the year ending September 30, 1878, are as follows:

From passengers		$2,275,351 00
From freight		3,721,436 48
From other sources		636,745 93
		$6,633,533 41
Expenditures:		
Repairs of roadway	$607,777 64	
Repairs of engines	300,674 86	
Repairs of passenger and freight cars	490,427 97	
Repairs of buildings, ferry, etc.	283,913 49	
Transportation exp	2,719,221 97	
General expenses	61,981 84	
		4,418,997 27
Net balance of income		$2,219,536 14
From this deduct—		
Dividends, 8 per cent.	$1,600,000 00	
Interest	485,158 98	
Dividends on leased roads	75,000 00	
		2,160,158 98
Surplus not divided		$59,377 16
Add surplus at commencement of year		2,380,395 07
		$2,439,772 28
Less uncollectable accounts		14,711 81
Total surplus Sept. 30, 1878		$2,425,060 42

There has been a falling off in the gross receipts owing to continued depression in business circles, but by judicious management the expenses have been kept down. No addition has been made to construction account during the year, all the improvements having been charged to expenditures. The managers have certainly evinced practical business sagacity in running the road, and with a renewal of business the road will be sure to participate in the increased traffic incident to more active business times.

Houston and Texas Central Railway.

The following is a comparative statement of earnings and expenses of the Houston and Texas Central Railway for the months of September, 1877 and 1878:

	1877.	1878.
Earnings	$237,138 65	$332,554 85
Expenses (including taxes)	125,726 13	135,244 24
Net	$111,412 52	$197,310 61
Increase in net earnings September, 1878, as compared with September, 1877		$85,898 09

☞ We are requested by Hon. Abram S. Hewitt to state that he has not sold the bonds of the Montclair and Greenwood Lake R. R. Co. which he held to the Erie Railway Co., nor to any other person or corporation. He retains them all, and whatever interest he holds is on precisely the same footing as the bonds of the other parties for whom he has acted on the purchasing committee.

☞ Under the order of the Court all the general offices of the Kansas Pacific Railway are to be removed to the State of Kansas.

☞ The survey of the two lines of the Delaware and Maryland canal has been completed from Choptank river to the breakwater,

The Coal Trade.

The total tonnage of anthracite coal from all the regions for the week ending October 19th, as reported by the several carrying companies, amounted to 276,986 tons, against 495 696 tons in corresponding week last year, a decrease of 218,710 tons. The total amount of anthracite mined for the year is 12,882 580 tons, against 15,467,544 tons for same period last year, a decrease of 2,-634,964 tons. The quantity of bituminous coal sent to market for the week amounted to 73,871 tons, against 73,020 tons in corresponding week last year, an increase of 851 tons. The total amount of bituminous mined for the year is 2,-694,860 tons, against 2,701,901 tons for corresponding period last year, a decrease of 7,561 tons. The total tonnage of all kinds of coal for the week is 350,857 tons, against 558,716 tons in corresponding week last year, a decrease of 207,-859 tons, and the total tonnage for the coal year is 15,526,940 tons, against 18,169,465 tons to same date last year, a decrease of 2.642,525 tons. The product of the mines of the Cumberland coal region for the week ending October 19 was 42,473 tons, and for the year to that date 1,292 256 tons, an increase of 54,693 tons as compared with the corresponding period of last year. The shipments to the Baltimore and Ohio Railroad were, for the week, 18,925 tons; for the year, 693,024 tons, an increase of 55,053 tons as compared with 1877. The shipments to the Chesapeake and Ohio Canal were, for the week, 16,782 tons; for the year, 489,812 tons, an increase of 14,865 tons as compared with 1877. The shipments to the Pennsylvania Railroad were, for the week, 6766 tons; for the year, 109,920, a decrease of 14 726 tons as compared with 1877. The quantity of coal and coke carried over the Pennsylvania Railroad for the third week in October was 112,733 tons, of which 90.444 tons were coal, and 22,289 tons coke. The total carried for the year is 8,908,899 tons, of which 2,955,552 tons were coal and 894,349 tons coke. These figures embrace all the coal carried over the road, east and west. The Reading Railroad reports a tonnage for the week ending on the 26th instant of 185,000 tons, of which 62,000 tons were sent to Port Richmond. The shipments thence during the week amounted to 85,000 tons. —*Phila. Ledger, Oct.* 28.

United States Supreme Court.

No. 25. Chester A. Arthur, Collector of the Port of New York, vs. Thomas Prosser.—The question involved in this case is whether the goods imported were dutiable as locomotive tires at three cents per pound, and axles at two and one-half cents per pound, or as manufacturers of steel not otherwise provided for at forty-five per cent ad valorem, subject to a reduction of ten per cent under the act of 1872. The Court below sustained the view of the plaintiff, that the ad valorem duty was the correct one. The Supreme Court affirmed the decision of the Court below, with costs and interest, on the authority of Arthur vs. Morrison (96 United States, 108), and Arthur vs. Leary, (id., 112).

The Chief Justice announced the decision.

Southern Pacific Railroad.

In rendering his decision in the case of the Southern Pacific Railroad Company of California, involving an important question as to the proper interpretation of the act of July 31, 1878, which requires land grant railroad companies, before receiving patents to pay the costs of survey, selection and conveyancing, Commissioner Williamson of the General Land office, holds that this requirement was a new burden or condition imposed upon the original grant, and that, therefore, it is applicable only to the lands earned after the date of new enactments, and not to any lands earned prior to that date. He also holds, incidentally, that this provision does not apply to any road in regard to which Congress did not reserve the right to amend the original grant; and, also, that it is not applicable to lands granted to a State to use in its discretion for the encouragement or construction of railroads.

General Land Office Report.

The Commissioner of the General Land Office in his annual report to the Secretary of the Interior states that during the fiscal year ended June 30, 1878, 8,686,178 acres of public lands were disposed of, and 8,041,011 acres were surveyed, in addition to the 721,613,748 acres previously surveyed. The total number of acres of public domain still unsurveyed is something over 1,000,000,-000 acres. The disposals were mainly as follows:

	Acres.
Homestead entries	4,418,344
Timber culture entries	1,870,434
Desert land entries	810,553
Cash entries	877,555
Grants to railroads	606,340
Swamp lands patented	202,926
Other grants to States	214,992

The cash receipts during the year amounted to $2,022,586, being $569,567 more than the receipts for the preceding year.

The Commissioner recommends in regard to lapsed railroad grants that Congress should either declare the grants forfeited and restore the lands to disposal as part of the public domain, or extend the time for the completion of the roads.

Chicago and Northwestern Railway.

The following information in reference to the rumored sales of new bonds by the Chicago and Northwestern Railway Company is obtained from a member of the Executive Committee:

The following bonds, which were in the treasury of the company and were originally issued for the purpose of building the branches named (and referred to in the last annual report) and which have been built, have been sold in Amsterdam at 90. The company originally advanced the money to build these branches, and the sale of these bonds reimburses the company for its outlay:

Minnesota Valley R. R. Co. bonds, 25 miles, at $6,000 per mile	$150,000
Rochester and Northern Minnesota R. R. Co. bonds, 25 miles, at $8,000 per mile	200,000
Plainview R. R. Co. bonds, 16 miles, at $6,250 per mile	100,000
Menominee River R. R. Co. bonds, 25 miles, at $16,000 per mile	240,000
Total	$690,000

$169 000 of the bonds having been previously sold. All these are 30 year 7 per centum bonds.

Hotel Cars on the Pennsylvania Railroad.

The line of Pullman hotel cars between New York and St. Louis, via the Pennsylvania railroad, is now in complete and successful operation, and all expectations entertained in regard to them by the company have been fully met. The public has not been slow in demonstrating unmistakably its appreciation of hotel coaches, and the liberal patronage bestowed both upon the new line to St. Louis and the one which has been some time in operation between New York and Chicago, affords some basis for the prediction that at no distant day restaurants and dining rooms along the route will be dispensed with altogether. In these cars the charges are *a la carte*, thus placing it in the power of every one to regulate the amount to be spent upon his taste and stomach. The variety of the bill of fare comprises everything the appetite could crave, and in the pleasant and deliberate process of satisfying it, amid luxurious surroundings, it would not be strange if the dining rooms, with their hasty twenty minute meals, should come to be regarded as properly belonging among the things of the past.

Profile and Franconia Notch Railroad.

The contract for building the Profile and Franconia Notch Railroad has been let to James F. Kiernan of Chelsea, Mass., who has sub let the stone and bridge work to M. H. Smith of Tilton, N. H. It is to be a three foot narrow gauge road, about 9½ miles in length, running from a point near Bethlehem station, on the Boston, Concord and Montreal Railroad, to the Profile House. The grade from Bethlehem station to Echo lake is about 760 feet, the highest grade being on the last three miles approaching Echo lake, which is a maximum of 116 feet to the mile. Work was commenced on the 28th ult. It is intended to have all the cuts, grading, etc., done this winter, that the rails may be laid in early spring, for by the terms of the contract the road is to be completed by the 20th of June next. Steel rails are to be used; and the rolling stock and other equipments are to be of the best. Charles C. Lund of Concord, N. H., the engineer who made the surveys, &c., is to have supervision until its completion. The capital stock of $120,000 is all subscribed, and is to be paid up in monthly instalments, the whole to be paid in by June 1, which it is estimated will more than cover the cost of the road.

☞ Charles D. Freemen has been elected President, and D. M. Zimmerman Secretary and Treasurer of the Camden and Atlantic Railroad Company. The directors are: Charles D. Freemen, John Lucas, Andrew K. Hay, James B. Dayton, Enoch A. Doughty, Thomas H. Dudley, Samuel C. Cooper, George T. Da Costa, John F. Starr, Joshua R. Jones, Wm. C. Houston, John A. Merritt, George W. Steever.

☞ The Paris and Danville Railroad, extending from Danville, Ills., to Vincennes, Ills., a distance of 112 miles, was sold on the 24th inst. at Paris, Ills., under decree of foreclosure of the U. S. Court to Charles Ridgley for $301,000. It is supposed to have been purchased in the interest of the Wabash and Cairo and Vincennes Railroad Companies.

☞ Mr. Frank Thomson, General Manager of the Pennsylvania Railroad, has ordered the appointment of Mr. James McCrea, as Superintendent of the New York Division, vice George W. Barker, deceased. Mr. McCrea has for a number of years been the acting Superintendent of the middle division of the Pennsylvania Railroad at Harrisburg.

☞ The Railway News of London gives a list of 205 railways of Great Britain which pay no dividend on their ordinary stock. Most of these are short lines, built for feeders, connecting lines or mere local advantage.

☞ Mr. J. B. Morford, of the New Jersey Central Railroad, was elected Grand Chief of the Brotherhood of Conductors of the United States and Canada at their recent convention in Chicago.

☞ The total amount necessary to pay the interest on the United States Five per cent bonds, due November 1, is $6,000,000.

A GOOD PLAN

The most profitable plan for operating in stocks is that of uniting capital of various sums by combining or pooling the orders of thousands of customers and using them as *one mighty whole*, which has been done so successfully by Messrs. Lawrence & Co., Bankers, 57 Exchange Place, N. Y. City. By this co-operative system each investor is placed on an equal footing with the largest operator, and profits are divided *pro rata* among shareholders every 30 days. An investment of $10 would pay $50, making 5 per cent on the stock during the month. $25 would return $150, or 6 per cent; $100 would make $1,000, or 10 per cent., and so on, according to the market. *Frank Leslie's Illustrated Newspaper*, June 29th, says: The Combination method of operating in stocks is the most successful ever adopted." *New York Independent*, Sept. 12th, says: "The combination system is founded upon correct business principles, and no person need be without an income while it is kept working by Messrs. Lawrence & Co." *Brooklyn Journal*, April 29th, says: "Our editor made a net profit of $101 25 on an investment of $20 in one of Messrs. Lawrence & Co.'s combinations. The firm's new circular (copyrighted and sent free) contains "Two unerring rules for success in stock operations," and explains everything. All kinds of Stock and Bonds wanted. New Government Loan supplied. Best references. Address *Lawrence & Co., Bankers and Brokers*, 57 Exchange Place, New York City."

Railways in Algeria.

Algeria has now five lines in operation, viz: the Bono and Ain-Mokra, opened in 1862, and used for the conveyance of Moktael-Hadid iron minerals to the port of embarcation; the Philippeville and Constantine, opened in 1870; the Algiers and Oran opened in 1871; the Bona and Guelma, opened in 1877; and the Sainte-Barbede Tlelat and the Sidi-bel-Abbes, opened in 1877.

The following lines are now in course of construction in Algeria: The Duvivier to the Tunisian frontier, via Souk-Abras, which will extend the Great Central line as far as the eastern limits of French Africa; the Setif and Constantine and the Maison Carree and Menerville, belonging to the East Algerian; the Guelma and Kroubs, completing the communication between Bona and Constantine, via Guelma; and the Arzew and Saida, which cuts at Perregaux the great artery from Algiers to Oran.

There are at present 429¾ miles of line in operation in Algeria. When all the lines which are now in hand in Algeria are completed, the colony will possess 823¾ miles of line. The Paris, Lyons, and Mediterranean—which has crossed the Mediterranean, and planted itself in French Africa—will figure in this later total for 820¾ miles.

☞ In a paper on the question of gauge, read by Col. E. Hulbert, of Bedford, Ind., at the recent session of the National Narrow Gauge Railway Convention, he said the amount of interest paid upon railroad bonds was greater than that paid upon the entire national debt, and this interest account alone, if invested in narrow-gauge lines, would construct five thousand miles of road annually, even at an average cost of $25,000 per mile, while the cost of construction of the Colorado Central Railroad through Clear Creek Canyon was only twenty thousand per mile.

☞ At a meeting held in Taylor's Hotel, Jersey City, on the 30th ult., for the purpose of reorganizing the Montclair and Greenwood Lake Railroad Company, the following Board of Directors was elected: Abram S. Hewitt, President; Cyrus W. Field, Smith Ely, Jr., Samuel J. Tilden, E. D. Morgan, George J. Rice, Cortlandt Parker, B. W. Spencer, and Hugh J. Jewett. The capital stock was fixed at $1,000,000 in shares of $50 each.

☞ At Cincinnati on the 25th ult., in the application for an injunction against the issue of the $2,000,000 loan for the completion of the Cincinnati Southern Railroad, the Superior Court decided the loan to be constitutional and the bonds legal, and refused to grant the injunction.

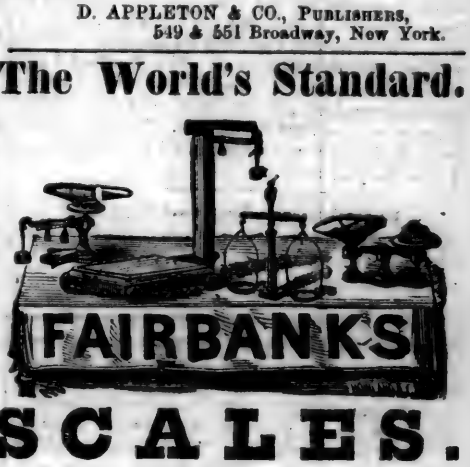
A HISTORY
OF THE
GROWTH OF THE STEAM-ENGINE.
By ROBERT H. THURSTON, A. M., C. E.,
Professor of Mechanical Engineering in the Stevens Institute of Technology, Hoboken, N. J., etc.,
With 163 Illustrations, including 15 Portraits. 1 vol., 12mo. Cloth. Price, $2 50.

CONTENTS.

I. THE STEAM-ENGINE AS A SIMPLE MACHINE.
II. THE STEAM-ENGINE AS A TRAIN OF MECHANISM.
III. THE DEVELOPMENT OF THE MODERN STEAM-ENGINE.
IV. and V. THE MODERN STEAM-ENGINE.
VI. THE STEAM-ENGINE OF TO-DAY.
VII. and VIII. THE PHILOSOPHY OF THE STEAM-ENGINE.



"This is the most exhaustive, lucid and trustworthy account of a most interesting subject. There are two features of the work to which we would direct particular attention. One is the full and careful synopsis of the records and traditions relating to the first discovery and gradual development of the essential principle of heat-engines."—*New York Sun.*

"Prof. Thurston almost exhausts his subject; details of mechanism are followed by interesting biographies of the more important inventors. If, as is contended, the steam-engine is the most important physical agent in civilizing the world, its history is a desideratum, and the readers of the present work will agree that it could have a no more amusing and intelligent historian than our author."—*Boston Gazette.*

"The 'International Scientific Series' is to be congratulated upon the advent of a new member presenting a grand subject scientifically treated and admirably adapted to popular comprehension."—*Providence Journal.*

American Inventions at the Paris Exposition.

Our exhibit at the late Exposition in Paris was small and apparently incomplete beside that of several other nations. In a multitude of industries which belong peculiarly to the nations accustomed to a more complex social system than ours, we are far behind. In nicety of detail as applied to articles of luxury and refinement we are not quite on an equality with England and considerably behind France.

"It is curious to note," said one of the judges, "how generally American inventions aim at directness." And in that remark is a lesson which it seems our neighbors are intently studying. We are a people of direct aims and purposes. It is not singular then that this national characteristic should appear in a national exhibit of industrial skill.

Others remarked the singular preponderance of labor saving appliances in our exhibit as compared with older nations. The price of labor has undoubtedly affected to a decree the course of national invention. Elsewhere than in America the great problem of rulers and governments has been the employment in some way of the surplus labor which existed. This surplus material which when well applied was a source of strength and wealth, when idle was a terror because of its capacity to consume and destroy. It was natural that other nations should rather desire means and implements for increasing the wants of the superior class, few in number, thereby ensuring the better employment of the laboring multitude. The inventions were not then a constant striving to save labor but rather to invite by beauty of design and execution an increased demand from those best able to pay for increased cost. Increased cost in Europe means, as a rule, additional labor; but not necessarily intrinsic increase in value. Increased cost in America, as a rule, means substantial increase in durability or capacity or better fitness of the object to the end.

Of all American inventions the cotton gin may claim to have been the most potent lever of civilization since the printing press. Now, within a brief time, the development of our prairie lands by settlement has kept the inventive brain in a constant fever to discover ways and means to cultivate the largert surface with the least manual labor. Nature had been most kind in every way. Not a stone to obstruct the plowshare, not a hill to climb, scarcely a foot of waste land in thousands of acres. This was the field for invention from which a sure return would come for every additional bushel of grain raised without an additional man's work to produce it. The problem has been speedily solved as the millions of bushels of grain we are exporting show for a result; and by the curious machinery exhibited in Paris for the wonder of the old world as the means by which the result was accomplished.

All our recent inventions sink into insignificance beside those in agricultural implements and machinery. Yet the use and value of these late inventions is little better known in the Eastern States than in Europe. An Illinois corn planter at work on a New England farm would be as great a curiosity to the inhabitants adjacent as the same machine or others of its kindred would if employed in France or Germany.

A considerable exportation to Europe of American agricultural implements and machines, late inventions, has now set in, stimulated of course, by the exhibition of those inventions at Paris. The wonderful results here from the use of these machines has not been exaggerated, nor has all the truth been told. But Europe, we predict, will be disappointed somewhat in the results anticipated from the use of American agricultural machinery. The same conditions do not exist there as here; different soil, different crops and modes of cultivation, all these things will operate against the successful use of American inventions abroad.

The introduction of these new ideas may stimulate invention abroad, it is true, so that the modification of our inventions shall cause increased harvests without increased cost. This will be a great step forward. Here in America nature paved the way for invention. If we are able to feed a hundred millions of people beyond our own borders it is because nature has extended both hands to encourage invention.

☞ Articles of incorporation of the Chicago, Rensselaer and Brazil Railroad Company were filed in the office of the Secretary of State of Indiana at Indianapolis on the 23d of October. Capital stock $100,000, in shares of $50 each, with authority to increase at any time. The directors are: Alfred Thompson, R. S. D. Wiggins, S. P. Thompson, Alfred McCoy, J. E. Wilson, David Nowells, N. W. Reeve, Alonzo Cowgill and J. M. Graham.

☞ Harris Brothers & Co., of Pennsylvania, have taken the contract for the construction of the narrow gauge railroad from Brattleboro to South Londonderry, Vt. The road is to be three feet gauge, and the work is to be commenced at once. The directors have voted to increase the capital stock to $250,000, and to issue first mortgage bonds to the amount of $140,000.

☞ E. P. Safford has been elected President, W. A. Jones Vice President, Arch Mayo Secretary, Amos Smith Treasurer, and Colonel Joel Huntoon Chief Engineer of the Paint Valley (Ohio) Railroad Co. The Chillicothe Register says that the railroad is at last established and will be pushed through at once.

The Literature of Science.

The rapid advance that has been made during the present generation in the practical application of scientific discovery to the necessities of humanity, is in no small degree due to the liberal enterprise of our leading book publishers.

The Chambers brothers of Edinburg, William and Robert, were the pioneers in the noble work of bringing the popular mind into contact and sympathy with the intellectual efforts of the educated few. They effected this by engaging men of ability to restate in familiar style and comprehensible terms the philosophic thoughts and works of the time, and then by publishing these epitomes in a shape attractive to the eye and at a price the humblest mechanic could afford. The effect was magical. Men dropped their saws and chisels to argue on social science, who had not known the meaning of the terms before; and mothers in their lowly cottages taught their children in object lessons with the enthusiasm of a freshly awakened intellect.

Seeds of knowledge were sown in those days, still within our memories, that have grown into mighty trees and the good fruit they bear is seen in every mechanical triumph that surrounds us, in every dawning and matured intelligence that greets us.

This first step was taken by the old world and the Blacks, the Cassels, the Knights and other publishers joined in strengthening the impulse which the Chambers had originated.

The magnetism of congenial thought, allied to more liberal institutions, rapidly developed into a responsive flash on our American shores. But though the motive was the same its manifestation was different. Social rights and duties common to the whole community needed no popularizing here. They had sprung from the blood and the labors of our fathers and were and are our dearest heritage. The freshened impulse given to American thought took natural science for its theme and the mechanical arts for its illustrations.

This was in accord with the genius of the people who then commenced the wonderful career whose history is written in the records of the patent office. The Harpers were the first to fan the flame with their cheap and popular treatises on science, for which they made the old world pay tribute to the new. They soon rivaled and then outstripped the Chambers in the multiplicity of their publications. The Scribners and the Appletons then joined in the pursuit of diffusing wholesome literature in a popular form; each with a success that stamps the era they work in with an indelible record of their respective names. But while all the great firms we have mentioned have worked in the fields of general literature, and have made the names of every author of repute as household words to our American citizens, the Appletons have taken applied science for their specialty. In their "International" series many valuable scientific works have been given to the public written with the rare merit of being both readable and reliable. The last published of this series is on the Growth of the Steam Engine, by Professor Robert H. Thurston, of the Stevens Institute; a gentleman whose extensive knowledge in all branches of civil engineering has given him a high reputation on both sides of the Atlantic. This work, by an author so thoroughly a master of his subject, is, as it could not fail to be, as valuable to the working machinist as to the philosophic theorist. The History of the Growth of the Steam Engine from the crude first idea of the ancients, fostered by the fashioning hands and creative brains of Watt and Stephenson, till its matured strength in the marvelous specimens of Titanic might that drive our ships and our locomotives, is narrated with a quiet descriptive force that interests while it instructs.

The treatise on the philosophy of the steam engine which closes the work is a fitting supplement to the earlier part. It suggests a course of study on the relations of heat and force and on the different modes of generating and applying them, highly interesting at this moment. The world is trembling every day on the brink of some great discovery. Nothing is more likely to precipitate it than the careful perusal of such works as this of Professor Thurston on the Steam Engine.

Grand Trunk Railway of Canada.

The report of the directors for the half year ending June 30, 1878, states:

	June half of 1877.	June half of 1878.
The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines, have been	£874,711	£883,807
Less discount on American currency	14,325	2,804
	£860,386	£881,003
Deduct– working expenses (at rate of 75.73 per ct., against 77.23 for June half of 1877.	664,467	667,253
	£195,919	£213,750
Less—interest on postal and military bonds not retired.	16,596	540
Leaving	£179,323	£213,210

—applicable for the following payments, viz:

Interest, &c.:		
Paid on lands	£3,022	
Temporary loans, &c.	2 058	
British American Land Co. deb.	617	
Montreal Seminary debentures.	616	
Island Pond debentures	2,700	
		9,013
Atlantic and St. Lurence lease	£52,545	
Lewiston & Auburn railway rent	1,849	
Detroit line lease	11,250	
Montreal and Champlain bond interest	8.530	
Buffalo and Lake Huron rent	34,500	
		108,674
1st Equipment bond interest	£12,699	
2nd " " "	15,000	
6 per cent perpetual debenture stock	67,156	
		94,855
		£212,542
Showing a balance of		669
		£213,310

The amount brought forward from the last half year was £49,953, out of which a dividend on the first preference stock at the rate of 3 per cent per annum for the December half year was paid on the 1st March last, absorbing £48,225, and leaving £1,729, which added to the present balance leaves £2,898 to be carried to the next half year's account. The gross receipts for the half year (after deduction of discount on American currency) show an increase of £20,617, or 2.39 per cent as compared with 1877. The working expenses including renewals, amounted to £667,253, or 75 73 per cent, against a total charge of £664,467 or 77.23 per cent in 1877, showing an increase of £2,786, or 0.42 per cent, against the above increase in the receipts of 2.39 per cent. The percentage of the total working expenses has been reduced 1.50 per cent, namely, from 77.23 to 75. 73 per cent. The passenger receipts were less by £3,911, or 1.68 per cent, though the numbers were increased by 10,889, or 1.20 per cent as compared with 1877. The receipts from freight traffic increased £12,815, or 2.18 per cent, and the tonnage increased 103,172 tons, or 9.80 per cent. The total number of passengers carried was 876,861, as against 865,972; and the quantity of freight was 1,156,045, against 1,052,873 tons. The average receipt per passenger was 5s. 4½d., against 5s. 6½d., and per ton of freight 10s. 4½d., against 11s. 2d.

The charges for repairs and renewals of road and rolling stock compare with 1877 as follows:

Expended on—	1878.	1877.
Way, stations and buildings	£88,745	£77,878
Engines	68,784	59,568
Cars	78,164	77,807
Total	£235,693	£215,253
Gross receipts per cent	26.75	25.00

There was therefore an increased charge for maintenance and renewals of £20,440, which included £6,164 on account of new engines. On the other hand, the expenditure for fuel, wages, and other charges for working the railway, was decreased by £17,654, as the following statement shows:

Expended for—	1878.	1877.
Fuel	£109,582	£182,030
Running engines, wages, oil, &c	69,231	70,147
Traffic department	198,770	196,834
General charges	16,708	18,712
Miscellaneous expenses	13,978	13,708
Rent of rolling stock	14,265	7,152
Tolls paid	9,073	8,825
Fire account, Point St. Charles		2,803
Total	£431,557	£449,211
Percentage of gross receipts.	48.97	52.22

The proportion of the working expenses (including maintenance and renewals) to the gross receipts fell from 52.22 to 48.97 or 3.25 per cent, though they were 1.75 per cent higher in the expenditure for maintenance and renewal of road and rolling stock, thus leaving the reduction in the relative proportion of the whole charges 1.50 per cent notwithstanding that the gross receipts were increased by £20,617, or 2.39 per cent, and the work done as shown by the car mileage by 4,773,980 or 7.22 per cent. The receipts in United States currency were $3,220,882 against $3,722,-274, of which $867,470 were converted into gold against $1,150,092 in 1877, entailing a loss of £2,-804 against £14,325, being a decrease of £11,521. Gold fluctuated during the half year from 102¾ on the 2nd January to 100⅛ on 4th May; the average being about 101¼ against an average on the corresponding period of 1877 of 106. During the half year £1 049,959 five per cent perpetual debenture stock has been issued, principally for the exchange or redemption of pre-preferential securities have been thus absorbed:

Postal and military service bonds for	£1,156 800
Montreal and Champlain 8 per cent 2nd mortgage bonds	76,027
First equipment 6 per cent mortgage bonds	76,700
International bridge bonds 6 per cent.	45,400
Sundry mortgages 6 per cent	8,295
	£1,868,222

By the Grand Trunk Consolidated Debenture Stock Act, 1874, it is provided as follows:—"From time to time as and when any preferential charge shall be purchased, exchanged, redeemed, or otherwise required by the company, the interest or annual income which would otherwise have

been or become payable in respect of such preferential charge shall henceforth be applied in aid of the interest payable on the debenture stock hereby authorized to be created, and the security to which such preferential charge would otherwise have been entitled shall continue as security, *pro tanto*, for the benefit of the said debenture stock as if such preferential charge were still existing, and such interest shall continue payable, and such security shall continue to subsist in favor of debenture stock, until by one or other of the means aforesaid, the whole of the preferential charges shall have been extinguished." The annual interest of such charges or securities converted into debenture stock up to the close of the half-year amounted to £83,480. As regards the International Bridge, the Grand Trunk Company have now received shares in the Bridge Company for the balance of £141,678, which has been expended in providing accommodation on the Buffalo side of the Niagara River and for works necessary to the due completion and practical working of the undertaking. There has been a reduction in the charges against capital account of £383,171, arising out of the conversion of Postal and Military Bonds into Debenture Stock. The whole charge against capital for new works and rolling stock was £12,733. The "loans," which stood in the corresponding half year of 1877 at £261,042, have been paid off. Mr. Grosvenor Hodgkinson and Mr. Kirkman D. Hodgson, M. P., have, to the great regret of their colleagues, been compelled by serious ill health to resign their seats at the board, and Sir James Ramsden has also resigned his seat at the board. Mr. William Unwin Heygate, M. P. for South Leicestershire, a Director of the Midland Railway, and Lord Claud J. Hamilton, M. P., deputy chairman of the Great Eastern Railway, have been elected in the places of the two former gentlemen as Directors of the company. On behalf of the board,

Oct. 16, 1878. H. W. TYLER, President.

Uniformity of State Railroad Reports.

At a gathering of railroad managers to be held in Columbus, which some of the papers are dignifying with the title of "Convention," the subject of the returns required by different States from railroad companies will be considered, and a resolution adopted expressive of the desirability of a system of uniform requirements in such cases. This is natural and proper enough, and the several legislatures might wisely adopt the suggestion. In the case of roads like the Lake Shore and Michigan Southern or Pittsburg, Fort Wayne and Chicago, which extend through four or five different States, each of which calls for returns of traffic, some in one shape, and some in another, it is difficult, and often impossible, to comply with the requests.

Out of this circumstance some zealous persons have imagined they saw an opportunity to turn over all this kind of business to the hands of Congress. For two sessions back there have been appeals by one set of roads for Congress to intervene in regulation of rates and to prevent discrimination. All such appeals are merely the desperate expedients of the passing struggle. It does sometimes seem—as in the cases of the Granger States during their recent legislative raids against railroads—as if a Congressional control might be better, but could hardly be worse. The result shows that these ills are more likely to correct themselves under State, than under Federal, authority.

If it were desired to turn Congress into more of a bear-garden than it is, in which each affiliation of roads would be found struggling against its rivals, with the obvious effect of debauching Congress and depleting the companies, nothing better could be devised than to clothe it with power to supervise and control the railroad transportation of the country. It is an open question among law students how far the Federal legislature may proceed in this direction under the clause in the Constitution conferring upon it the power to "regulate" foreign and inter state commerce. The weight of judgment would limit it to prescribing regulations for navigation, registry, etc.; that being the commerce existing at the time of the adoption of the Constitution. In practice Congress has not ventured further than to charter railroads in the Territories; and for a long time the grants of lands to railroads in States were made through the States.

There is a disposition in some quarters to stretch this authority still wider, and at the last session the agrarian tendency cropped out pretty loudly in the passage of an Act to compel all railroad companies which had at any time received aid in lands or bonds to make very detailed reports to an officer of the Government, to submit their books to inspection at any time, and to furnish copies of all contracts or other archives, on pain of fine and forfeiture of franchise for refusal. This was passed under the supposition that it applied only to the Union Pacific, Texas Pacific, and one or two other corporations chartered by Congress and therefore more directly under its authority. Under the ruling of the auditor, however, it is made to include 46 companies, most of which owe their existence to state charters, and many of which have earned their lands by building their roads long ago, and have no more to do with the government than the roads in Long Island. It remains to be seen how many of them will heed the requests of this new authority which seeks to set itself over them.

Mr. French—for that is the auditor's name—or somebody behind him, and in his name, is seeking to popularize this Railroad Bureau by newspaper puffs and otherwise, in which he is represented as a vigilant and serviceable official intent upon bringing the railroads to terms. It is claimed in his behalf that the Railroad Conference at Columbus is to be, in some way, an endorsement of his efficiency and the necessity for his office. There must be some mistake about this. It can hardly be that any reputable railroad manager is so beset with legislative blackmailers that he would willingly fly to a Washington Bureau, the creation of Congress, for relief. If there is any foundation for the story, (which we doubt) we should rather suppose it arises from some interest in transportation that is getting the worst of it in a fair fight, and would be glad for Congress, or the Second Deluge, to intervene in its affairs. To say that the railroad owners and managers of this country will surrender control, or supervision of their business to Congress, without a prolonged resistance, is to misrepresent them.

☞ The Los Angeles Herald says that orders have been issued to commence forwarding steel rails to Arizona, for the extension of the Southern Pacific in that Territory, at once, and that ties are going forward at the rate of 6,000 per day, which looks very much as if the company intended to push construction with speed, and the probabilities are that within the next year Los Angeles will have railroad communication with Tucson.

Ohio and Mississippi Railroad.

A statement was published some time since to the effect that the reconstruction committee of the Ohio and Mississippi Railroad Company had decided to recommend to the directors the commencement of foreclosure proceedings under the second mortgage. Mr. Whitewright, the chairman of the committee, denies the statement. He says: "Certain negotiations are still pending, but the committee are not yet in a position to make a public statement, though it soon will be. The road is being managed by Receiver King, at present, to the entire satisfaction of all the interests concerned, and no steps are in contemplation at present looking to a change." It is understood that the plan of reorganization contemplates the funding of four or five half-yearly coupons of the second mortgage, and the belief is entertained that the earnings of the road, judging by the business of the present year, will provide sufficient means for the payment of interest on all its bonded indebtedness.

☞ The San Francisco Alta says so many railroads have been built in California, and they have advanced so far beyond the demands of business or the probability of any large profit, that the future construction must be slow. Out of 2,000 miles at least 1,600 do not pay 6 per cent on the cost. Long stretches have been built with the expectation that they would be unprofitable, one motive being to increase the trade of other roads already built.

☞ The Charlottesville and Rapidan Railroad, now in course of construction, will be 27 miles in length, extending from Orange Court House, Va., to Charlottesville, and is intended to give the Washington City, Virginia Midland and Great Southern Railroad a new line in place of the track of the Chesapeake and Ohio Railroad which it now uses between Gordonsville and Charlottesville.

☞ The extension of the Iowa and Dakota division of the Chicago, Milwaukee and St. Paul Railway is now completed to Sheldon, Iowa, a distance of 210 miles from Calmar. The line, which is to be constructed to the western boundary of the State, will be built some 15 miles beyond Sheldon this fall.

☞ The compensation paid by Western Railroad Companies to sufferers by prairie fires caused by locomotive sparks, has been very heavy the past season. The Denver and Cheyenne Railroad Company are now ploughing fire guards on each side of their track.

☞ The directors of the Pittsburgh Southern Railroad have decided to push the entire line by way of Hillsboro, Clarksville and Carmichaels to Morgantown and Grafton. The money to grade, bridge and tie the road is now raised along that whole route.

☞ The Joliet and Mendota Railroad Company has been incorporated to build a railroad from Joliet, Ill., to Mendota, a distance of 55 miles. The capital stock is $600,000.

Pennsylvania Railroad.

The following is a copy of the preamble and resolution, creating a trust for the purchase of certain securities, adopted at a meeting of the board of directors of the Pennsylvania Railroad Company, held in Philadelphia on the 9th of October, 1878:

Whereas, A law of the commonwealth of Pennsylvania, approved March 23d, 1853, did authorize the Pennsylvania Railroad Company to subscribe to the capital stock, or guarantee the bonds of such railroad companies in other states as may seem to them important to promote the trade of Pennsylvania and the interest of the company; and other subsequent general legislation, in this and other states, at various dates, did authorize railroad companies to lease connecting lines of railroad in the said state of Pennsylvania and other states, and to lease, or become the lessees, by agreement or otherwise, of any railroad or railroads, or enter into any other contract with any other railroad company or companies, individuals or corporations, on such terms and conditions as might be agreed upon, whether the road or roads embraced in said lease, assignment, or contract may be within the limits of this state, or created by or existing under the laws of any other state or states; and did authorize any railroad company or companies of this commonwealth to guarantee, in whole or in part, the payments and covenants of any such lease, assigned lease, or contract; and by virtue of said general legislation, and other special laws, the Pennsylvania Railroad Company was authorized to subscribe to the capital stock, and guarantee the bonds of railroad companies and of other corporations, and to endorse, guarantee, or otherwise become liable for, or assume the payment of, the principal and interest of the bonds, or other evidences of indebtedness, of railroad companies and other corporations, and to guarantee, in whole or in part, the payments to be made and covenants to be performed under leases, assigned leases, and contracts;

And whereas, In pursuance of such authority, and all other lawful authority it enabling thereto, the said Pennsylvania Railroad Company has heretofore entered into leases and contracts, and has endorsed, guaranteed, and assumed the payment of dividends upon stock, and interest and principal of bonds, and the performance of covenants and contracts:

And whereas, The president and directors of the Pennsylvania Railroad Company, in the thirty-first annual report, made to the stockholders on the the twelfth day of March, 1878, did recommend the creation of a trust fund, to be applied, among other things, to the purchase, from time to time, of the said bonds and shares of other companies guaranteed by the Pennsylvania Railroad Company, for the purpose of ultimately controlling all the liabilities incurred in pursuance of any of the legislation hereinbefore referred to.

And whereas, After consideration of said recommendation, the stockholders did, on the twenty-sixth day of March, 1878, at the annual election for directors, vote upon the creation of a trust, and did adopt the following resolution:

Resolved, That the creation of a trust, having for its object the purchase, from time to time, of the bonds and shares of other companies which are guaranteed by the Pennsylvania Railroad Company, and also of the bonded debt of the Pennsylvania Company, be, and it is, hereby approved; and that the incoming board of directors be, and they are, hereby instructed and authorized to take such action, under the advice of counsel, as may, in their judgment, be lawful, necessary, and best adapted to create such trust, and to accomplish the objects for which it is designed:"

Now, therefore, The board of directors of the Pennsylvania Railroad Company, in pursuance of said authority and instructions, and for the purpose of carrying out the intention and accomplishing the object expressed and declared in the said resolution adopted by the stockholders, do resolve as follows:

1. That upon the first Monday of November, 1878, and upon the first Monday of each month thereafter, the treasurer of the Pennsylvania Railroad Company shall set apart the sum of fifty thousand dollars; which sums of money, and any other sums that may be set apart by other action of the board for the same purpose, shall be placed to the credit, and subject to the order, of the managers of the trust by these resolutions provided for.

2. That once in each year, and oftener, if deemed prudent, there may be set apart, out of the earnings and surplus of the company, by resolution of the board of directors, after payment of dividend to the stockholders, such additional sum or sums of money as the state of the company's business will warrant, to be placed to the credit, and subject to the order, of the said managers of the said trust: Provided, That no such appropriation or appropriations shall be made during any year as will, with the monthly payments herein before provided for during the year, exceed two per centum upon the capital stock of the company that may be then outstanding.

3. That in pursuance of the hereinbefore recited resolution, adopted by the stockholders, a trust is hereby created; having for its object the purchase, from time to time, of the bonds and shares of other companies, the principal, interest, or dividend upon which is guaranteed by the Pennsylvania Railroad Company, in pursuance of the legislation in the foregoing preamble recited or referred to, which trust shall be carried into effect with the sums of money that shall be set apart and placed to the credit, and subject to the order, of the managers of said trust, in pursuance of the preceding resolutions, and with any accretions or profits arising therefrom.

4. That the said trust funds shall be under the control of five managers, of whom the president of the Pennsylvania Railroad Company, by virtue of his office, shall be one, and a vice president, for the time being, to be designated by the board of directors, shall be one, and the other three, such directors of the Pennsylvania Railroad Company as shall be elected by the votes of a majority of the whole number of directors. The three managers shall be so chosen, and a vice president designated to serve until after the next annual election and qualification of directors, and thereafter, in like manner, at the first meeting of every new board of directors, to serve for one year, or until such qualification as aforesaid. Every vacancy that may occur by death, resignation, or from any cause, in the number of managers to be elected or designated from the directors or vice presidents, shall, at the next or any stated meeting after such vacancy shall have occurred, be filled by election or designation of another director or directors, or vice president, to fill the vacancy or vacancies for the unexpired term. No compensation shall be paid to any of such managers for his services in discharge of said trust; but all clerical assistance and other necessary expenses shall be paid out of the trust fund.

5. That said managers of said trust shall have authority to draw from the treasury, upon orders signed by at least three of their number, the funds placed to their credit in pursuance of previous resolutions, which, when so drawn, they shall deposit to their credit in such depository in the city of Philadelphia as may be approved by the board of directors. The funds thus deposited and all interest received thereon, or upon the securities purchased therewith, shall be used by said managers in the purchase, as promptly as practicable, from time to time of the outstanding shares or obligations of such companies, the principal, interest, or dividend of or upon which is guaranteed by the Pennsylvania Railroad Company, or for which it is legally liable; but no purchase of any such securities shall be made, and no money shall be drawn from said fund to be used in payment for the same, unless such purchase and payment shall be authorized at a meeting of the managers, and by a majority of the whole number, and the checks therefor shall be signed by three of the managers. The securities purchased shall not be cancelled or extinguished, but shall be held by said managers for the purposes of said trust; and all interest or dividends thereon shall be collected and deposited and used in the same manner as the principal sums appropriated and set apart for the purposes of the said trust.

6. Said managers shall deposit in separate safes, specially designated for that purpose, and under their exclusive control, in the vaults of the Pennsylvania Railroad Company, all securities by them purchased with said trust funds, making at the time of any such deposit a schedule, containing sufficient data for identification, of all bonds or stocks or securities of any character so purchased and deposited; and they shall make report to the board of directors, at the first stated meeting in each month, showing the whole amount of money that has been previously set apart for the purposes of the trust, the amount of money upon deposit to the credit of the managers, the amount of interest received upon deposits, the amount of interest received upon securities purchased, the list of securities actually purchased and held in the trust, and the prices paid for the same, and any other matter or information that may be necessary to show the actual condition of the trust, and special reports may at any time be required by the board of directors. They shall also furnish to the board of directors, in addition to the reports hereinbefore provided for, an annual report of the operations and condition of said trust at such time, that it may be submitted with the annual report of the directors to the stockholders. The managers of the trust shall be held responsible only for the exercise of good faith in the discharge of their trust, and shall not be liable unless for wilful neglect or malfeasance in the conduct of the trust,—each one being responsible for himself, and not one for the other.

7. If at any time the managers of said trust shall be unable to purchase any of said securities contemplated to be purchased for said trust, at prices by them deemed proper to be paid, they shall make prompt report of such inability to the board of directors, and be governed by their instructions as to the temporary investment of the trust funds in their hands, and if other securities shall, under such authority, be purchased, they shall hold the securities so purchased only until they can buy liabilities contemplated to be purchased for the trust, at reasonable rates, at which time the other securities so temporarily held shall be sold, and the proceeds, with any interest received thereon, accounted for and used for the purposes of the trust.

8. Two stockholders, not members of the board of directors, shall be selected by the board of directors at the same meetings at which managers of the trust shall be elected, and in like manner from time to time; which two stockholders shall, at all reasonable times, upon their request, be permitted to examine the accounts of the trust. And prior to the making up of each annual report of the directors, it shall be the duty of such stockholders to audit the accounts of the trust for the year, and make actual inspection of the securities then held in and for the trust, and make report to the board, so that the result of their examination may be embodied in the annual report to the stockholders: Provided, that no compensation shall be paid to stockholders for such service, and that they be so informed when notified of their selection.

9. The said managers shall organize by the election of a chairman and the selection of a clerk or secretary, and may adopt such rules and regulations as, in their judgment, will facilitate their proceedings and secure the accomplishment of the objects for which the trust is created. Such rules and regulations, before going into effect, shall be submitted for approval to the board of directors. The managers shall keep a regular record of all their proceedings, and the minutes of each meeting shall be signed by the chairman and attested by the secretary.

10. The board of directors may at any time

make any modification of, or addition to, the terms of these resolutions which, in their judgment, shall be necessary or expedient for the more efficient operation of the trust, and for securing the purposes for which it is created; but no such modification shall at any time be made by the action of the directors as will direct the funds of the trust, the bonds, shares, or liabilities that may be purchased with said trust fund, to be conveyed, assigned, or transferred in any form that will conflict with, or impair the efficiency of, this trust; it being the intention that the said trust shall be administered and continued for the benefit of the stockholders of this company. The moneys and securities owned by the trust, under the provisions hereof, shall never be used for any purpose other than is herein directed; and whenever, in the opinion of the board of directors, the appropriations to the trust should be reduced, or should cease, they may order such reduction or discontinuance of such appropriations, having first reported their action to the stockholders, and obtained their ratification and approval thereof, at a meeting to be called for that purpose by the board of directors, upon at least ninety days notice.

History of the Railroad Car Wheel.

EDITOR AM. RAILROAD JOURNAL:

DEAR SIR: Your request of the 29th ult. said my long experience in railroad car wheels would enable me to give you a brief history of that very important part of the rolling stock. I have for forty years been interested in watching improvements in the same, and will give you some of the results of my observation and study.

The first railroad running in the United States used the spoke wheel with open banded hubs. They were in general use up to about 1840. Experiments had been made as early as 1834 with a solid hub and plate wheel by James; and in 1835 by Baldwin; also by Truscott, Wolf and Dougherty, and Bush and Lobdell in 1838, patents of same date. The Bush and Lobdell wheel was manufactured at Wilmington, Del, and was used by the principal roads of the United States. The weak point of this wheel was in the plate, running from the hub to the rim, it being so large that the jar or vibration caused it to break, and the tread and rim to break apart owing to the plates bearing on either side; but with all these faults they had no competition for about ten years.

In 1847 there were several patents issued for improvements to obviate and overcome these difficulties. One was issued to the writer May 15th, and one to Asa Whitney May 22d same year. My wheel was a double plate beginning at the hub, and meeting at about half-way to the rim, and thence forming a single wave plate to the rim, thus giving support to the whole width of the tread. Whitney's was a waved plate extending from the hub to the rim. He began their manufacture in 1848, and they were adopted by the Hudson River Railroad Co. My wheel was not introduced till 1850, owing to the destruction of patterns and machine shop. In 1850, Washburne made an improvement on my patent of 1847—it being a curved plate (instead of waved) with brackets at the back to support the rim—it being a modification of my wheel making the plate curved instead of waved. This wheel is the one now made by all the wheel manufacturers, and is now in general use in the United States and Canada.

Thus much in regard to cast wheels. I will in my next call your attention to the still further efforts being made to make improvements in safety and economy by using steel tire wheels.

ANSON ATWOOD.

NEW YORK, November 4, 1878.

Mining.

Some extensive gold placers have been discovered in the southern parts of Chili. The auriferous earth is so rich that a large amount of capital has been invested in the preliminary preparations for its hydraulic working. As water is abundant and there is ample fall, the work will be very remunerative.

A perfect amalgamator is a miner's desideratum. There are plenty that profess to refine 90 per cent of the ore they work, but of these not one probably extracts above 80 or 85, and the remainder do well if they give back 70. That this is no mere hypothesis is obvious from the fact that in most of the custom milling districts a miner is fortunate if he sells his ore anywhere within twenty-five per cent of the actual assay value.

This being so, it is with much satisfaction we note that a Pennsylvania inventor has perfected an amalgamator which claims to obtain from 98 to 100 per cent of the precious metal incorporated in the ore besides returning all the mercury employed minus an unappreciable wastage, the whole process being completed and the results arrived at within sixty minutes from its commencement. A company has been based on the invention and hires out its apparatus at a moderate monthly charge.

A small calculation will show the value of this new process. Supposing the output of a mine to be 25 tons per day of ore assaying $60 to the ton and returning $45, the new apparatus will increase this to $55, being at net gain of $250 per day; but as it can work five tons more per day the actual advantage is $175 per day more after allowing $20 per ton for charges. This is a total net gain of $425 daily.

We would like to hear from any of our readers who are using this apparatus if this result is approximately arrived at.

The latest intelligence from the Blacks Hills is that a quartz ledge 3,000 feet between the walls has been discovered several miles in length and prospecting from $20 to $40 per ton.

☞ An adjourned meeting of the first mortgage bondholders of the Wilmington, Columbia and Augusta Railroad Company was held Monday at No. 8 South Gay street, Baltimore. The object of the meeting was to sign an application to the United States Court for sale of the road. It was stated that the bondholders favor a sale, and will probably become the purchasers.

☞ The earnings of the Great Western Railway of Canada for the month of September, 1878, were $324,200, the expenses $234,400, and the net earnings $89,800; for the month of September, 1877, the earnings were $382,500, the expenses $241,800, and the net earnings $140,700—showing a decrease in earnings of $58,300, in expenses of $7,400, and in net earnings of $50,900.

Foreign Finances.

The municipal revenues of Italy for the last financial year, by returns just published, amounted to $88,559,000, the burden per head of population being $3 42. Of the amount raised $19,000,000 was for interest on debt, and $8,000,000 only, for public instruction. The municipal revenues of France for the last financial year, amounted to $83,000,000, being at the rate of $1 20 per head for the rural population, and $20 per head for the inhabitants of Paris.

French imports for the last nine months amounted to $651,099,000, of which $210,000,000 were cereals and other articles of food, and $343,000,000 of cotton and other raw materials for use in manufactures. Her exports during the same time were of the value of $490,000,000. Compared with the corresponding months of last year, a falling off of exports of $26,000,000 is shown, and an increase of imports of $108,000,000.

The revenue of Great Britain for the current year is estimated at $402,833,200, of which the Post Office supplies $30,000,000, the telegraph service—which is worked exclusively by the Government—$6,364,000, and the Income Tax $41,478,800 on the basis of four pence in the £ sterling, or $1 67 per $100. It is seen from this last item that the net annual income on which the tax is levied, amounts to two hundred and forty-eight thousand million dollars. The annual charge for interest on the National debt is $185,520,000. The greater part of the debt bears 3 per cent interest only, and is known as 'consols.'

In Scotland there are 960 provincial banks and branches, being an average of three for every town and village; besides 53 National and 560 Post Office Savings Banks. This number supplies every 2,000 of the inhabitants with a bank. The City of Glasgow Bank had 180 branches, of which 30 were in towns and villages where there was no other bank. In these places all business was brought to an absolute standstill for a short time by its failure; but as the other banks immediately took up its notes and advanced in anticipation of a dividend from the assessed shareholders, confidence in the general banking system was not impaired.

☞ At the last meeting of the Engineers' Club of Philadelphia, Mr. Percival Roberts, Jr., read a paper on the "Strength of wrought iron in structures." He called attention to the great need for more accurate knowledge in regard to the strength of wrought iron, and criticised, in a terse and interesting manner, some of the testing machines and specifications of the present day.

☞ The Osceola (Wis.) Press says it is expected that the Grantsburg Railroad will be graded to the St. Croix River, from Grantsburg, this fall, and it is believed that the $20,000 borrowed by Burnett County from the State will be sufficient to complete the grading.

☞ Elijah B. Stoddard has been elected President, and Edward D. Stoddard, Clerk and Treasurer, of the Worcester and Shrewsbury (Mass.) Railroad Company. The earnings of the road last year were $9,840, an increase of $1,844. About 150,000 passengers were carried.

Pennsylvania Railroad.

The following statement of the business of all lines of the Pennsylvania Railroad Company east of Pittsburg and Erie, for September, 1878, as compared with the same month in 1877, shows

A decrease in gross earnings of	$147 762
A decrease in expenses of	15,242
A decrease in net earnings of	$132,520

The nine months of 1878, as compared with same period in 1877, show

An increase in gross earnings of	$813,660
A decrease in expenses of	554,632
An increase in net earnings of	$1,368,292

All lines west of Pittsburg and Erie for the nine months of 1878 show a deficiency in meeting all liabilities of $391,062, being a gain over the same period in 1877 of $225,964.

Statement of the Public Debt of the United States, November 1, 1878.

Sioux City and Pacific bonds, 1862-64	1,623,320 00	32,566 40
Totals	$64,623,512 00	$1,292,470 24

Interest paid by United States, $30,825,039 84; interest repaid by transportation of mails, &c., $10,416,101 50; balance of interest paid by United States, $29,418,986 36.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1878.

JOHN SHERMAN,
Secretary of the Treasury.

* This amount includes $30,500,000 Five-twenty called Bonds not yet matured, against which a like amount of 4 per cent Bonds have been issued and are embraced in this statement, and the amount included in the coin balance.

☞ A petition has been filed in the United States Court by Theodore Stern and Wm. Lawson on behalf of the European bondholders of the Wisconsin Central Railroad for the appointment of a receiver. The complaint says the interest on the debt and coupon interest on the unfunded bonds is $165,000, and that the annual net earnings do not appear to more than $120,000, and on this ground prays that a receiver may be appointed.

☞ Portugal is now building the most important line of railroad that is at present under construction in Europe. It is called the Berra Alta railway, is one hundred and twenty five miles long, traverses a rich and populous district, and forms a long desired connecting link between Lisbon and Paris. It is estimated to cost $58,595 per mile, of which $41,125 will be paid by the Government.

☞ M. H. Smith, formerly general freight agent of the Louisville and Nashville Railroad, has been appointed assistant to Vice President King, of the Baltimore and Ohio Railroad Co.
